

Methyl Ethyl Ketone

Description

Methyl ethyl ketone is a colourless, has a sharp, sweet odour reminiscent of butterscotch and acetone. It is soluble in water and is commonly used as an industrial solvent.

Applications

Used in processes involving varnishes, paint remover, a denaturing agent for denatured alcohol, glues, and as a cleaning agent. It has similar solvent properties to acetone but boils at a higher temperature and has a significantly slower evaporation rate.

Environmental

Dispose of chemicals in accordance with local environmental legislation Local environment registrations.

Handling

Normal precautions should be taken for handling chemicals. Protective clothing, eye protection and gloves should be worn. For further, details please refer to the safety data sheet.

Storage

Store in a cool, dry location between 5°C and 25°C. Protect from freezing. Avoid direct sunlight and extreme temperatures. Store the product sealed in the original container to avoid air exposure. Some products may settle during storage or transportation, ensure thorough mixing before use. See safety datasheet for list of incompatible materials and other relevant information.

Properties

Appearance: Colourless liquid

Flash point: - 6°C Closed cup

Density @20°C: 0.805

Shelf Life

Storage: 24 months

Available in the following containers
