

M20 junction 10a junction improvement scheme

Highways England has started construction of the M20 junction 10a. The scheme will result in a new roundabout over the motorway, approximately 700 metres east of the existing junction 10.

The new junction will be open for traffic in autumn 2019. The scheme will be completed in summer 2020.

This will impact local and regional traffic. Information will be available via local press, road signs, our Highways England Twitter feed (@HighwaysSEast) and website updates.

We will also write to local residents and businesses impacted by the work.
