### Abbreviations:

CO<sub>2</sub> – Carbon dioxide

DBH – Diameter at Breast Height

Ha – Hectare

PES – Payment for Ecosystem Services

PVC – Plan Vivo Certificate

TAF – Tanzania Association of Foresters

TAMP – Trans-boundary Agro-ecosystem Management Project

tCO<sub>2</sub> – Tonne of Carbon dioxide

Tsh – Tanzanian shilling

USD – United States Dollar

## 1: Summary

<b>Reporting period</b>		<b>1st May 2012 to 30<sup>th</sup> April 2013</b>	
<b>Technical specifications in use</b>		Woodlot (3x3m and 4x4m), Boundary Planting (3m apart), Fruit Orchard (8x8m and 9x9m) and Dispersed Inter-planting (10x5m).	
<b>Area under management (ha) i.e. implemented <i>plan vivos</i></b>	<b>Areas put under management since last report (ha)</b>	Area under management is 433.7 ha and 99,328 meters of boundary planting	No new areas added as there were no additional producers incorporated.
<b>Smallholders with <i>plan vivos</i> and PES agreements (total for project)</b>	<b>New smallholders with PES agreements since last report</b>	Total: 761 smallholders with PES agreements	No new smallholders with PES agreements added since last report.
<b>Community groups with <i>plan vivos</i> and PES agreements (total)</b>	<b>New groups with PES agreements since last report</b>	Total: 30 groups with PES agreements	No new community groups with sale agreements added.
<b>PES made to communities to date (\$)</b>		174,397 USD has been paid to communities to date.	
<b>Plan Vivo Certificates issued to date</b>		56,922 PVCs	
<b>Submission for Certificate Issuance for new areas under management (tCO<sub>2</sub>)</b>		No submission of Certificate Issuance for new areas under management via this AR	

## 2: Key Events, Developments and Challenges

### 2.1 Project Progress.

This is the third annual report for the Emiti Nibwo Bulora project. The reporting period ran from 1st May 2012 to 30th April 2013. The dry season during this reporting period (June to August 2012) was a challenge for the establishment of transplanted young seedlings, especially for farmers who planted as late as March. Nevertheless close monitoring by the farmers themselves, follow up and technical support from project staff made it possible for a good proportion of transplanted seedlings to survive. Farmers started replacing die-offs at the onset of the rainy season, in October 2012, and continued to do this as well as other field management practices under Plan Vivo agreements.

Since the last report, no additional PES agreements have been signed, with sufficient unsold stock from contracts already confirmed in the preceding year. Sales have started to increase since the last report, with 10,075 tCO<sub>2</sub> sold during the period. Potential participants have continued to show interest in the project and have developed *plan vivos* with the assistance of project technicians. We hope to be able to formalise these participants with PES contracts in the near future. Table 1 shows how these are broken down:

**Table 1. Summary of producers (smallholders & groups)**

Zone	No. of Groups	Producers with <i>plan vivos</i>	Producers with signed PES agreements
<b>Nyaishozi</b>	13	198	198
<b>Bugene</b>	14	320	241
<b>Kaisho</b>	14	352	352
<b>TOTAL</b>	<b>41</b>	<b>870</b>	<b>791</b>

### 2.2 Income generating activities.

The project therefore focused on consolidation of producer groups and facilitation for development of income-generating activities alongside establishment of group savings and loans associations. Some groups started small enterprises since last report. More groups and individual producers are doing poultry keeping, horticulture and fish farming.

## 2.3 Project visitors

The project hosted visits from interested partners including Tanzania Association of Foresters (TAF), who want to develop a similar project and the regional team for Kagera TAMP who held a meeting within the project area. The visiting teams appreciated the work done on the ground and promised to develop our collaboration further for the benefit of the organizations and farmers who are participating in the carbon compensation scheme.

One of the producers' enterprises involving local poultry in Bugene

## 2.4 Challenges

Strong and prolonged drought caused most of trees planted 2011 to die as result producers had to replant during last season (November 2012). If the situation will go on, producers will face problems of replanting every season. That will cause *plan vivos* to have trees of different ages. On other hand it will cause difficulties when monitoring target will be on DBH measures. Also some farmers may be discouraged as they invest a lot of time and effort during farm preparation and tree planting. However climate change adaptation practices have been facilitated to producers. Those who apply the practices, their trees are doing well.

Incidents of uncontrolled fires were reported to some areas, where farmers had to replace trees which didn't survive. Likewise there has been a conflict between Plan Vivo farmers and cattle keepers who are practicing free grazing. Some young trees have been destroyed by livestock. The free grazing problem is partly contributed by lack of village land use plans, which are to be enforced with relevant bylaws in relation to planned land use forms. The project is working with the district and village governments to address these challenges through a combination of policy/law enforcement and awareness-raising.

