

Equality + higher education

•AdvanceHE

Staff statistical report 2019

Advance HE was formed in March 2018, following the merger of the Equality Challenge Unit, the Higher Education Academy and the Leadership Foundation for Higher Education.

Our purpose is to advance the professional practice of higher education to improve outcomes for the benefit of students, staff and society. Advance HE has been created to be “of and for the sector” and is jointly owned by GuildHE and Universities UK.

We are driven by the strategic needs of higher education. Through our passion for excellence, we aim to create an inclusive culture that champions the continuous development of teaching, leadership and research. We use an evidence-based approach to identify what works, and develop practice-based solutions.

Our vision is that the world-class reputation and standing of higher education is enhanced and recognised for transforming lives, enriching society and developing the economy for the better.

Introduction

This is the twelfth national staff equality data report for higher education institutions (HEIs). It aims to assist the sector in better understanding the main equality challenges for staff and directing future efforts to overcome them.

This report presents a snapshot of the age, disability, ethnicity and gender of the higher education (HE) workforce in the academic year 2017/18, as well as the interplay of these identities (eg female Black professors or male disabled senior managers). In addition, our report presents high-level findings on institutional collection and return rates of staff gender reassignment, religion and belief and sexual orientation data, as well as how this data intersects with other identity characteristics.

The report provides national figures which can be used:

- = to consider the diversity of the HE workforce as a whole
- = to consider change and progress over time, using previous reports as comparators
- = by individual institutions for benchmarking purposes

What's new

In 2016, Advance HE (formerly the Equality Challenge Unit) undertook a review of its annual statistical reports and redeveloped them to present high-level findings while expanding the detail and coverage in the accompanying set of Excel tables. For example, further detail can be found by five-year age bands, impairment type, or ethnic group. The online data tables also include information previously published as part of our Athena SWAN benchmarking resource and much of the gender information in this report is thus further disaggregated by subject area in the online tables.

We encourage readers to use this report as a starting point for further examination of the data available in these Excel tables. There is a table mapping out where additional information is available in the **Online data tables** section. In addition, throughout the report, it is noted under each table when additional detail is available in the Excel tables.

We have also refreshed the look of the reports to make printing and viewing electronic copies easier and more accessible. Readers who wish to print this report may find it helpful to do so on A3 paper.

There is an illustrated guide to using this report in the can be found in the **How to use this report** section.

How to use this report

This indicates that percentages should be read **vertically** eg within an ethnic group, the percentage of staff in a salary range.

This indicates that percentages should be read **horizontally** eg within a salary range, the percentage of staff in an ethnic group.

If additional detail is available it is noted here. These are hyperlinked to the relevant Excel table online.

The tables and graphs have been designed on the same grid. This allows you to cross-reference across the tables and graphs.

≤ Nationality definition: see page 12

Information about the data is noted here. Clicking on a field will take you to the relevant information in **About the data**.

Graphs have also been colour coded for easy identification of groups.

| | All staff | UK nationals | Non-UK nationals |
|--------------------------------|-----------|--------------|------------------|
| All staff | | | |
| Academic staff | | | |
| Academic staff: SET | | | |
| Academic staff: non-SET | | | |
| Professional and support staff | | | |

Full-time and part-time modes are denoted using darker (full-time) or lighter (part-time) tones of these colours.

Online data tables

To help users access and analyse our data, all data tables presented in this report are available for download in Excel format. Where appropriate, these tables provide additional detail to those in this report. This includes further disaggregation by: detailed age bands, impairment type, ethnic group, subject area, or filtering information by academic starters. Additional information is available in our online tables: www.advance-he.ac.uk/knowledge-hub/statistical-report-2019-data-tables

Year-on-year comparisons

To see complete data from 2016/17, please see Advance HE's previous statistical report on staff in HE: www.ecu.ac.uk/publications/equality-higher-education-statistical-report-2018/.

Other previous reports can be found at www.advance-he.ac.uk/guidance/equality-diversity-and-inclusion/using-data-and-evidence/statistics-reports.

Heidi plus

Additional HE data can be accessed via 'Heidi plus', a web-based management information service run by the Higher Education Statistical Agency (HESA) for HEIs and approved HE stakeholder organisations. The database provides easy access to a wide range of national quantitative data about HE, and functionality for analysis, presentation and comparison of the data with other institutions, as well as sophisticated visualisations.

Heidi plus allows users to manipulate the data to compare their performance with that of particular groups of institutions, for example within mission groups, national or regional areas.

For further information, see www.hesa.ac.uk/services/heidi-plus.

Definitions

A list of definitions and notes about the data precedes the body of this report to clarify some of the terms used and how the data has been presented. Additional detail is provided in the About the data section.

Please note: in 2012/13, a number of fields in the HESA staff record were either modified or discontinued. As a result, data concerning academic and professional and support staff; gender; departments; professorial status; and senior management status are not comparable to data prior to 2012/13.

Additional resources

It is important to note that the monitoring information that institutions supply to HESA is not the only source of equality information within an institution. For example, institutions will also collect information via staff surveys, involvement activities and HR records.

We continue to update our guidance on equality monitoring and the questions used in monitoring surveys: www.ecu.ac.uk/blogs/updated-ecu-equality-monitoring-guidance/

Advance HE has also put together a series of handbooks for governors of institutions in the UK to provide practical guidance on integrating equality and diversity into an institution's mission, strategy and culture. The individual handbooks are available online: www.ecu.ac.uk/publications/equality-handbooks-governors/

Using the national figures within this report alongside institutional figures and qualitative data will give institutions a fuller picture of equality and diversity in their institution, allowing them to set evidence-based equality outcomes and objectives.

A number of publications from ECU explore the collection of additional information in further detail:

www.ecu.ac.uk/guidance-resources/using-data-and-evidence

About the data

The analysis in this report is based upon data drawn from the HESA staff record 2003/04 to 2017/18. Due to changes HESA implemented in 2012/13, some information is not comparable to previous reports.

This record covers all academic and professional and support staff holding one or more contracts of employment with a UK HEI. The analysis presented here is based on a small selection of the large amount of data available from HESA.

This report does not include staff on consultancy contracts or atypical staff. The term 'atypical' is used to describe working arrangements that are not permanent, involve complex employment relationships and/or involve work away from the supervision of the normal work provider.

Counts of staff represent counts of **full person equivalents** (FPE). This is to allow for the fact that individuals can hold more than one contract within an institution and each contract may involve more than one activity. FPEs are calculated by dividing staff counts among their activities in proportion to the declared full-time equivalent for each activity. Staff FPE counts are calculated on the basis of contract activities that were active on 1 December of the reporting period. Further information about how FPE is calculated can be found at: www.hesa.ac.uk/collection/c15025/fte_vs_fpe.

All counts of staff have been rounded to the nearest five in accordance with HESA policy in order to protect the confidentiality of individuals. As totals have also been rounded based on unrounded values, some may be higher or lower than the individual count numbers presented in the report.

Percentages are based on known staff data and calculated from unrounded data. Throughout the report, "." represents a percentage calculated on a population of between 0 and 22.5 inclusive. These percentages have been suppressed to protect against over-interpretation of small numbers. Averages based on seven or fewer staff members have also been suppressed for this reason.

Age

This report uses the following age categories and is calculated at 31 August in the reporting year:

- = 25 and under
- = 26 to 30
- = 31 to 35
- = 36 to 40
- = 41 to 45
- = 46 to 50
- = 51 to 55
- = 56 to 60
- = 61 to 65
- = 66 and over

In some cases these categories have been aggregated.

Disability

Disability is recorded within the HESA staff record on the basis of self-assessment using one of three possible categories:

- = declared disabled
- = not known to be disabled
- = information not provided

This report uses the term 'disabled staff' to refer to staff who are indicated as disabled on their HESA staff record. From 2012 onwards, 'non-disabled staff' refers to staff who have indicated that they are not disabled, or whose disability status is unknown by their institution. This aligns with changes to HESA reporting standards in 2012.

Prior to 2012

'Non-disabled staff' figures did not include staff whose disability status was unknown by their institution; this group therefore constituted a smaller proportion of the staff population and, conversely, 'disabled staff' a larger proportion. As a result, the percentage of staff in the disabled category may represent a slight undercount compared with how it was reported prior to our 2012 report.

Ethnicity

Ethnicity within the HESA staff record is based upon the 2011 census classification system in England and Wales. For the purposes of this report, the census categories have been aggregated into six groups:

- = Asian – Asian or Asian British; Bangladeshi, Asian or Asian British; Indian, Asian or Asian British; Pakistani, and other Asian background
- = Black – Black or Black British: African, Black or Black British; Caribbean, and other Black background
- = Chinese
- = mixed
- = other ethnic background, including Arab
- = White – all White ethnic groups including White British

Where the numbers are large enough, some analyses are reported in more detailed groupings.

For some analyses the non-White groups have been further aggregated into a single Black, Asian and minority ethnic (BAME) group.

This definition of BAME is widely recognised and used to identify patterns of marginalisation and segregation caused by attitudes towards an individual's ethnicity. Advance HE recognises the limitations of this definition, particularly the assumption that minority ethnic staff are a homogenous group. Where possible, this report will present data disaggregated by more detailed ethnicity categories in addition to data consolidating BAME staff as a group.

2012/13 onwards

From 2012/13 Arab was added to the coding frame for staff ethnicity. Where ethnicity is aggregated as above, Arab has been grouped into other ethnic background.

Gender

Beginning in 2017/18, the HESA staff record started to collect data in the sexual identification field using the possible options of male, female and other. Between 2012/13 and 2016/17 this data was collected using the legal sex field, of which the possible options were male and female. For the purposes of this report, data from the sex identification field is referred to as 'gender'. Due to small numbers, staff members who have indicated their sex as 'other' have been excluded from any gender analysis in this report.

