

MG TC/TD/TF Gudgeon Pin Clamp Bolt & Washers

Gudgeon pin clamp bolts with original hex heads were problematic for two reasons: the head came so close to the connecting rod that getting a socket on it was an issue and proper BSF hex material became hard to find. Moss has developed a kit with four mil-spec socket cap bolts, heavy section lock washers and ARP Ultra-Torque assembly lube, to ensure accurate torque readings. Bolts will require a 6mm hex-bit.
