

# Fiszyme Digestor

## Description

FISZYME DIGESTOR is a specially formulated biological product designed for the maintenance of drain lines, pipes and grease traps. The product contains harmless, naturally occurring micro-organisms selected for their ability to degrade oils, fats and greases commonly found in drains, grease traps, drain lines and sewers. They also produce enzyme complexes for the breakdown of other waste materials including starch, protein, and vegetable matter.

## Application

FISZYME DIGESTOR has been designed for automatic or manual dosing into the point of application. For best performance, the product should be added during periods of low flow into the sink furthest away from the drains. This will keep the pipes and drains unclogged and odour free. Hot water should not be used immediately before or after dosing. Harsh chemicals such as caustic or bleach should not be used with this product. FISZYME DIGESTOR is safe for people, animals and the environment and is completely biodegradable.

## Dilutions

Use neat at approximately 500 ml per drain and repeat several times a week and as needed.

## Environmental

Dispose of chemicals in accordance with local environmental legislation.

## Handling

Normal precautions should be taken for handling chemicals. Protective clothing, eye protection and gloves should be worn. For further details please refer to the safety data sheet.

## Storage

Store in a cool, dry location between 5°C and 25°C. Protect from freezing. Avoid direct sunlight and extreme temperatures. Store the product sealed in the original container to avoid air exposure. Some products may settle during storage or transportation, ensure thorough mixing before use. See safety datasheet for list of incompatible materials and other relevant information.

## Properties

Appearance: Green Liquid

Density @ 20°C: 0.9-1.1

pH (concentrated): 6-8

## Shelf Life

24 months

## Available in the following containers