Prior to 2012/13

The HESA staff record included a gender field, with the possible options of male, female or indeterminate. HESA used the category 'indeterminate' – which is consistent with the managing information across partnerships (MIAP) common data definitions coding frame – to refer to intersex people. Intersex people are individuals born with anatomy and physiology that differs from contemporary ideals of what constitutes 'normal' male and female. It is recognised that some intersex people may find the indeterminate category used by HESA for the previous field offensive. For data return purposes, institutions were able to ask staff about their gender using the intersex terminology and return any positive responses to HESA using the MIAP coding and terminology in 2011/12.

Staff who identified as intersex were excluded in any analysis of 2002/03 to 2011/12 data. This is because any statistics drawn from these small numbers would not give accurate information about the proportion of intersex people in the sector.

Advance HE recommends when monitoring sex to include categories of 'other' and 'prefer not to say' alongside male and female. This will allow anyone who associates with terms including intersex, androgyne, intergender, ambigender, gender fluid, polygender and genderqueer to complete the question.

Further information on monitoring sex and gender is published on our website.

www.advance-he.ac.uk/guidance/equality-diversity-and-inclusion/using-data-and-evidence/monitoring-questions

www.ecu.ac.uk/blogs/reporting-staff-data-sex-hesa-hmrc/

Gender reassignment

Gender reassignment is the legal term used in the Equality Act to describe the protected characteristic of anyone who "proposes to undergo, is undergoing or has undergone a process (or part of a process) for the purpose of reassigning the person's sex by changing physiological or other attributes of sex" (Equality Act, 2010).

In previous years this report has used the term gender identity. The term gender identity is different to gender reassignment and refers to a person's internal perception of their gender. Beginning with the 2012/13 staff record, institutions have the option of returning information to HESA on whether a person's gender identity is the same as originally assigned at birth. The possible field options are yes, no and information refused. The phrasing and options associated with this question refer to an individual's gender reassignment not gender identity. This information is recorded on the basis of the staff member's own self-assessment.

For further information on gender identity and gender reassignment, see our trans guidance

www.ecu.ac.uk/publications/trans-staff-and-students-in-he-and-colleges-improving-experiences/

For further information on monitoring sex and gender reassignment, see **www.advance-he.ac.uk/guidance/equality-diversity-and-inclusion/using-data-and-evidence/monitoring-questions**.

Impairment type

Impairment type is recorded within the HESA staff record on the basis of self-assessment using one of 11 possible categories:

- = non-disabled
- = blind or a serious visual impairment
- = deaf or serious hearing impairment
- = general learning disability
- = a long-standing illness or health condition
- = a mental health condition
- = a physical impairment or mobility issues
- = a social communication/autistic spectrum disorder
- = a specific learning difficulty
- = two or more disabilities, impairments or conditions
- = other type of disability, impairment or condition

The phrasing of this item does not use 'D/deaf' and as such does not distinguish between those who identify as audilogically deaf and those who are deaf and identify as part of a social and cultural community of deaf people. To remain true to the self-assessments provided by staff, this report retains the label 'deaf or serious hearing impairment'.

For further information on monitoring disability and impairment type, see www.advance-he.ac.uk/guidance/equality-diversity-and-inclusion/using-data-and-evidence/monitoring-questions

Religion and belief

Religion or belief refers to the full diversity of religious and belief affiliations within the UK, including non-religious and philosophical beliefs such as atheism, agnosticism and humanism.

Beginning with the 2012/13 staff record, institutions have the option of returning religion and belief data to HESA. This information is recorded on the basis of the staff member's own self-assessment.

The possible field options are: no religion; Buddhist; Christian (with further denominational options provided in Scotland and Northern Ireland); Hindu; Jewish; Muslim; Sikh; Spiritual; any other religion and belief; and prefer not to say/information refused. For the purposes of this report, all Christian denominational options have been aggregated into a single Christian category.

Sexual orientation

Sexual orientation is a person's romantic or sexual orientation towards people of the same sex, people of a different sex, or to both sexes. This relates to a person's feelings rather than their actions.

Beginning with the 2012/13 staff record, institutions have the option of returning sexual orientation data to HESA. The HESA sexual orientation field has the following possible options: bisexual, gay man, gay woman/lesbian, heterosexual, other, information refused. Advance HE has more recently recommended the inclusion of identities 'queer' and 'asexual'. This information is recorded on the basis of the staff member's own self-assessment.

For further information on monitoring sexual orientation, see www.advance-he.ac.uk/guidance/equality-diversity-and-inclusion/using-data-and-evidence/monitoring-questions.

Activity

Academic staff

Academic staff are defined as staff with at least one academic contract of employment and whose contract activity can be categorised as 'Managers, directors and senior officials', 'Professional occupations' or 'Associate professional and technical occupations' (defined by the 2010 Standard Occupational Classification (SOC) major groups 1, 2 or 3). This may therefore include vice chancellors and other senior academic managers, medical practitioners, dentists, veterinarians and other health care professionals whose contract of employment includes an academic function.

The academic employment function may be teaching, research, teaching and research or neither teaching nor research (where an academic professional has taken up a senior administrative responsibility but there is no change to the academic function in their contract of employment).

Prior to 2012/13

Academic staff were defined as those staff responsible for planning, directing and undertaking academic research and teaching within HEIs. This category may also include vice-chancellors, principals, and clinical and healthcare professionals who undertake teaching or research activities.

Professional and support staff

HESA now refers to these staff as 'non-academic staff', and defines them as staff who do not have an academic employment function. However, for the purposes of this report, these staff will continue to be referred to as 'professional and support staff'. This group includes managers, non-academic professionals, student welfare workers, administrators, maintenance staff, and cleaning staff. Prior to 2012/2013 these staff were referred to by HESA as 'professional and support staff'.

Country of institution

The allocation of an institution to a geographical region relates only to the administrative centre of that institution. There may be staff employed at institutions who are working in regions other than that of the administrative centre of the institution.

Although the Open University operates throughout the UK, its administrative centre is located in England, and it is counted as a wholly English institution.

Nationality

Nationality defines the country of legal nationality. Data is supplied to HESA in the form of country codes.

UK national staff are those whose country of legal nationality is the UK, including the Channel Islands and Isle of Man.

Non-UK national staff are those whose country of legal nationality is a country other than the UK.

Mode

Full-time staff are those whose contracts state that their mode of employment is full-time. This includes staff who work full-time for part of the year and term-time only staff who work full-time during the term. Part-time staff are those whose contracts state that their mode of employment is part-time.

Please note that the mode of employment is an attribute of the contract, not the person. Therefore, a person will be counted as wholly part-time even if they hold a number of part-time contracts that add up to one full-time equivalent (FTE). The FPE allocated to the full-time category will only reflect the people that hold a full-time contract. This is consistent with the treatment of other attributes of the contract.

Contract type

Permanent or open-ended contract staff

Those who were employed on a contract of employment that states the member of staff as permanent or on an open-ended contract. This includes term-time only staff who were employed on an open-ended contract.

Fixed-term contract staff

Fixed-term contract staff are those employed for a fixed period or who have an end date on their contract of employment. This includes staff on rolling fixed-term contracts.

Contract level

Contract level records the Universities and Colleges Employers Association (UCEA) or XpertHR defined level of the contract. Contract levels are used to define professors and senior management (see professorial status and senior management post holder). Please note that where data is split by contract levels, 'unknown' is included in the total but not separate breakdowns.

Head of institution: vice-chancellor (VC)/principal

The most senior manager within the institution (ie chief executive officer).

2: deputy/pro vice-chancellor (D/PVC), chief operating officer, registrar, university secretary

These roles are the highest level appointments reporting directly to the VC and will have primary responsibility for the organisation's performance and strategic development. They are responsible for a major part of the academic life of the university, and are differentiated from level 3 by having responsibility across the institution, or having an overseeing role over all/most of the internal professional/administrative services of the institution. They may have dean responsibilities for a specific faculty in addition to their D/PVC responsibilities, or may have responsibility for more than one functional area at a strategic rather than an operational level. Staff members in these roles are likely to deputise for the VC, and this level is likely to apply to a handful of positions in the institution.

3A: head/director of major academic area

These roles will be heads of major academic areas where a number of schools/departments/divisions are combined into a small number of larger groupings. These roles have significant management and resource responsibility and will be part of the university's senior management team (although staff with level 2 roles may meet separately as the ultimate executive decision-makers). There are likely to be a very small number of roles at this level in the institution, and these are likely to be deans/directors of faculty/heads of academic division.

**3B: director of major function/group of functions
eg finance, corporate services, human resources (HR)**

These roles have overall responsibility for matters across a major function or group of functions or defined activity. Staff members with these roles will be part of the university's senior management team (although staff with level 2 roles may meet separately as the ultimate executive decision-makers).

3/4A1: head of school/division/department/centre size 1

This level comprises of heads of a distinct area of academic responsibility, likely to be a school or department, and staff members at this level will have responsibility for all staff within the school/department (department size over 100 staff). Staff members at this level are unlikely to be on the senior management team, unless it is the first level of function head below the role of level 2.

3/4A2: head of school/division/department/centre size 2

This level contains heads of a distinct area of academic responsibility, likely to be a school or department, and staff members at this level will have responsibility for all staff within the school/department (department size 51-100 staff). Staff at this level are unlikely to be on the senior management team, unless it is the first level of function head below the role of level 2.

3/4A3: head of school/division/department/centre size 3

This level comprises heads of a distinct area of academic responsibility, likely to be a school or department, and staff members at this level will have responsibility for all staff within the school/department (department size under 50 staff). Staff members at this level are unlikely to be on the senior management team, unless it is the first level of function head below the role of level 2.

4A: head of a sub-set of academic area/directors of small centres

Staff members at this level will have responsibility for a subset of a division/department/school (eg a subject discipline group) or a research group, or cross school/department responsibility (eg director of research). This level may include professors who head departments/research centres.

4B: senior function head

Staff at this level will have full responsibility for a complete function or activity below the senior management team level, but will be part of the management team for the overall function.

