

## Plan Vivo - Verification Statement

**Submitted To:** Plan Vivo

**Verification Entity:** Aster Global Environmental Solutions, Inc.

**Issue Date:** 1 August 2022

**Lead Verifier:** Shawn McMahon

**GHG Project Plan:** Drawa Rainforest Conservation Project

Aster Global Environmental Solutions, Inc. completed the verification for the Drawa Forest Conservation Project and confirms that the project is in conformance with the Plan Vivo Standard (2013), the Nakau Methodology Framework D2.1 v1.1, and the TS Module (C) (IFM-LtPF) D2 1.1 v2.0. The project is an Improved Forest Management - Logged to Protected Forest (LtPF) project as specified in the selected methodology. The project is implemented on approximately 1,588 hectares within Drawa, Vanua Levu in Fiji. The GHG emission reductions and/or removals achieved during the monitoring period were evaluated to a reasonable level of assurance. During the verification a 5% materiality threshold was used. This verification covers the monitoring period 06 September 2015 – 06 September 2020. The total GHG emission reductions/removals during the monitoring period are 94,850 tCO<sub>2</sub>e. A project buffer of 20% is applied resulting in a total of 18,970 tCO<sub>2</sub>e allocated to the Plan Vivo Buffer Pool during the 5-year monitoring period. The Total Emissions Reduction Tonne(s) (PVCs) verified during this verification were 75,880.

GHG Reductions or Removals	Units
Net Baseline Emissions	80,000
Project Emissions	0
Project Removals	14,850
Leakage	0
Uncertainty Deduction Rate	0%
Total Buffer Contribution	18,970
<b>GHG emission removals total (tCO<sub>2</sub>e)</b>	<b>94,850</b>

<b>Total Emission Reduction Tonne(s) (PVC)</b>	<b>75,880</b>
--	---------------
