

AGR-15

Acid Gas Remover

Description

AGR-15 is an amine-based product for removing acid gases such as CO₂ and H₂S from gas streams. The amine reacts with the acid gases to form water soluble salts. AGR-15 is based on activated methyldiethanolamine.

Application

AGR-15 is used as part of the scrubber system, ideally suited to low pressure gas streams. Regeneration of the solvent can be done in a stripper unit prior to reuse in the scrubbing unit.

Directions

Use in accordance with equipment manufacturing guidelines and standard operating procedures.

Environmental

Dispose of chemicals in accordance with local environmental legislation

Handling

Normal precautions should be taken for handling chemicals. Protective clothing, eye protection and gloves should be worn. For further details please refer to the safety data sheet.

Properties

- Appearance: Clear colourless liquid
- Specific Gravity at 20°C: 1.04
- Odour: Ammoniacal

Shelf Life

Storage: 24 months

Available in the following containers