5A: professor

These are senior academic appointments which may carry the title of professor but which do not have departmental line management responsibilities.

5B: function head

These roles have full managerial responsibility for one or more activities and input into policy formation for those activities. Staff at this level have responsibility for other staff within the area of activity.

Level I – non-academic staff section manager, senior lecturer (pre-92), principal lecturer (post-92), reader, principal research fellow

Staff members at this level are responsible for the day-to-day management of a significant professional service unit, activity, department or project, with specifically identified responsibilities. This level includes academic subject specialists, academic programme coordinators and/or academic staff with high level expertise/knowledge.

Level J – section/team leader (professional, technical, administrative), lecturer B (pre-92), senior lecturer (post-92), senior research fellow

Staff members at this level are responsible for the day-to-day management of a team of staff. Specialists with experience or seniority but limited management responsibility may be found at this level. In the case of academic staff there may be no responsibility for staff or budgets but substantial responsibility for students.

Level K – senior professional/technical staff, lecturer A (pre-92), lecturer (post-92), research fellow, researcher/ senior research assistant, teaching fellow

At this level staff operate at an experienced, professional level in a single area of work without supervision. They are likely to be responsible for less experienced staff at level L and below and may coordinate the activities of a team. In the case of academic staff there may be no responsibility for staff or budgets but significant responsibility for students.

Level L – professional/technical/senior administrative staff, research assistant, teaching assistant

Staff at this level operate as fully competent professionals within a single area of work with minimal supervision. This is a standard officer level. For academic jobs this is an assistant or instructor role. In some professional areas this would be the expected entry level.

Level M – assistant professional staff, administrative staff

This is typically an entry level professional, working under instruction from others within a defined area of work. Staff members at this level may be part-qualified in an appropriate professional discipline, and may supervise/assist/guide less experienced administrative staff. This level would not cover academic roles.

Level N – junior administrative staff, clerical staff, technician/craftsman, operative

Staff at this level are normally working under closer supervision than level M staff, but staff are still experienced in the specific areas of the job role. Staff members mainly have responsibility for performing a range of simple, routine tasks with basic procedures and under regular supervision. Individuals at this level may be a school leaver, trainee or modern apprentice. This level would not cover academic roles.

Level O – routine task provider

At this level staff carry out a range of simple tasks within a defined routine, and guidance is readily available or work is performed under regular supervision. Some planning and organising of individuals' own workload will typically be required at this level (largely around the timing and sequencing of assigned tasks to make sure deadlines are met).

Level P – simple task provider

Staff at this level carry out simple and/or repetitive tasks under close supervision, typically supporting students and staff often as part of a team engaged in the same tasks. These tasks and routines are generally simple and repetitive and are closely supervised.

For further information about contract levels, see www.hesa.ac.uk/collection/c15025/combined_levels.

Occupational group

The standard occupational classification (SOC) provides a national standard for categorising occupational information – it forms the basis of occupational classification in a variety of national surveys that collect statistical information such as the Labour force survey and New earnings survey. The use of SOC for classifying occupations within the HE sector therefore allows for the heterogeneity of occupations that exist and enables comparisons to be made with other sectors of the economy and from a variety of data sources.

HESA has used the SOC2010 variant of the SOC coding frame. This version maintains the same nine major groups used in previous versions of the SOC, but it is no longer possible to replicate the variant previously used by HESA for staff in the HE sector, which permitted staff to be grouped into thirteen broad occupational activities. In addition, the association of academic and non-academic activities solely with SOC major groups is no longer possible due to the incorporation of both types of activities at the sub-major level. Consequently, staff may be pursuing an academic or non-academic activity within a given SOC major group, whereas previously certain SOC groups were held to be entirely academic or non-academic in their own right.

The publication of staff activities by SOC major group may therefore now occur with or without reference to the academic nature of that activity, whereas previously this was implicit in the titles of the activities published. Care should be taken when comparing data across years.

Please note that staff with academic contracts can have a SOC major group other than 1–3. In this report, these contracts are included in the academic total and shown separately as ‘clerical and manual occupations’ in the tables where SOC activity groups are shown alongside academic contract marker.

Academic contract

Teaching-only staff

Teaching-only staff are those whose contract of employment states that they are employed only to undertake teaching.

Research-only staff

Research-only staff are those whose contract of employment states that their primary academic employment function is research only, even though the contract may include a limited number of teaching hours.

Teaching and research staff

Teaching and research staff are those whose contract of employment states that they are employed to undertake both teaching and research.

Neither teaching nor research staff

Staff whose contracted academic employment function is neither teaching nor research, eg vice-chancellor.

Academic subject area

The coding frame for cost centre was revised for the 2012/13 staff record and therefore academic subject area data from 2012/13 onwards is not comparable with previous years.

SET/non-SET

SET stands for science, engineering and technology.

SET departments

This report uses generic classification of academic departments from the HESA staff record.

SET departments in this report are:

- = agriculture, forestry and food science
- = anatomy and physiology
- = archaeology
- = architecture, built environment and planning
- = biosciences
- = chemical engineering
- = chemistry
- = civil engineering
- = clinical dentistry
- = clinical medicine
- = earth, marine and environmental sciences
- = electrical, electronic and computer engineering
- = general engineering
- = geography and environmental studies
- = IT, systems sciences and computer software engineering
- = mathematics
- = mechanical, aero and production engineering
- = mineral, metallurgy and materials engineering
- = nursing and allied health professions
- = pharmacy and pharmacology
- = physics
- = psychology and behavioural sciences
- = veterinary science

Non-SET departments

This report uses generic classification of academic departments from the HESA staff record.

Non-SET departments in this report are:

- = anthropology and development studies
- = area studies
- = art and design
- = business and management studies
- = catering and hospitality management
- = classics
- = continuing education
- = economics and econometrics
- = education
- = English language and literature
- = health and community studies

Professorial category

HESA uses data from the contract level field to derive information about staff members' professorial category. Staff holding a contract which aligns with the Universities and Colleges Employers Association (UCEA) contract level 5A (Professor) are considered to hold professorial status. This level indicates a senior academic appointment which may carry the title of professor but which does not have departmental line management responsibilities.

Senior management category

HESA uses data from the contract level field to derive information about whether a staff member is a senior manager. Senior management indicates a member of staff holding a contract at the levels of head of institution, 2A, 2B, 3A OR 3B.

Salaries

Salary is based on the contract salary for members of staff at each institution at 31 July in the reporting period, or the end date of the contract if earlier. Members of staff for whom the concept of a per annum contractual salary does not apply (eg staff paid hourly, staff with zero-hour contracts) have been excluded from salary analysis.

For part-time staff, all data relating to salary has been scaled to full-time equivalent to take into account pay differences between part-time and full-time staff.

Clinical academics have been included in all salary analysis.

This report presents salary information in two ways:

Salary range

- = under £30,000
- = £30,000 to £50,000
- = over £50,000

Academic pay spine range

- = contract salary < £18,412
- = contract salary ≥ £18,412 and < £24,565
- = contract salary ≥ £24,565 and < £32,958
- = contract salary ≥ £32,958 and < £45,562
- = contract salary ≥ £45,562 and < £59,400
- = contract salary ≥ £59,400

Contract salaries reported to HESA based on the framework salary spine or framework clinical spine, plus salaries not set against a nationally negotiated pay spine range, are included in this analysis. Where HESA is provided with both a salary point (within the framework pay spine range or framework clinical spine) and an enhanced salary figure (eg London weighting) the actual enhanced salary is used.

Median salary and median pay gap

If all salaries were ordered in a list, the median salary would be the middle salary.

The median pay gaps for disability, ethnicity and gender have been calculated as:

$$(\text{non-disabled median salary} - \text{disabled median salary}) \div \text{non-disabled median salary}$$

$$(\text{White median salary} - \text{BAME median salary}) \div \text{White median salary}$$

$$(\text{male median salary} - \text{female median salary}) \div \text{male median salary}$$

Mean salary and mean pay gap

The mean is equal to the sum of the values divided by the number of values. Mean salary is calculated by multiplying the contract salary by FPE and dividing by the sum of the FPE: $\text{sum (FPE} \times \text{salary)} \div \text{sum (FPE)}$

The mean pay gaps for disability, ethnicity and gender have been calculated as:

$$\frac{(\text{non-disabled mean salary} - \text{disabled mean salary})}{\text{non-disabled mean salary}}$$

$$\frac{(\text{White mean salary} - \text{BAME mean salary})}{\text{White mean salary}}$$

$$\frac{(\text{male mean salary} - \text{female mean salary})}{\text{male mean salary}}$$

HESA collects data on the destination of leavers to enable sector intelligence on cross-fertilisation between HE and other areas of employment and the migration of HE staff to and from the UK.

Destinations are presented as:

UK destination

- = another HEI in the UK
- = other education institution in the UK
- = research institution in the UK
- = student in the UK
- = NHS/general medical or dental practice in the UK
- = other public sector in the UK
- = private industry or commerce in the UK
- = self-employed in the UK
- = voluntary sector in the UK

Academic starters

Starters are academic members of staff who commenced their contract of employment on or after 1 December in the previous reporting period and before or on 1 December in the current reporting period.

Academic leavers

Leavers are academic members of staff for whom all contracts ended on or after 1 December in the previous reporting period and before or on 1 December in the current reporting period.

A staff member who retired prematurely and received a pension is regarded as a leaver and recorded as retiring, unless they are immediately re-employed in an institution's service. A member of staff whose contract ended but who immediately started another contract, and therefore did not leave the HEI, is not included as a staff leaver. Staff on multiple contracts where one of these contracts came to an end are also not included as a staff leaver if they were still employed in institutional service under one or more other contracts. All data on staff leavers excludes atypical staff.

