

Audit Summary Report

		IN PHASE 3							
PCM Link 27711	Road/Location A4123, Sandwell						Area 9		
PCM Link modelled NO₂ concentrations (µg/m³)									
Year	2018	2019	2020	2021	2022	2023	2024	2025	2026
PCM Modelled NO ₂ Concentration (µg/m ³)	48	45	42	39	37	35	33	31	30
HE Verified Modelled NO ₂ concentration (µg/m ³)	46	43	39	37	35	32	31	29	28
Qualifying Feature									
Satellite imagery indicates Sensitive Receptors and Public Access within 15m from the PCM link.									
Air Quality Monitoring?									
Yes									
Is the Air Quality Monitoring within 10m, to support Phase 3 decision?									
No									
<p>The indicative modelling completed at Phase 2 identified that there were potential exceedances of the limit values along this PCM link, and consequently mitigation measures were developed.</p> <p>The more recent verified air quality modelling completed for the Phase 3 assessment has concluded that there are no exceedances of the limit values. Therefore, this PCM Link does not require any further consideration, and is recommended to stop at the end of Phase 3.</p>									
Mitigation required?									
No - The verified air quality modelling, which was updated for the Phase 3 assessment, concluded that there are no exceedances of the limit values.									
Summary									
<p>This audit report has identified:</p> <ul style="list-style-type: none"> • No exceedance of the annual NO₂ limit value along this PCM link. 									
Recommendation									

It is recommended that PCM link 27711 does not require further consideration, and stops at the end of Phase 3.

Supporting Activities

Additional air quality monitoring to be commissioned to measure NO₂ concentrations alongside the PCM link.
