Dear Luke

Following our email dated December 4, 2024, this is to request for an extension on the verification of the Hiniduma Bio-link Project.

As communicated in our previous letter of July 1, 2024, we contacted the local Plan Vivo Verification-Eligible VVB, The Sustainable Future Group (SFG), and began the process to carry out the verification with them.

The Sustainable Future Group (SFG) has been going through the process of the verification, and in that process, there were some Non-Conformities (NCs) and Observations (OBs) that were raised.

Following an on-ground sample monitoring of the growth of the trees of 50 plots in the Neluwa area that were verified by SFG, they had raised an NC regarding the growth models stated in the Technical Specification. In order to address this, an additional sample monitoring maybe required if the scientific reasoning for the representation of sample plots linked to the growth models is deemed insufficient.

We are in the process of identifying the root cause of the issue. Therefore, we kindly request an extension till 30th April 2025 to address this.

Await your confirmation of this request.

Thanking you,  
Yours faithfully,

**Sanith de Silva Wijeyeratne**  
Director/Chief Executive Officer