Non-UK destination

- = HEI in an overseas country
- = other education institution in an overseas country
- = research institution overseas
- = student in an overseas country
- = health service in an overseas country
- = private industry or commerce in an overseas country
- = self-employed in an overseas country
- = voluntary sector in an overseas country

No longer in employment

- = no longer in regular employment
- = retired
- = deceased
- = not known/not applicable

Overview

Between 2003/04 and 2017/18 the number of staff employed by HEIs grew considerably. Notably, there has been one English institution added to the 2017/18 HESA staff records, which has increased the staff population by 147 members of staff. However, even without staff from this newly added institution there was a 2.3 percentage increase in the overall population of HE staff in 2017/18 compared with 2016/17.

Academic and professional and support staff showed similar percentage increases over the last year (2.5 and 2.2 percentage increases respectively), and professional and support staff continued to comprise a small majority of those employed by HEIs.

There were large differences in salaries earned by activity, with the majority of professional and support staff earning £30,000 or less, compared with fewer than one in ten academics. However, while similar proportions of academic staff and professional and support staff worked full-time, a considerably larger proportion of academic staff were on fixed-term contracts.

Around half of academic staff were on teaching and research contracts. Just under one in ten academics were professors, the majority of whom worked in SET. However, a considerable majority of academics that held senior management positions were from non-SET disciplines.

Leaving rates among academics were higher among non-UK staff than UK staff, and the most common leaving destination both within and outside the UK was another HEI.

0.1 Staff by country of institution: 82.3% of staff employed by HEIs worked in England. 11.3% worked in Scotland, 4.9% in Wales and 1.6% in Northern Ireland.

0.2 Trends: Between 2003/04 and 2017/18, the overall number of staff employed by UK HEIs increased by 27.0% from 338,105 to 429,560. This growth has largely been among academic staff, whose number increased by 41.1% from 2003/04 levels, compared with a growth of 15.8% among professional and support staff in the same time period. However, professional and support staff still comprised a small majority of staff employed by HEIs in 2017/18 (50.7%).

0.3–0.5 Contract mode and type: A majority of academic and professional and support staff worked full-time (66.4% and 68.5%, respectively). The majority of staff were also on open-ended/permanent contracts (76.1%). However, this proportion was significantly larger among professional and support staff (85.4%) than academic staff (66.5%). Among both academic staff and professional and support staff, a higher proportion of part-time staff were on fixed-term contracts (50.4% and 18.7%, respectively), than full-time staff (24.9% and 12.7%, respectively).

0.6 Staff nationality: The majority of academic and professional and support staff were UK nationals (79.5%). However, this proportion was significantly greater among professional and support staff (89.5%) than academic staff (69.2%). The majority of non-UK staff were EU nationals (12.1% of all staff compared to 8.4% who were non-EU nationals).

0.7 Contract level: 12.8% of academic staff were in senior contract levels (HOI-5B), compared with 2.8% of professional and support staff. Academic staff were most commonly employed in contract levels K (senior professional/technical staff, lecturer A, research fellow/researcher, senior research assistant or teaching fellow positions; 33.2%) and J (section/team leader, lecturer B, senior lecturer or senior research fellow positions; 25.9%). In contrast, professional and support staff were most commonly in contract levels M (assistant professional and administrative roles; 20.7%) and L (professional, technical and senior administrative staff, research/teaching assistant positions; 18.2%).

0.8 Occupational group: The vast majority of academic staff (99.1%) were in professional occupations (SOC2), while professional and support staff were most commonly in administrative and secretarial occupations (SOC4; 32.5%). Mode of employment varied considerably by occupational group. For example, among academic staff, the proportion who worked part-time varied from 18.3% of managers, directors and senior officials to 33.7% of those in professional occupations. Among professional and support staff, 12.2% of managers, directors and senior officials worked part-time, compared with 66.9% of those in elementary occupations.

0.9 Research/teaching contract: Nearly half of academic staff (47.2%) were on teaching and research contracts, and around a quarter were either on teaching-only contracts (28.8%) or research-only contracts (23.4%). 0.6% of academic staff were on contracts which involved neither teaching nor research.

0.10 SET: SET academic staff were concentrated in certain subject areas. For example, 21.2% of those working in SET were in clinical medicine, 12.3% were in biosciences, and 9.0% were in nursing and allied health professions. In comparison, relatively small proportions of academic staff worked in archaeology (0.7%), agriculture, forestry and food science (1.0%) or mineral, metallurgy & materials engineering (1.0%).

0.11 Non-SET: Non-SET academic staff also tended to be concentrated in certain subject areas. A large proportion worked in business and management studies (17.0%), art and design (10.3%) and education (9.7%). Less than one percent each worked in area studies (0.4%), catering and hospitality management (0.7%), classics (0.7%) and theology and religious studies (0.8%).

0.12 Professors: Overall, 9.9% of academic staff held professorial roles, of whom 60.9% worked in SET. The proportion of academics who were professors was higher among SET academics (10.8%) than non-SET academics (8.7%). This difference was seen particularly for part-time academic staff members (where 8.7% of SET and 4.5% of non-SET academics held professorial roles, compared with 11.6% of SET and 11.8% of non-SET full-time academics).

0.13 Senior managers: 0.6% of academic staff were in senior management roles, a majority of whom (68.5%) worked in non-SET subjects. A greater proportion of senior managers worked full-time than other academic staff (94.4% compared with 66.2%).

0.14 Salary range: More than three in ten academic staff earned over £50,000 (31.5%), compared with 7.6% of professional and support staff. The majority of full-time (50.7%) and part-time (73.8%) professional and support staff earned less than £30,000, compared with 4.0% of full-time and 16.1% of part-time academic staff.

0.15 Pay spine range: 53.9% of academic staff earned less than £44,992. 15.9% were on the highest pay spine, earning £60,411 or more, and just 0.2% were on the lowest pay spine, earning less than £18,777.

0.16 Leaving status: Overall, 17.7% of academic staff left their institution between 2016/17 and 2017/18. This rate was higher among non-UK nationals (21.8%) than UK nationals (16.0%).

0.17 Leaving destinations: Of leavers with a known leaving destination, around half entered UK-based employment (57.2% UK nationals and 51.1% non-UK nationals), with the most common destination being another HEI in the UK (28.5% of UK nationals and 26.7% of non-UK nationals). Approximately a quarter of non-UK leavers moved overseas for employment (25.3%), again with the most common destination being another HEI (13.7%). In comparison, just 3.8% of UK leavers moved to employment outside of the UK. 14.9% of UK leavers retired, compared with 1.8% of non-UK leavers. Nearly a quarter of UK leavers (23.1%) and non-UK leavers (21.3%) were not in regular employment.

Proportions of academic staff who left their institution between 2016/17 and 2017/18

Proportions of academic staff who left their institution between 2016/17 and 2017/18 by destination

Age

Professional and support staff had a younger age profile than academic staff. Among academics, those working in SET subjects had a younger profile than those in non-SET subject areas.

Staff at both ends of the age spectrum tended to be on different contracts than those in the middle age groups, with higher proportions in fixed-term roles for younger staff and higher proportions in part-time roles for older staff. With regards to academic staff, those in the youngest age groups tended to be on teaching-only or research-only contracts, while older staff tended to be on teaching-only or teaching and research contracts. The leaving rates for the youngest and oldest age groups were markedly higher compared with those of academic staff in the middle age groups.

The age categories presented in this section are calculated from staff ages at 31 August of the reporting year.

Additional detail for select tables in this section, such as by five-year age bands, is available at www.advance-he.ac.uk/knowledge-hub/statistical-report-2019-data-tables

1.1 Overall figures: Across the UK, the majority of staff employed by HEIs were between the ages of 31 and 55 (65.8%). Only 16.8% were aged 30 and under. However, the proportion of staff in this age group was higher in Scotland (18.1%), England (16.8%) and Wales (14.6%) than in Northern Ireland (11.1%).

1.2 Employment activity: Professional and support staff had a younger age profile than academic staff, with 19.8% aged 30 and under compared with 13.7% of academic staff. Full-time work was most prevalent among staff aged 31-35 (74.3%) and 26-30 (73.8%). After the age of 35, rates of full-time work declined as age increased. However, with the exception of staff aged 66 and over, the majority of staff in all age groups worked full-time.

1.3 Contract type: Across all age groups, the majority of professional and support staff were on open-ended/permanent contracts, ranging from 52.5% of those aged 25 and under to 93.7% of those aged 56-60. In contrast, academic staff aged 30 and under were most commonly on fixed-term contracts (83.1% of those aged 25 and under and 69.6% of those aged 26-30).

1.4-1.6 Occupational groups: There were marked differences among occupational groups in relation to staff age. For example, over a third of academic staff working as managers, directors and senior officials (SOC1) were aged 51-60 (40.4%) compared with 27.2% of those aged 41-50. Among professional and support staff, large proportions of staff aged 30 and under worked in administrative and secretarial occupations (SOC4; 40.3%) and associate professional and technical occupations (SOC3; 25.0%). Those aged 41 to 50 constituted the largest proportion of professional and support staff employed as managers, directors and senior officials (SOC1) (36.0%).

1.7 Research/teaching contract: Staff aged 35 and under tended to be more concentrated in research-only roles than older staff. For example, 62.7% of staff aged 51-55 were in teaching and research roles while 53.3% of staff aged 26-30 were in research-only roles. Staff at each end of the age spectrum tended to be in teaching-only roles, namely 47.1% of staff aged 66 and over and 63.0% of staff aged 25 and under, compared with less than one in four of those aged 31-45 (23.6%). For those aged 25 and under this is an increase of 5.5 percentage points from the proportion of staff on teaching-only contracts in 2016/17 (57.5%).

1.8 SET subject areas: The age profiles of academic staff varied by SET subject. Subjects with the highest proportions of staff aged 40 and under were chemistry (61.6%), mineral, metallurgy and materials engineering (60.3%), physics (59.7%) and chemical engineering (58.7%). In contrast, proportions of staff in this age group were the lowest for nursing and allied health professions (23.2%), agriculture, forestry and food science (36.8%), architecture, built environment and planning (37.2%) and clinical dentistry (37.8%).

