

Acetone

Description

Acetone is a clear, colourless, flammable, volatile liquid. It readily mixes with most organic solvents and is completely miscible in water. However, compatibility should be checked prior to mixing with other solvents or materials.

Applications

Acetone is an excellent solvent for use on many plastics and some synthetic fibres. It is used for thinning polyester resin, cleaning tools used with it, and dissolving two-part epoxies and superglue before they harden. It is used as one of the volatile components of some paints and varnishes.

Environmental

Dispose of chemicals in accordance with local environmental legislation Local environment registrations.

Handling

Normal precautions should be taken for handling chemicals. Protective clothing, eye protection and gloves should be worn. For further, details please refer to the safety data sheet.

Properties

Appearance: Colourless liquid
Density: 0.7845 g/cm
Flash point: -17°C Closed cup

Shelf Life

Storage: 24 months

Available in the following containers
