

The Board's role in wellbeing as a strategic imperative

This interactive workshop took place on **Thursday 5 May 2022** as part of the Connect Benefit Series – Inclusive institutions: enabling and supporting culture change. Participants had the opportunity to discuss how organisational wellbeing should be positioned in overall strategy and explored the key question, 'Have we managed to create healthier and more compassionate institutions as a result of the pandemic and has that had a positive impact on an inclusive and enabling culture?' [Watch the recording of the two provocations during the event here.](#)