1.9 Non-SET subject areas: Academic staff in non-SET subject areas tended to have an older age profile than those in SET, with 36.2% of non-SET academic staff over the age of 50 compared with 26.8% of SET academic staff. Again, for non-SET subjects the age profile of staff varied considerably by subject area. Subjects with the lowest proportions of staff aged 40 and under were education (20.4%) and social work and social policy (28.6%), while more than half of those working in sports science and leisure studies (57.9%), economics and econometrics (54.0%) and politics and international studies (54.2%) were in this age group.

1.10–1.11 Professorial status: Part-time professors were typically older than full-time professors: 55.4% of professors working part-time were over the age of 61, compared with 16.9% of those who worked full-time. The age profile of professors was similar for academic staff in SET and non-SET subject areas, with 32.5% of SET professors aged 50 and under compared with 32.9% of non-SET professors in this age group.

1.12–1.13 Senior managers: Academic senior managers had a markedly older age profile than other academic staff, with 77.5% of academic senior managers over the age of 50 compared with 30.7% of other academic staff in this age group. Academic senior managers who worked part-time tended to be older than those who worked full-time: 45.7% of part-time academic senior managers were aged 61 and over, compared with 17.5% of those who worked full-time. Again, the age profiles of academic senior managers who worked in SET compared with those who worked in non-SET subject areas were broadly similar.

1.14 Leavers: The largest proportion of academic staff leaving employment at their HEI between 2016/17 and 2017/18 was among staff aged 30 and under (33.0%) for both UK nationals (31.2%) and non-UK nationals (35.5%).

1.15 Leaving destinations of UK academics: Of UK academic leavers with a known leaving destination, approximately seven out of ten aged 50 and below entered UK employment (72.3%), with the most common destination being another HEI (35.5%), followed by the private sector (8.6%) and the NHS/medical or dental practice (7.6%). In contrast, only 44.5% of those aged 51–60 and 15.1% of those aged 61 and over entered UK employment, with the majority of these leavers no longer in employment (52.9% and 84.1%, respectively). Leavers aged 51–60 years were more likely to be in UK employment and less likely to no longer be in employment in 2017/18 compared with 2016/17 (2017/18 percentages were 44.5% and 52.9%, respectively; 2016/17 percentages were 39.8% and 57.5%, respectively). 63.1% of academic leavers who went into non-UK employment were aged 40 and under, with the majority of these leavers entering employment at an HEI overseas. However, compared with UK employment, non-UK employment among UK leavers was very low overall, ranging from 0.8% of those aged 61 and over to 6.2% of those aged 30 and under.

1.16 Leaving destinations of non-UK academics: Among non-UK academic leavers with a known leaving destination, more than half of those aged 50 and under left their HEI for employment in the UK (53.0%). Within every age group, leaving rates to non-UK employment were markedly higher for non-UK leavers than UK leavers, ranging from 8.6% of those aged 61 and over to 27.5% of those aged 31–40.

Proportions of Non-UK academic staff leavers by known leaving destination and age

Disability

Disability disclosure rates among staff working in HEIs have consistently increased in the last decade, with the proportion of staff declaring as disabled in 2017/18 more than double than reported in 2007/08. However, disability disclosure rates remained persistently lower among academic staff than professional and support staff and among professors compared with other academics.

A slightly higher proportion of full-time academic staff on open-ended/permanent contracts than on fixed-term contracts disclosed as disabled, while there was little difference in disclosure by contract type among full-time professional and support staff. In contrast, this was not the case for part-time staff, where larger proportions of staff disclosed as disabled on fixed-term contracts.

Fewer disabled than non-disabled staff earned more than £50,000 and there has been little change to the overall disability pay gaps reported in 2016/17. The proportion of academic leavers no longer in employment was considerably higher among disabled staff than non-disabled staff.

In this section, the term 'disabled staff' is used to refer to those who indicated that they are disabled on their HESA staff record. 'Non-disabled staff' is used to refer to those who indicated that they are not disabled, or whose disability status is unknown. This aligns with changes made to HESA reporting standards in 2012.

Additional detail for select tables in this section, such as by impairment type, is available at www.advance-he.ac.uk/knowledge-hub/statistical-report-2019-data-tables

2.1 Overall figures: Overall, 5.0% of staff working in HEIs disclosed as disabled in 2017/18. Disability disclosure rates were higher among staff working in Northern Ireland (6.3%) and Wales (5.7%) than in England (5.1%) and Scotland (3.7%).

2.2 Impairment type: Among both professional and support and academic disabled staff, the most commonly disclosed impairment types were a long-standing illness or health condition (25.2% and 23.2%, respectively) or a specific learning difficulty (20.2% and 23.4%, respectively). More than one in ten professional and support disabled staff (14.8%) and academic disabled staff (10.7%) had a mental health condition.

2.3 Trends: While the proportions of staff who disclosed as disabled have consistently been higher among professional and support staff than academic staff, disclosure rates for both groups have increased over time. 6.0% of professional and support staff and 4.3% of academic staff disclosed as disabled in 2017/18 – around double the proportions compared with 2007/08 (2.8% and 2.2%, respectively).

2.6–2.7 Mode and contract type: Disability disclosure rates were higher among full-time academic staff on open-ended/permanent contracts compared with fixed-term contracts (4.1% compared with 3.1%), while there was little difference between the disclosure rates of full-time professional and support staff by contract type (5.8% on open-ended/permanent contracts compared to 6.1% on fixed-term contracts). The reverse was the case for part-time staff: 5.5% of academic staff on fixed-term contracts disclosed as disabled compared with 4.8% on open-ended/permanent contracts, and 7.0% of professional and support staff on fixed-term contracts disclosed as disabled compared with 6.0% on open-ended/permanent contracts.

2.8–2.9 Contract levels: Overall, the proportion of staff who disclosed as disabled was higher among those in lower contract levels, and this pattern was generally more pronounced for professional and support staff compared with academic staff.

2.10 Occupational groups: Among academic staff, the disability disclosure rate was highest in the associate professional and technical occupational group (SOC3; 6.4%), while for professional and support staff the rate was highest among those in sales and customer service occupations (SOC7; 7.2%). In contrast, only 4.3% of academic staff in professional occupations (SOC2) and 4.5% of professional and support staff who were managers, directors and senior officials (SOC1) disclosed as disabled.

2.12 Research/teaching contract: 5.3% of academic staff on teaching only contracts disclosed as disabled, compared to 3.2% of those on research-only contracts. The disability disclosure rate among academic staff on teaching and research contracts was between the two, at 4.2%.

2.13–2.14 SET subject areas: Among disabled academic staff, a slightly higher proportion worked in non-SET departments (51.7%) than SET departments (48.3%). Overall, 3.7% of academic staff working in SET disclosed as disabled. Disability disclosure rates varied considerably by subject area. For example, 6.8% of academic staff in nursing and allied health professions disclosed as disabled compared with only 1.9% of academic staff working in chemical engineering.

2.15 Non-SET subject areas: Among academics working in non-SET departments, 5.0% disclosed as disabled. Disability disclosure rates were particularly high among academic staff working in health and community studies (8.3%) and social work and social policy (7.1%), and markedly lower among those working in economics and econometrics (2.0%), anthropology and development studies, and modern languages (both 3.2%).

2.16 Professors: Overall, a lower proportion of professors disclosed as disabled (3.2%) than non-professorial academic staff (4.4%). Disability disclosure rates of professors were lower among those working in SET (2.7%) than non-SET (4.1%). Among non-professors, part-time staff had a higher disability disclosure rate than full-time staff (5.3% compared with 3.9%). Similar proportions of full-time and part-time professors disclosed as disabled (3.2% and 3.3%, respectively).

2.17 Senior managers: A lower proportion of academic senior managers overall disclosed as disabled (2.9%) compared with other academics (5.1%). Disability disclosure rates were similar for both senior managers and other academics who worked part-time and those who worked full-time and for those who worked in SET and non-SET departments.

2.18 Salary range: The proportion of academics earning £50,000 or more was higher among non-disabled staff than disabled staff (31.7% compared with 26.7%, a difference of 5.0 percentage points). Among full-time academic staff, the gap was just 1.8 percentage points; it was wider among part-time academic staff at 6.4 percentage points. Similarly, among professional and support staff, the proportion of non-disabled staff earning £50,000 or more was higher than the proportion of disabled staff, though the gap was smaller than among academic staff (2.3%), as was the overall proportion of staff within this salary range.

2.19 Pay spine range: The same proportions of disabled and non-disabled academic staff were on the lowest academic pay spine of less than £18,777 (both 0.2%). However, there were proportionally fewer disabled than non-disabled academic staff on the highest academic pay spine of £60,411 or more (11.3% compared with 16.2%).

2.20–2.21 Pay gaps: The overall mean pay gap between non-disabled and disabled staff was 9.0%, and the median pay gap was 8.5%. This is similar to the pay gap in 2016/17, when the mean pay gap was 8.7% and the median pay gap 8.5%. Both mean and median pay gaps were wider for professional and support staff (5.7 and 5.1%, respectively) than academic staff (5.2 and 4.0%, respectively). Disability pay gaps varied considerably by country and region, being greatest in England, and being greater outside London compared to within London. Notably, both median and

mean disability pay gaps among academic staff were negative in Northern Ireland, while the same was true for the median disability pay gap in Scotland, meaning that disabled staff earned more than non-disabled staff on average. For academic staff, the widest median disability pay gap was among managers, directors and senior officials (13.2%). For professional and support staff, the widest median pay gap was among process, plant and machine operative (8.2%).

2.22 Academic pay gaps: Mean and median disability pay gaps were wider among non-professors than professors, at 4.3% and 4.5% among professors, and 7.2% and 8.0% among non-professors. However, these pay gaps varied greatly by country and region. In London, for example, the mean and median disability pay gaps among professors were 13.3% and 11.3%, respectively. In contrast, in Northern Ireland the mean and median disability pay gaps among professors were 0.6 and 0.0%, respectively.

