March 31st Summary of H.M. Inspector's Report on the School.

"The Discipline and Teaching are much hampered by the crowded state of the school-room. Some steps should at once be taken to remedy this inconvenience, by enlarging the present room, or building a Class-room. The children read fairly, spell fairly except in the first and second Standards, and work their sums fairly well in the first, well in the third, but only pretty fairly in the second and fourth Standards. Boys' Grammar good; Girls' Needlework moderate. The Infants are very backward."

The Grant under Article 106 (a) Code of 1882, will be seriously endangered next year unless H.M. Inspector can report favourably upon the arrangements for the Instruction of the Infants. J