### 3: Activities, total project size and participation

As reported in the previous section no new agreements with producers were signed during the reporting period because the project has unsold stock. However, there is increasing interest from buyers as more companies are now interested in compensating their emissions.

Participating farmers planted trees according to the technical specifications described in the PDD. The Total area covered by the project is 433.72 ha as well as 99,328m of boundary planting. The woodlot system covers 362.07 ha; dispersed inter-planting covers 68.16 ha; fruit orchards cover 3.49 ha, (see table 2 below).

**Table 2: Area covered under each technical specification**

Technical specification	Area covered (ha)	Boundary planting (m)	% of total
Woodlot (WL)	362.07		83.5
Boundary Planting (BP)		99,328	
Dispersed inter-planting (DI)	68.16		15.7
Fruit Orchard (FO)	3.49		0.8
<b>Total</b>	<b>433.72</b>	<b>99,328</b>	<b>100</b>

Continuing producers with woodlots continued to grow seasonal crops (including beans, Irish potatoes, maize, cassava, yams, etc.) in their Plan Vivo sites so that management of the tree farms benefits other crops as well. Since most woodlots are established on degraded/abandoned land this practice has enabled farmers to make better use of the land and realise that land management helps land productivity.

**Plate 3. Potatoes growing with young trees in a woodlot**

### 4: Submission for Plan Vivo Certificate Issuance

**No submission of Plan Vivo Certificate Issuance as per this annual report**

## 5: Sales of Plan Vivo Certificates

Table 4: shows the number of Plan Vivo certificates sold to different buyers:

S/ No	Year	Name of purchaser/source of funds	No. of Plan Vivo Certificates purchased	Total amount received (SEK)	Total amount received (USD)	Price per tonne to the producer (USD) *
1	2010	Folksam	1,861			6

34	2013	Folksam	2,122			6

<b>Total</b>		<b>20,051</b>		
--------------	--	---------------	--	--

\* Price paid to producers per tonne in Tanzanian Shillings (TShs 10,000/tCO<sub>2</sub>) has not changed since the last annual report; however the exchange rate has varied: on 30th April 2013 this was 1664.6 TShs per USD (sourced from <http://www.oanda.com>)

## 6: Summary of Monitoring Results

The monitoring exercise was undertaken during November and December 2012. Producers who went through first monitoring needed to have established more than half of the site as per the Plan Vivo agreement. Producers for second monitoring have to establish the whole plan vivo area and for third monitoring the survival rate should not be less than 90%.

Monitoring during the reporting period qualified 705 producers for payment out of 791 continuing producers, which means that 86 producers did not qualify monitoring targets. Out of the 705 producers who qualified monitoring, 22 received their third payment, 674 got their second payment and 9 had their first payment. Whereas, the 86 who did not qualify monitoring during the reporting period 73 were for the second payment and 13 (in Nyaishozi zone with sale agreement) are yet to receive any payment.

**Table 5. Monitoring summary**

Project area/Zone	1 <sup>st</sup> payment		2 <sup>nd</sup> payment		3 <sup>rd</sup> payment		Total qualified
	No. Qualified	No. Disqualified	No. Qualified	No. Disqualified	No. Qualified	No. Disqualified	
<b>Pilot</b>	-	-	-	-	22	-	
<b>Nyaishozi</b>	9	13	152	2	-	-	
<b>Bugene</b>	-	-	234	7	-	-	
<b>Kaisho</b>	-	-	288	64	-	-	
<b>Total</b>	<b>9</b>	<b>13</b>	<b>674</b>	<b>73</b>	<b>22</b>	-	<b>705</b>

The 86 producers who didn't qualify for payment, due to various reasons, including the following:

- Some farmers had their plans to complete planting trees in the on-going rains and have the activity accomplished later after the monitoring exercise
- Some families had other issues that occupied them to an extent of not getting the job done before monitoring exercises.

Nevertheless project staff are in control of the situation, and almost all the 86 farmers are still committed to the Plan Vivo agreements, they are continuing working on their sites as per agreed plans by the time of writing this report. Further reasons for unsuccessful results and corrections actions are explained below:

**Table 6. Reasons for unsuccessful results**

S/No	Reason	Corrective action
1.	Planted too late/off season (towards end of raining season)	-Early preparation of the site -Have own home nursery for tree seedlings -Proper timing of rain season
2.	Planting without relying on spacing as per technical specification	-More facilitation on technical specification and more frequent support visits by Plan Vivo staff. -Producers disqualified and asked to replant according to spacing of the technical specification -Printing and distributing simple working notes particularly on technical specifications and tools that farmers need to use to be able to ensure correct spacing during planting.
3.	Planting less than required or not planting at all	-Plant the area as per agreement. Sign Plan Vivo agreements only with those who qualify first monitoring -better planning for supply of seedlings (i.e. early preparations for tree nurseries and timing of the respective activities)
4.	Lack of commitment	-More emphasis required from project technicians during producer visits on the importance of maintaining trees and not just the PES payment (incentive) they receive.