2.23 Leavers: The proportions of academic staff who left their institution between 2016/17 and 2017/18 were similar across both disabled and non-disabled staff (18.0% and 17.7%, respectively).

2.24 Leaving destinations of UK academics:

Among UK leavers with a known leaving destination, the proportion of disabled leavers who went on to UK or non-UK employment (48.4% and 3.2%) was lower than the proportion of non-disabled leavers (57.7% and 3.8%). 48.5% of UK disabled leavers were no longer in employment, compared with 38.6% of non-disabled UK leavers.

2.25 Leaving destinations of non-UK academics:

Among non-UK leavers with a known leaving destination, 47.0% of those who disclosed as disabled entered UK employment, and another 13.7% left for employment overseas. The remaining 39.3% were no longer in employment, which was a larger proportion than that recorded for non-UK non-disabled leavers (23.4%).

Proportions of leavers who disclosed as disabled

Ethnicity

Staff working in HEIs have increasingly become more ethnically diverse, with an increase in Black, Asian and minority ethnic (BAME) staff most pronounced among academics. However, inequalities persist, with lower proportions of both UK and non-UK BAME staff than White staff on open-ended/permanent contracts, in senior management positions, and on higher salary bands. Proportions of BAME academic staff varied greatly between subject areas, with BAME staff comprising relatively high proportions of academics working in SET compared with non-SET. Leaving rates among BAME academics were also higher than for White academics.

In this section, non-White groups have been aggregated into a single BAME group. Where possible, additional detail by the ethnic categories used in the 2011 census in England and Wales is also presented. Data in this section has also been further disaggregated by UK and non-UK nationality. This is in recognition of the different experiences UK and non-UK White and BAME staff may have.

Additional detail for select tables in this section, such as by ethnic group or ethnicity, is available at: **www.advance-he.ac.uk/knowledge-hub/statistical-report-2019-data-tables**

3.1–3.2 Overall figures: Of those UK staff with known ethnicity, 9.8% identified as BAME. However, this proportion varied by country, ranging from 2.3% in Northern Ireland to 11.1% in England. The proportion of staff who identified as BAME was considerably higher among non-UK staff at 29.4%. Again, this proportion varied by country, ranging from 12.5% in Northern Ireland to 33.4% in Wales. Overall, ethnicity was not known for 5.4% of UK staff and 8.8% of non-UK staff.

Among both UK and non-UK staff, the largest BAME group was Asian, making up 42.9% of UK BAME staff and 36.1% of non-UK BAME staff. The smallest BAME group for UK staff was other, while for non-UK staff it was mixed.

3.3 Trends: Between 2003/04 and 2017/18, the proportion of all staff who were UK White steadily decreased (from 83.1% to 72.2%), while all other groups increased, most notably those from non-UK White backgrounds (from 8.3% to 14.1%). During this same period, the proportion of all staff who were UK BAME increased from 4.8% to 7.9%, and the proportion of non-UK BAME staff from 3.8% to 5.9%. The increase in staff who were UK BAME between 2003/4 and 2017/18 was more pronounced among professional and support staff (from 4.8% to 8.8%; 4.0 percentage points) compared with academic staff (from 4.8% to 6.9%; 2.1 percentage points). The reverse was the case for non-UK BAME staff: between 2003/04 and 2017/18, the increase in proportions of non-UK BAME professional and support staff was smaller (from 2.4% to 3.0%; 0.6 percentage points) compared with academic staff (from 5.6% to 8.9%; 3.3 percentage points).

3.5 Contract type: Among both UK and non-UK academic staff, a higher proportion of BAME staff were on fixed-term contracts (31.5% and 50.5%, respectively) than White staff (27.8% and 38.7%, respectively). This was also the case for professional and support staff, though the difference in contract type between White and BAME staff was less pronounced among non-UK staff, where 25.1% of non-UK BAME staff were on fixed-term contracts compared with 22.6% of non-UK White staff.

3.8 Contract level: UK BAME staff were underrepresented in the highest contract levels and overrepresented in the lowest. Just 3.2% of UCEA level 2 staff were BAME (the second highest contract level), compared with 13.3% of simple task providers (the lowest contract level). This was also the case among non-UK staff, although the proportion who were BAME at each level was higher than among UK staff. However, among UK staff, some progress was seen at the highest contract level (heads of institutions), with an increase in BAME representation from 0.8% in 2016/17 to 3.1% in 2017/18.

3.11 Occupational group: Among UK academic staff, BAME staff comprised 10.0% of those in professional occupations (SOC2) compared with just 4.5% of those who worked as managers, directors and senior officials (SOC1). This gap was wider among non-UK academics, of whom BAME staff comprised 29.6% of those in SOC2 compared with 18.9% in SOC1.

Among UK professional and support staff, BAME staff comprised 14.4% of those in sales and customer service occupations (SOC7) compared with 6.4% of those who worked as managers, directors and senior officials (SOC1). Non-UK BAME staff were similarly underrepresented in SOC1 (13.8%) and the occupational group with the highest representation of BAME staff was SOC9 (elementary occupations), of which 47.5% were BAME.

3.14 Research/teaching contracts: A higher proportion of both UK and non-UK BAME staff were on research-only contracts (21.3% and 42.0%, respectively) than White staff (16.8% and 33.6%, respectively). In contrast, higher proportions of White staff were on teaching and research contracts than BAME staff. This was particularly pronounced among non-UK academics, with 45.9% of White staff on teaching and research contracts compared with 36.5% of BAME staff. Similar proportions of both UK and non-UK BAME and White staff were on teaching-only contracts.

3.15, 3.16, 3.18 SET subject areas: Overall, 52.3% of UK White academics and 60.3% of UK BAME academics worked in SET subjects in 2017/18. Subject areas with the highest proportions of UK BAME staff were clinical dentistry (22.0%), chemical engineering (20.4%) and electrical, electronic and computer engineering (19.1%). In contrast, just 0.8% of those who worked in archaeology and 3.9% of those who worked in earth, marine and environmental sciences were BAME.

32.0% of non-UK BAME academics worked in SET subject areas in 2017/18. Similar variations in representation of BAME academics by subjects were observed as those among UK staff. For instance, BAME staff comprised more than half of non-UK academics working in electrical, electronic and computer engineering (53.3%), but only 10.6% of those working in archaeology.

3.17, 3.19 Non-SET subject areas: Overall, just 8.4% of UK academics who worked in non-SET subjects were BAME. The individual subject areas with the highest proportions of UK BAME academics were economics and econometrics (15.4%) and business and management studies (15.2%). In contrast, just 2.8% of those working in classics and 3.3% of those working in sports science and leisure studies were BAME. 25.8% of non-UK BAME academics worked in non-SET subject areas, and similar to SET, there remained clear variations by individual subjects: BAME staff comprised 42.0% of non-UK academics who worked in business and management studies, but just 8.0% of those who worked in classics.

3.20 Professors: Among UK academics, there was a small difference between the proportions of White and BAME staff who were professors (11.1% and 9.7% respectively, giving a difference of 1.4 percentage points). However, there were notable differences within BAME groups: for example, 16.3% of UK Chinese academics were professors compared with just 4.7% of UK Black academics. The gap in professorial status between non-UK White and non-UK BAME academics was wider, 9.0% of White academics were professors compared with 3.6% of BAME academics. This proportion was again particularly low among non-UK Black academics (1.8%).

3.23 Senior managers: The proportion of UK White academics that were senior managers (0.8%) was more than double that of UK BAME academics (0.3%). A similar

pattern was observed for non-UK academics, where 0.2% of non-UK White academics were senior managers compared with 0.1% non-UK BAME academics.

3.28 Pay spine range: A larger proportion of White academic staff were on the highest pay spine of £60,411 or more compared to BAME staff. The difference was most pronounced among non-UK academics, with 14.1% of White staff on this pay spine compared with 5.9% of BAME staff. Whereas among UK academics, the gap was small (18.0% of White staff were on this pay spine compared with 17.0% of BAME staff).

3.30–3.31 Median/mean pay gaps: Overall, the median and mean pay gap between UK White and UK BAME staff stood at 0.7% and 2.0%, respectively. The median and mean ethnicity pay gaps were wider among non-UK staff, at 8.5% and 12.5%, respectively. The ethnicity pay gaps were particularly pronounced between BAME and White non-UK professional and support staff (14.0% median pay gap and 12.7% mean pay gap) compared with UK professional and support staff (-0.2% median pay gap and 2.9% mean pay gap).

Notably, median and mean ethnicity pay gaps among UK staff were largest in England (3.8% and 3.6%, respectively), and especially in London (13.6% and 14.7%, respectively). In the other countries, all ethnicity pay gaps were negative, meaning that UK BAME staff were on average paid more than UK White staff. This was not the case among non-UK staff, where median and mean ethnicity pay gaps varied less across the different countries and none were negative.

3.34 Leavers: Among both UK and non-UK leavers, a higher proportion of BAME academics left their institution between 2016/17 and 2017/18 than White staff. 17.5% of UK BAME and 23.6% of non-UK BAME academics left in this period, compared with 15.0% of UK White and 20.2% of non-UK White academics.

3.35–3.36 Leaving destinations: Among UK academic leavers with a known leaving destination, a higher proportion of BAME leavers went into UK employment than White leavers (67.8% compared with 54.1%). This was also the case among non-UK academic leavers, though the difference was smaller (52.2% of BAME leavers compared with 49.1% of White leavers).

**Non-UK employment****No longer in employment****All destinations**

Gender

Despite comprising the majority of staff working in UK HEIs, women remained underrepresented among academic staff, staff in SET subject areas and in senior management roles. A larger proportion of women than men worked in professional and support roles, worked part-time, on fixed-term contracts, and in lower salary bands. Gender pay gaps remain highest among academic staff, though were still evident among professional and support staff. The proportion of female academic leavers was higher than the proportion of male academic leavers.

