

M23

Upgrade to smart motorway

Junctions 8 to 10

Junctions 8 to 10

We are improving the busy 18km (11 miles) stretch of the M23 between junction 8 near Merstham and junction 10 near Copthorne by upgrading it to an 'all lane running' (ALR) smart motorway.

Works are scheduled to begin in March 2018. It will be open early in 2020.

This means there will be:

- An additional lane for traffic increasing capacity to reduce congestion.
- More technology on the road to manage incidents.
- More reliable journeys.

It is important for drivers to understand the different types of technology and features used on smart motorways

About smart motorways

Smart motorways are a technology driven approach to the use of our motorways, increasing capacity and relieving congestion while maintaining safety. Smart motorways help make journey times more reliable.

Public information exhibitions

You can find out more about the plans for junctions 8 to 10 at these exhibitions. Highways England and design and construction consultants will be available to discuss the scheme and answer your questions.

Exhibition venues

**South Terminal Arrivals (Level 2)
Gatwick Airport
West Sussex
RH6 0NP**

- Friday 29 September 3pm – 9pm
- Saturday 30 September 10am – 5pm

Attendees are entitled to 2 hours free parking in the South Terminal long-stay car park. Disabled drivers should park in the short-stay and speak to the exhibition team to avoid charges.

**Nutfield Lodge
Nutfield Road
Redhill
Surrey
RH1 4ED**

- Friday 6 October 3pm – 9pm
- Saturday 7 October 10am – 4pm

What smart motorways include

Variable mandatory

- Speed limits will be s
- The limits will be clea roadside signs.
- Signs will be used to network and when va limits are in place.

Emergency roadside telephones

- There will be an emergency telephone in each emergency area.
- This will connect you to Highways England's Regional Control Centres and will pinpoint your location.

Emergency areas

New high visibility EAs provide an area of relative safety following a breakdown. There will be 11 new EAs on this scheme. Motorway Service Areas and hard shoulders on slip roads can also be used. At 60mph EAs are every 75 seconds apart on average.

speed limits

et to smooth traffic flows.
rly displayed on overhead gantries and

inform drivers of conditions on the
riable speed

All lane running

The hard shoulder will be permanently converted into a traffic lane on most sections of the motorway. Drivers should obey all signs, including speed limits and lane closure instructions and should not stop on the motorway except in an emergency.

Congestion monitoring technology

We will use technology to detect and monitor congestion on the motorway and will set appropriate speed limits to manage incidents and smooth traffic flows, making journey times more reliable.

Where will this section of smart motorway be?

The map shows where the new section of smart motorway will be.

All lane running

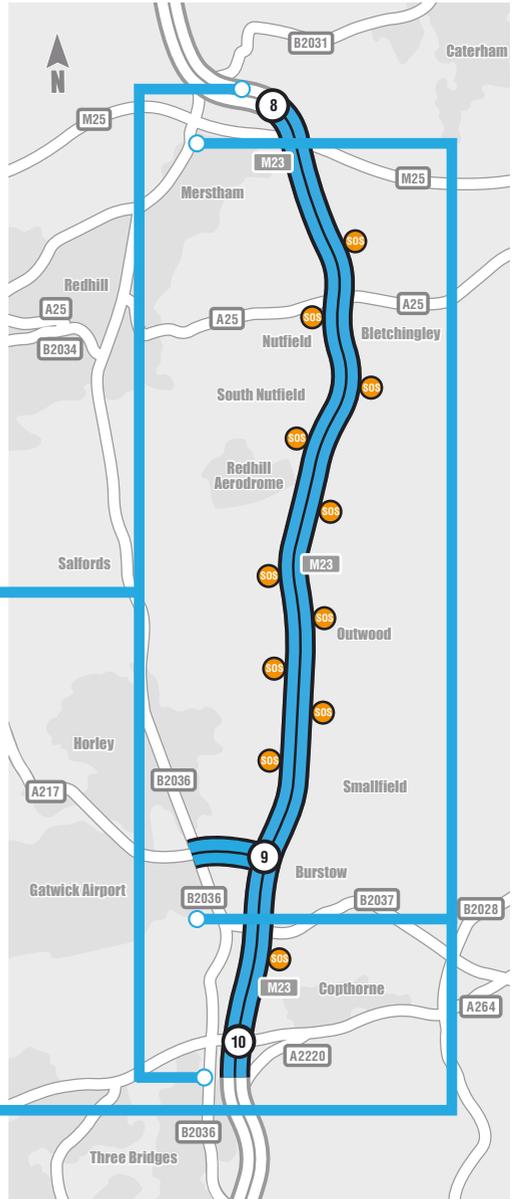

This scheme will have no hard shoulder between junctions 8 and 10. There will be four lanes permanently open for use by road users. High visibility Emergency Areas (EA) will be available.

Emergency areas

There will be 11 new high visibility EAs within the M23 junction 8 to 10 smart motorway scheme. Motorway Service Areas and hard shoulders on slip roads can also be used. The EAs are positioned approximately where shown with this symbol .

Exhibition venue locations

Our exhibitions are being held at Gatwick Airport and in Nutfield near Redhill.

Safety, red sign and incidents

You will see red  symbols on a gantry sign over the motorway or at the side of the motorway:

- We use a red  symbol to show that a lane is closed because of an incident or people working on the road.
- Red  also provide access for emergency services.
- Driving in a lane with a red  symbol is dangerous and drivers must **not** use it.

Incident management is controlled by teams in our control centres:

- Incidents will be detected by traffic sensors, CCTV or calls from the public.
- The control centre will set signs to protect incidents and clear an access route for emergency vehicles.
- Control centre staff will monitor traffic conditions throughout each incident, ensure signs are set to manage traffic, and will reopen lanes as soon as it is safe to do so.

What to do if you break down

If you need to stop in an emergency on a smart motorway:

- Use an emergency area, motorway service area or leave at the next junction. If that is not possible, try to get your vehicle off the carriageway, if it is safe to do so.

If you have to stop in a live lane:

- Put your hazard warning lights on to help other drivers see you and help our control room staff spot you on CCTV.
- If you are in the left hand lane and it is safe to do so, exit the vehicle via the left hand door. Wait behind the barrier if possible.
- If you cannot exit the vehicle, do not feel it is safe to do so or there is no other place of relative safety, remain in the vehicle. Keep your seat belt on and dial 999.

As soon as Highways England is alerted, our Regional Control Centre will close lanes to protect you and your vehicle until help arrives

Our contact details

We have several ways you can contact us to discuss the M23 junctions 8 to 10 smart motorway scheme.