Information captured during monitoring are organized in the Plan Vivo database including sequestration and conservation activities and corrective actions.

Monitoring results (for qualified producers only) are in appendix 1

#### 7: PES update

As mentioned above, during the current reporting period PES payments were made to 705 producers, 22 being in the third year, and 674 being in second year and 9 were for first year. In summary a total of Tsh 107,541,000 equivalent to 64,605 USD was paid to the producers who qualified for payment after monitoring. However total payments made to community since begin of the Plan Vivo project is 174,397 USD.

**Table 7: The payments made in 2013 were as follows:**

Instalments	No of Producers	Amount paid (TSh)	Amount paid (USD)
1 <sup>st</sup> year	9	1,393,000	837
2 <sup>nd</sup> year	674	102,478,000	61,563
3 <sup>rd</sup> year	22	3,670,000	2,205
<b>Total</b>	<b>705</b>	<b>107,541,000</b>	<b>64,605</b>

**Table 8. The total amount paid to project participants (to date).**

S/No	Year	Amount (Tsh)	Amount (USD)
1	2011	1,848,600	1,294
2	2012	172,218,400	108,498
3	2013	107,541,000	64,605
<b>Total</b>		<b>281,608,000</b>	<b>174,397</b>

The PES payments per producer (2013 payment) are detailed in Appendix 2

Plate 4: Plan Vivo group members receiving their PES incentive.

## 8: Ongoing Community Participation

Effective communication and consultation with Plan Vivo groups is maintained through monthly group meetings whereby each group has set a date on which they meet with the project staff to discuss various issues pertaining to the management of *plan vivos*, and establishment of development projects which improves their common bond by incorporating other additional economic activities rather than just meeting every month to discuss tree planting.

**Table 9: Topics discussed:**

S/No	Topic	Content
1.	Self-monitoring of Plan Vivo activities	A systematic description on the importance of Plan Vivo Group leaders to carry out continuous self-monitoring, recording and reporting of Plan Vivo activities to enhance project achievement.
2.	Establishment of savings and loans scheme	Importance of saving money through Village savings and loans associations. Through this program farmers can borrow money and establish small businesses.
3.	Adaptation to drought	Importance of applying various and possible irrigation technologies (e.g. drip irrigation) by using bottles or plastic bags in order to avoid drying of transplanted seedlings due to prolonged droughts
4.	Entrepreneurship skills	Importance of Plan Vivo groups carrying out other development activities so as to improve their livelihoods and economic status; and avoid meeting every month to only talk about tree planting. As a result some groups have decided to do VSLA, chicken rearing, goats and sheep keeping as enterprises.
5.	Importance of fruits to human health	Farmers given training to develop a culture of taking fruits as part of meals at family level. Also considering fruit production as an important farm enterprise which could be a potential source of income and also has more ecological benefits as well.
6.	Technical Specifications	Spacing per technical specification, suitable tree species, rotation period, amount of tCO <sub>2</sub> sequestered per standard area of technical specification.
7.	Site and spot preparation	How to follow the best practice of land cultivation and preparations for transplanting of seedlings.
8.	Fire control measures	Making fire breaks along Plan Vivo plots. Lobbying and advocacy for village bylaws regarding bush fires.

## 9: Breakdown of Operational Costs

Table 10: Breakdown of Operational Costs

Expense	Description	Cost (US\$)	Contribution from sales of Plan Vivo Certificates <sup>1</sup>	Contribution from other income (e.g. grants)
<b>Personnel</b>	• 1 Coordinator • 3 Assistant Coordinators	39,865	-	0
<b>Office/admin</b>		7,594	-	0
<b>Equipment</b>		138	-	0
<b>Travel</b>		7,935	-	0
<b>Fees</b>		1,969	-	0
<b>Audits</b>		360	-	0
<b>Additional exp.</b>		2,972	-	0
<b>Training</b>		5,592	-	0
<b>Marketing</b>		1,258	-	0
<b>TOTAL</b>		<b>67,682</b>		<b>0</b>

Note: Exchange rate used 1USD= 1,664.60TZS

## 10. Future Development

The project's priority is to sale all unsold stock of Plan Vivo Certificates before planning for further scaling up. Farmers groups established will continue to receive training on group consolidation, enterprise development and on building capacity to access financial services and use alternative energy sources.

There has been further development in recognition of the project's contribution to the climate change innovations, the project was invited to attend and make a presentation to a workshop organized by the World Bank office in Morogoro, Tanzania. The Program Adviser Amos Wekesa participated and made a presentation about the project.

<sup>1</sup> All ongoing expenditure is being covered through the sale of Plan Vivo Certificates.
