Dear Khasi Hills Community REDD project,

We provide here a brief statement on the conclusion SCS Global Services (SCS) has reached regarding the GHG assertion documented in the 2022 project design document (PDD) describing the GHG emission reductions or removal enhancements attributed to the Khasi Hills Community REDD project for the 01 January 2017 to 31 December 2021 verification period. The overall goal of the third-party verification was to review impartially and objectively the claimed GHG emission reductions/removal enhancements claimed by Ka Synjuk ki Hima Arliang Wah Umiam Mawphlang Welfare Society, against relevant Plan Vivo standards and the approved methodology. The verification was carried out against the Plan Vivo Standard v2013.

SCS concludes, with no qualifications or limitations and with a reasonable level of assurance, that the GHG assertion and reported GHG emission reductions or removal enhancements as set out in the PDD conform to the verification criteria and are without material discrepancy.

Congratulations on your successful SCS Global Services verification.

Sincerely,

Doug Baldwin  
Verification Scientist

Lead Auditor  
Approval
