

Modular Multi-Place Chamber

TECHNICAL
SHEET

Technical Specification

Internal and external control system for monitoring and operation

Adjustable session timer

Session log – data can be exported for further analysis

2 Seat Chamber Dimensions

Length	2019mm
Diameter	1996mm
Height	2083mm
Weight	500kg approx

4 Seat Chamber Dimensions

Length	2824mm
Diameter	1996mm
Height	2083mm
Weight	700kg approx

Chamber Features

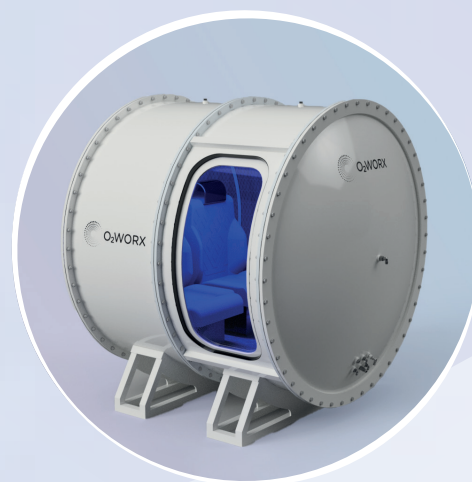

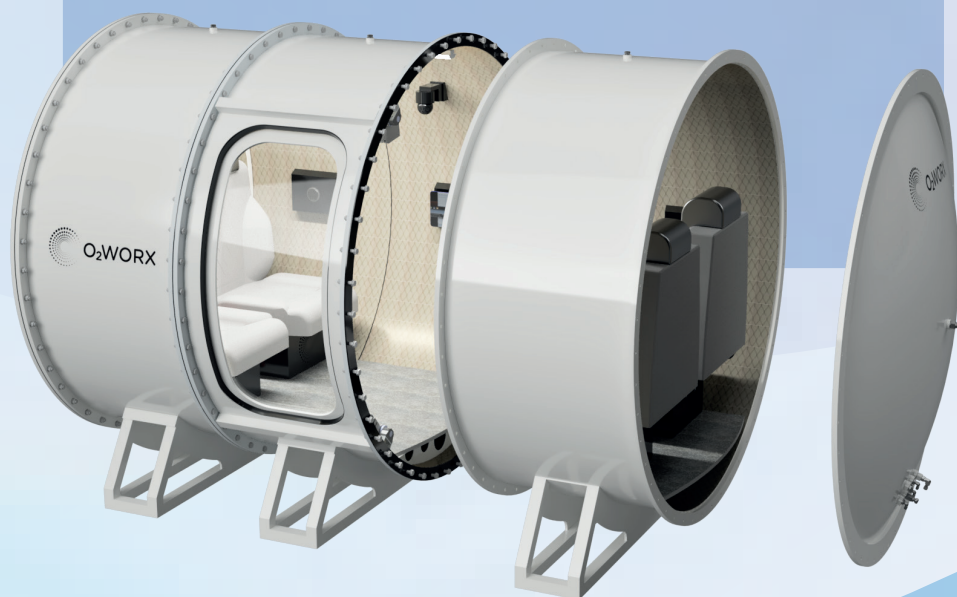

- Multiple patents pending
- Maximum operating pressure: 2.0 ATA
- Modular construction, for easy installation and portability (sections small enough to fit through standard doorframes)
- Chamber has its own uninterrupted power supply in case of power cuts, allowing chamber to depressurize safely
- Automatic air pressure control system
- Slide door entry for ease-of-use
- Wide viewing door
- BIBS system
- Luxury comfort seats
- Internal camera and intercom system
- Main and ambient lighting
- Optional cooling system

Quality Assurance

Real-time monitoring of pressure and oxygen levels

CE certified

ASME - PVHO certified

After Sales Support

TECHNICAL
SHEET

We are a dedicated team, passionate about designing and manufacturing world-class modular hyperbaric chambers.

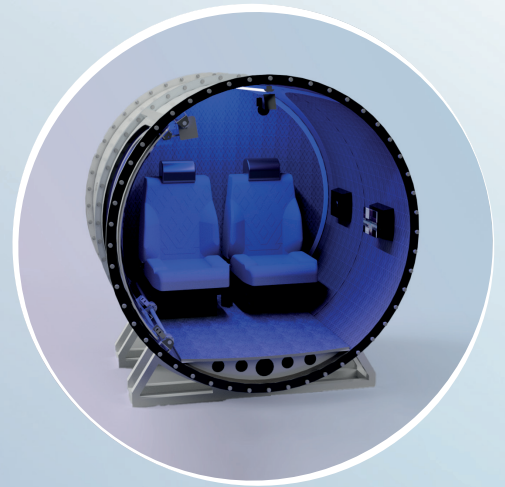

Our UK-designed and manufactured chambers set the benchmark for quality, meeting the highest industry standards. They are certified to ASME PVHO-1 2019 and ASME III Div 1 and are CE-marked for compliance.

To ensure a smooth and safe installation, the O2 WORX team offers:

- **Pre-purchase site survey**
- **Build design & manufacturing**
- **Testing and training**
- **Service and maintenance planning**

We also provide comprehensive user training, ongoing maintenance, and servicing—giving you peace of mind throughout the chamber's lifetime.

Each chamber is designed, manufactured, tested and supported by O2WORX engineers in the UK.

With our fully integrated approach, we are committed to delivering exceptional service for you and your clients.
