

# Coiled Tubing GS Pulling Tool

HEAVY DUTY DESIGN

STANDARD GS PROFILE

LARGE RANGE OF SIZES

## Description

The Coiled Tubing DTI GS Pulling Tool is a hydraulic release action tool used for running or retrieving downhole tools with standard size internal fishing necks.

The Coiled Tubing DTI GS Pulling Tool has a collet dog arranged over a central core providing 360 degree shoulder engagement to the fishing neck, so maximizing the bearing load capability.

Release is achieved by increasing Coiled Tubing flow/pressure to operate a piston which disengages the core from the collet dog.

The Coiled Tubing DTI GS Pulling Tool is available in sizes covering most standard internal fishing neck diameters.

## Features & Benefits

- Engages standard size fish necks.
- Flow activated release.
- Collet dog ring gives close to 360° engagement to maximise bearing load capacity
- Customised bell guide skirts are available.
- Thread in core for choke and probes/prongs.
- Slimline versions available.
