

Revit Technician / BIM Coordinator

Location: Whiteley, Fareham PO15 7FT

Salary: Experience Dependant (circa. £35,000 per annum plus bonuses & perks)

About the company:

Aqua Platinum Projects are a market leading swimming pool (and facilities) design and build specialist, providing turnkey solutions to domestic customers, main contractors, and commercial developers.

Due to continued growth and industry expectations, we are looking to engage a **Revit Technician / BIM Coordinator** keen to help develop themselves and the company, and who would enjoy the challenge of designing for high-end prestigious projects.

Duties of the Revit Technician / BIM Coordinator:

- 2D & 3D draughting to design and develop detailed projects with the team, both creative and technical design input required.
 - As an example, this could include pools design, plant specification, ventilation calculations, thermal experiences and so much more!
- Detail and develop MEP services and other aspects of the design in line with the project specifications.
- Assist the Project Leads with the implementation of BIM processes, ensuring that the business follows the necessary standards to client team protocols.
- Lead and promote BIM in the business, ensuring that BIM is used most efficiently by arranging and/or delivering training, and provision of guidance notes and tutorials to others when required.
- Establish best practice working methods for BIM, complementary applications, and technology; continued R&D required to keep up with industry standards.
- Work with the Design Managers to ensure projects are deliverable and can be produced within specified timeframes. Would need to be involved in DTMs when required.
- Ensure models are validated and COBie requirements are met.
- Help to develop the standard CAD libraries / Revit families and content management protocols.

Essential Skills:

- Proficient in AutoCAD and Revit using BIM to Level 2 (LOD 300) and above (min 3 years).
- Experience working in a common data environment with federated models and clash detection.
- You will be able to communicate confidently and professionally through good oral and written skills with both clients and contractors.

Desirable Skills:

- Strong technical background in MEP and fit-out environment.
- BIM certification would be beneficial.
- Experience with ISO19650, COBie and other forms of information exchange.
- Document management software experience.

Job Benefits:

- Bonus scheme
- Work from home capabilities
- Training courses
- Company pension scheme
- Free parking
- Friendly open plan office

If you meet the requirements and feel that this role is right for you then please apply today by sending your CV to: karen@aquaplatinumprojects.co.uk