In 2017/18, HESA replaced the legal sex field with the sexual identification field and presented three options, 'male', 'female' and 'other'. For the purposes of this report, data from the sex field is referred to as 'gender' and staff who identified as 'other' are excluded from analysis.

Additional detail for select tables in this section, such as by subject area, academic starters and leavers, is available at:

www.advance-he.ac.uk/knowledge-hub/statistical-report-2019-data-tables

4.1 Overall figures: In 2017/18, 54.4% of staff working in UK HEIs were women and 45.6% were men. Proportions of men and women were similar across the countries of the UK.

4.2 Trends: Between 2003/04 and 2017/18, the proportion of female staff working in UK HEIs increased from 52.4% to 54.4%. Over the same period, the proportion of male staff decreased from 47.6% to 45.6%.

The proportion of female academic staff has increased from 40.0% in 2003/04 to 45.9% in 2017/18. In contrast, the proportion of female professional and support staff has remained relatively constant from 62.2% in 2003/04 to 62.7% in 2017/18.

4.3 Mode: 76.6% of male staff worked full-time compared to 59.7% of female staff. Among both academic and professional and support staff, the majority of staff on part-time contracts were women (55.3% of academic staff and 79.7% of professional and support staff).

4.4–4.6 Contract type: Among professional and support staff, roughly the same proportions of women and men were on open-ended/permanent contracts (84.9% and 86.2%, respectively). There was slightly greater disparity among academic staff on open-ended/permanent contracts (64.4% of women and 68.3% of men).

40.2% of academic staff on full-time, open-ended contracts were women, while 59.8% were men. Among academic staff on part-time contracts, a higher proportion of women compared to men had an open-ended/permanent contract (51.2% and 47.7%, respectively).

81.7% of part-time professional and support staff on open-ended/permanent contracts were women, 18.3% were men.

4.7–4.8 Contract level: In general, as the seniority of contract levels increased, the proportion of female staff decreased. For example, 25.9% of heads of institutions were women compared with 68.7% of assistant professional or administrative staff (XpertHR level M).

For both academic and professional and support staff, women were underrepresented in senior positions. For example, at the head of institutions contract level, 73.5% of academic staff and 76.0% of professional and support staff were men. Among professional and support staff, women were overrepresented in junior positions, such as at XpertHR Level M where they constituted 70.1% of staff.

4.9–4.10 Staff by activity, occupational group and gender: 56.5% of academic managers, directors and senior officials were men compared to 43.5% women. In contrast, 54.5% of professional and support staff managers, directors and senior officials were women. Among professional and support staff there was a clear gender divide in many occupational groups, such as administrative and secretarial occupations (79.9% women) and skilled trades occupations (78.5% men).

Within each occupational group, the majority of professional and support staff on part-time contracts were women except among SOC8 staff (process, plant and machine operatives).

4.11 Research/teaching contract: While the majority of both male and female academics held teaching and research contracts, proportionally more men held these contracts than women (51.1% of men, compared with 42.6% of women). More women had teaching only contracts (32.7%, compared with 25.5% of men).

4.12–4.13 SET subject areas: A gender divide was present between SET and non-SET subjects: more male academics were employed in SET subjects (59.2%) than non-SET subjects (40.8%). In contrast, the proportions of female academic staff in SET (51.0%) and non-SET (49.0%) subject areas were more balanced.

Overall, 57.8% of SET academic staff were men. Subject areas with notably high proportions included electrical, electronic and computer engineering (84.8% male staff) and mechanical, aero and production engineering (83.6% male staff). SET subject areas with notably high proportions of female academic staff were nursing and allied health professions (74.8% female staff) and psychology and behavioural sciences (62.0% female staff).

4.14 Non-SET subject areas: Non-SET subjects had a roughly equal distribution of female and male academic staff (50.4% and 49.6%, respectively). However, within some subject areas a gender divide was present, such as education (67.7% women) and philosophy (70.2% men).

4.15 Professors: 74.5% of professors were men. The proportion of male professors was greater than the proportion of female professors, regardless of whether they were SET or non-SET, or part- versus full-time. There was a higher proportion of male professors in SET subjects (78.7%) than non-SET subjects (67.9%).

4.16 Senior managers: Men made up a majority of senior managers (68.7%). This was most evident among SET subjects where men accounted for 72.4% of senior managers compared to 67.0% in non-SET subjects.

4.17–4.18 Salary and pay spine range: Among academic staff, 24.8% of women earned over £50,000 compared with 37.2% of men. This difference was also present among professional and support staff, where 6.0% of women earned over £50,000 compared with 10.2% of men. Among those on the highest pay spine range (\geq £60,411), 70.1% were men. The proportion of female staff on the highest pay spine range was half that of male staff (10.4% of women, 20.7% of men).

4.19–4.20 Pay gap by activity and occupational group: Overall, the median gender pay gap was 13.7% and the mean pay gap was 16.7%. The pay gap was most notable in Scotland, with a median gender pay gap of 18.6% and mean gender pay gap of 17.8%. Both the median and mean pay gaps were wider among academic staff than professional and support staff.

Among academic staff, the gender pay gap was greatest for managers, directors and senior officials (17.3 % median pay gap and 19.1% mean pay gap). The largest gender pay gap for professional and support staff was in skilled trades occupations (22.7% median pay gap and 14.0% mean pay gap).

4.21 Academic pay gap: The median and mean gender pay gaps for UK professors were 5.9 and 6.4%, respectively. The gender pay gap was widest among professors in Northern Ireland (a median pay gap of 11.5% and mean pay gap of 7.8%). Across the UK, the gender pay gap was higher among non-professors (an overall median pay gap of 11.1% and a mean pay gap of 11.8%).

4.22 Academic staff by leaving status and gender: A higher proportion of female academic staff left their position than men (18.8% and 16.9%, respectively). There was a 5.9 percentage point difference between non-UK national male leavers and UK national males, and a 5.7 percentage point difference between non-UK national female leavers and UK national females.

4.23 UK academic staff leavers by known leaving destination and gender: Among UK academic leavers with a known destination, there was a greater proportion of women in UK employment (59.9%) compared with men (54.6%). In contrast, the proportion of male academic leavers in non-UK employment was greater than the proportion of female academic leavers (4.8% and 2.7%, respectively). There were more men (40.6%) no longer in regular employment than women (37.4%).

4.24 Non-UK academic staff leavers by known leaving destination and gender: 53.7% of non-UK female leavers remained in UK employment, compared with 49.0% of non-UK male leavers. In contrast, the majority of non-UK academic leavers in non-UK employment were men (63.6%, compared with 36.4% women). 26.0% of non-UK female academic leavers were not in regular employment, compared with 21.6% of men.

Proportions of leavers who were women

Intersectionality

Intersectionality means recognising that people's identities and social positions are shaped by multiple factors, which create unique experiences and perspectives. A person is not, for example, a woman on one hand and disabled on the other; rather they are the combination of these at the same time (ie a disabled woman).

Intersectionality is increasingly a topic of consideration for equality and diversity practitioners. Apart from general growing interest in this area, this trend is also driven by institutional and procedural requirements, such as the Athena SWAN charter principle on intersectionality, the inclusion of intersectionality in the Race Equality Charter principles and the addition of requirements on intersectionality to outcome agreements in Scotland.

Tables to explore how people's identities relate to their median and mean pay present information in two ways. For example, in Table 5.11, reading down the female column shows the pay discrepancy between BAME and White female staff, while reading across the BAME row shows the pay gap between BAME female and male staff.

Advance HE has produced a research and data briefing on *Intersectional approaches to equality research and data* that can be downloaded here: www.ecu.ac.uk/publications/intersectional-approaches-to-equality-research-and-data/.

5.1 Age and disability status: Disability disclosure rates were highest among staff in the 25 and under age group (6.4%) and the 56–60 age group (5.8%), and lowest among those aged 31–35 and 36–40 (both 4.6%).

5.2 Age and ethnicity: Overall, BAME staff have a younger age profile than White staff. 57.2% of BAME staff were aged 40 and under, compared with 42.7% of White staff. This is also true among both UK and non-UK staff, although non-UK staff had a younger profile in general; 48.0% of UK BAME staff were aged 40 and under compared with 39.3% of UK White staff, and 69.5% of non-UK BAME staff were aged 40 and under compared with 60.3% of non-UK White staff.

5.3 Age and gender: Across both academic and professional and support staff, women made up the majority of staff in all age groups aside from those aged 61–65 and 66 and over. Among academic staff, men comprised the majority within every age group. In general, the proportion of male academics increased with age, rising from 50.8% of academics aged 25 and under to 71.0% of those aged 66 and over. In contrast, women comprised the majority of professional and support staff within every age group, making up over 60% of all age groups except for those aged 61–65 and 66 and over.

5.4 Ethnicity and disability status: Disability disclosure rates were lower among non-UK nationals than UK nationals (2.4% and 6.0%, respectively). There were similar gaps in disclosure rates between UK and non-UK White staff (6.1% and 2.6%, respectively) and between UK and non-UK BAME staff (4.9% and 1.7%, respectively). However, the proportion of staff disclosing as disabled varied considerably by ethnic group. For both UK and non-UK staff, disability disclosure rates were highest among mixed race staff (7.2% of UK and 3.4% of non-UK nationals) and lowest among Chinese staff (1.8% and 0.7%, respectively).

5.5 Disability status and gender: Overall disability disclosure rates were higher among women than men (5.5% and 4.7%, respectively). However, disclosure rates by women

and men varied by impairment type; more than three out of five disabled staff disclosing a mental health condition (63.2%), a physical impairment/mobility issues (61.2%) or a long standing illness or health condition (60.8%) were women. In comparison, 63.6% of those disclosing a social communication/autistic spectrum disorder were men.

5.6 Ethnicity and gender: A higher proportion of male staff were from BAME backgrounds than female staff (14.7% compared with 12.9% of female staff). Non-UK staff were more ethnically diverse than UK national staff (29.4% of non-UK national staff were BAME, compared with 9.8% of UK national staff). This was more pronounced among non-UK men than women (33.1% of non-UK men were BAME compared with 25.9% of women). This was not the case among UK nationals, where the proportions of staff from BAME backgrounds were similar for men and women (9.7% and 9.9% respectively).

5.7 Academic roles by ethnicity and gender: For both White and BAME staff, gender imbalances were more pronounced among professors than other academics. For example, 66.3% of professors were White men, and 23.6% White women. In comparison, 42.3% of non-professorial academics were White men and 41.2% were White women. Similarly, 7.7% of professors were BAME men, compared to just 2.3% BAME women.

BAME/White identity also differed between UK and non-UK national professors, with a greater gender disparity present between non-UK BAME nationals. 6.7% of UK national professors were BAME male, 2.1% were BAME female. In contrast, 11.3% of non-UK national professors were BAME male, 3.0% were BAME female.

5.8 Senior managers by ethnicity and gender: The large majority of UK national academic senior managers were from a White background (65.8% White male, 29.8% White female) with just 1.3% being BAME female and 3.0% BAME male. Among non-UK national academic senior managers, 10.4% were BAME male and 4.2% BAME female.

5.9 Academic roles by gender and ethnicity: The largest proportion of BAME female professors was among Asian academics (3.2% compared with 0.7% of Black academics and 2.0%, 1.6% and 1.4% of academics from Chinese, mixed and other ethnic backgrounds, respectively). This was true for both UK and non-UK nationals.

5.10 Senior managers by gender and ethnicity: The lack of BAME representation among academic senior managers identified in Table 5.8 was present across each of the BAME ethnic groups for both men and women, though representation was relatively highest for men from an other ethnic background (2.2%).

5.11–5.13 Median/mean pay gaps by ethnicity, gender and disability status: Median and mean gender pay gaps were present among both BAME staff (11.1% and 14.2%, respectively) and White staff (13.7% and 17.1%, respectively), though these pay gaps were larger among White staff. There were also gaps between the median and mean salaries of BAME and White men (2.9% and 6.7%, respectively), which were both considerably larger than the gaps between the median and mean salaries of BAME and White women (0.0% and 3.5%, respectively).

Median and mean gender pay gaps were larger among non-disabled staff (13.7% and 16.9%, respectively) than among staff disclosing a disability (8.4% and 9.3%, respectively). Median and mean disability pay gaps were present among both female (2.9% and 4.6%, respectively) and male staff (8.5% and 12.6%, respectively), albeit considerably larger among men.

Median and mean disability pay gaps were larger among White staff (8.5% and 9.7%, respectively) than among BAME staff (5.7% and 5.9%, respectively). The gap between the median and mean salaries of BAME and White non-disabled staff (2.9% and 4.9%, respectively) was higher than the gap between the median and mean salaries of BAME and White disabled staff (0.0% and 0.9%, respectively).

Additional protected characteristics

The Equality Act 2010 extended the number of protected characteristics to cover additional areas including gender reassignment, religion and belief (or none), and sexual orientation. Changes to the HESA staff record for 2012/13 allowed institutions to return this information on an optional basis. This section presents high-level findings on collection and monitoring rates. Because data is currently voluntary to return, we do not yet have a national demographic picture of the HE staff population in relation to gender reassignment, religion and belief, or sexual orientation.

Advance HE encourages institutions to collect and return this data where appropriate. We have added a series of tables to this section taking an intersectional approach to provide an overview of how gender reassignment, religion and belief, and sexual orientation intersect with staff age, disability status, ethnicity and gender.

Advance HE hopes to provide further detail on these characteristics in future reports as the number of institutions returning this data steadily increases and data becomes more representative.

Further guidance can be found at:

About this data

Data on a staff record is said to be returned if the institution provided any information to HESA about gender reassignment, religion and belief, or sexual orientation. This includes where a staff member selected 'prefer not to say' or refused to provide information about the characteristic in question. Where a staff record was returned to HESA without data, this section reports it as blank. It is not possible to determine from the data presented whether the blank staff records were due to the question being unanswered or unasked.

6.1 Overall figures: Overall, the number of institutions returning information on gender reassignment, religion and belief, and sexual orientation were similar to the proportions reported in 2016/17. For instance, 75.8% of institutions returned data on religion and belief and 77.6% on sexual orientation in 2017/18, compared with 75.6% and 77.4%, respectively, in 2016/17.

The proportion of institutions returning information on gender reassignment remained relatively lower, at 59.4% (98 out of 165) in 2017/18, a slight decrease of 4.6 percentage points from 64.0% in 2016/17.

6.1 Institutional returns by country: Of the four countries, Wales had the highest proportion of institutions returning data on the additional protected characteristics, with eight in nine returning information on gender reassignment, religion and belief, and sexual orientation to HESA in 2017/18. Return rates were lower for the four institutions in Northern Ireland (25.0% for gender reassignment, and 50.0% for both religion and belief, and sexual orientation). A higher proportion of English institutions also returned data on religion and belief (76.1%) and sexual orientation (78.4%) than Scottish institutions (72.2% for both characteristics). However, the opposite was true of gender reassignment, with 66.7% of Scottish institutions returning this information to HESA compared with 57.5% of English institutions.

6.2 Institutional return rates: Of the institutions that returned information to HESA, more than half had done so for 70% or more of their staff for religion and belief, and sexual orientation (58.4% and 53.1%, respectively). These rates represent slight increases from 2016/17 return rates (54.0% for religion and belief and 51.2% for sexual orientation).

However, rates were lower for gender reassignment, with only 40.8% of the institutions that returned information to HESA having a return rate of 70% or more for this characteristic. This represents a decrease from the 2016/17 equivalent return rate of 54.3%.

6.3, 6.4 Gender reassignment disclosure rates: Of the staff in institutions that returned gender reassignment information to HESA, 49.0% provided information, 5.1% refused to provide information, and for 45.9% the data field was blank.

Overall, gender reassignment information was unknown for 71.1% of all staff working in HEIs. This proportion has shown an increase of 4.6 percentage points from 2016/17 levels (66.5%).

6.3, 6.5 Religion and belief disclosure rates: Of the staff in institutions that returned religion and belief information to HESA, 54.2% provided information, 12.2% refused to provide information, and for 33.5% the data field was blank.

Overall, religion and belief information, including 'information refused', was returned to HESA for 53.0% of all staff working in HEIs – an increase of 3.3 percentage points from 2016/17 (49.7%).

6.3, 6.6 Sexual orientation disclosure rates: Of the staff in institutions that returned sexual orientation information to HESA, 52.1% provided information, 12.4% refused to provide information, and for 35.5% the data field was blank. However, the proportion of all staff for which sexual orientation data was known increased by 2.7 percentage points to 52.2% in 2017/18 from 49.5% in 2016/17.

6.7–6.10 Intersection between gender reassignment and staff age, disability status, BAME/White identity and gender: The proportion of all staff for which gender reassignment data was unknown (blank) was comparable across BAME and White staff, and female and male staff. In contrast, the proportion of all staff for which data on gender reassignment was unknown increased across age groups, from 66.1% for staff aged 30 and under to 76.5% for staff aged 61 and over. There was also a small gap between the proportion of unknown data for disabled and non-disabled staff (65.8% and 71.3%, respectively).

The proportions of staff who refused to provide information on gender reassignment showed only small differences between age groups, and across staff who were disabled or non-disabled, identifying as BAME or White, or male or female. Rates of staff indicating that their gender identity differed from that assigned at birth showed little differences across age groups, disability status, BAME/White identity, or gender.

6.11–6.14 Intersection between religion and belief and staff age, disability status, BAME/White identity and gender: While information on religion and belief was unknown (blank) for approximately half of all staff, there was a marked difference between the proportion of staff for which this data were unknown among those aged 30 and under (37.2%) and those aged 61 and over (55.5%), and for disabled and non-disabled staff (35.2% and 47.6%, respectively). Similar proportions of staff refused to provide information on religion and belief across each characteristic (ranging from 8.0% among BAME staff to 11.1% of those aged 61 and over). Roughly a third of staff aged 30 and under indicated that they did not follow a religion or belief system (33.2%) compared with roughly one in ten among staff aged 61 and over (11.7%). Just under one quarter of White staff did not follow a religion or belief system (23.5%), compared to only 15.1% of BAME staff.

6.15–6.18 Intersection between sexual orientation and staff age, disability status, BAME/White identity and gender: The proportion of staff with unknown (blank) information on sexual orientation was larger for staff aged 61 and over (57.0%) than for staff aged 30 and under (37.5%). There was a similar gap between disabled and non-disabled staff, with information on sexual orientation being unknown for a larger proportion of non-disabled staff (48.4%) than disabled staff (36.7%). In contrast, the proportions of staff for which sexual orientation data were unknown were similar across BAME/White identity and gender. Across each of the characteristics, approximately one in ten staff members refused to provide information on sexual orientation. Rates of staff indicating they were bisexual, a gay man, or a gay woman/lesbian were highest among younger staff (4.0% for those aged 30 and under compared to 0.7% of those aged 61 and over) and for those who had disclosed a disability (6.1% compared to 2.1% of non-disabled staff).

6.1

Institutional returns for gender reassignment, religion and belief and sexual orientation information by country of institution

Advance HE enables excellence in higher education, helping it shape its future.

Within the UK and globally, Advance HE supports institutions in the areas of excellence in education, transformative leadership, equity and inclusion and effective governance. This is delivered through membership benefits (including accreditation of teaching, equality charters, research, knowledge and resources), programmes and events, Fellowships, awards, consultancy and enhancement services and student surveys.

Advance HE is a company limited by guarantee registered in England and Wales no. 04931031. Registered as a charity in England and Wales no. 1101607. Registered as a charity in Scotland no. SC043946. The Advance HE logo should not be used without our permission.
