

Sofala Community Carbon Project

2012 Annual Report

11 January 2013

1. Summary

Reporting period	October 2011 through September 2012			
Technical specifications in use	System Name and description	tCO ₂ per hectare	Technical specification	
	Faidherbia, dispersed interplanting of a nitrogen fixing tree with reverse phrenology in the machamba	117	MOZ-TS-DIP var. Faidherbia albida v. 2	
	Cashew, planting a cashew orchard	137	MOZ-TS-FO-cashew	
	Homestead, planting fruit and shade trees around the homestead	154	MOZ-TS-HP	
	Mango, planting a mango orchard.	115	MOZ-TS-FO-mango	
	Woodlot, planting a woodlot of indigenous tree species to provide fire wood.	184	MOZ-TS-WL	
	Boundary, planting a border of trees around the field or machamba or indigenous tree species to reforest the area.	12 tCO2/100m	MOZ-TS-BOU v. 2	
	Gliricidia, dispersed interplanting of a nitrogen fixing tree.	37	MOZ-TS-DIP var.Gliricidia	
	No-burning of agri-residues, a payment to the farmer to incorporate agri-residues and not burn them in piles which is baseline scenario.	26	MOZ-TS-NBA v. 4	
	REDD+ ¹ , a conservation programme which rewards communities and individuals to protect zones from deforestation and degradation.	Dependant on stratification 39-158	Conservation of miombo woodland in Mozambique. Under going peer review. Ver 2.2	
¹ Previously Avoided deforestation technical specification, renamed in line with FAO definitions				
Area under management (ha) i.e. implemented plan vivos		Areas put under management since last report (ha)	12,000 ¹ ha	0 ha
Smallholders with plan vivos and PES agreements (total for project)		New smallholders with PES agreements since last report	2799	0
Community groups with plan vivos and PES agreements (total)		New groups with PES agreements since last report	28	0
PES made to communities to date		US\$1,966,474		
Plan Vivo Certificates issued to date		355,606		
Submission for Certificate Issuance for new areas under management (tCO ₂)		n/a		

¹ Includes REDD+ areas. Approximation, technical specification systems overlap on the same piece of land.

2. Key Events, Developments and Challenges

Government

Government relations are good and continue to improve. Both the previous and the current governors of Sofala Province visited the Project during the course of the year and gave their support. The Gorongosa district administrator and the Sofala provincial director of forestry also visited several times.

Antonio Serra, Envirotrade's Mozambique country manager, continues to participate in the World Bank-coordinated REDD+ working group for Mozambique. As a part of this effort and the ongoing activities of the Project, he and other Envirotrade managers are in regular contact with the Ministry of the Environment (MICOA), the Ministry of Agriculture (MIAG) and the Ministry of Tourism (MITUR).

The Project continues to operate under the authorisation issued by the Land and Forest Department of the Ministry of Agriculture (MIAG) for carbon sequestration and REDD+ (NoO2/DNTF/2011), which formalises the earlier agreement with the Government of the Republic of Mozambique.

Project Staff

Staff numbers were stable during the year. The Gorongosa database administrator resigned, and was replaced by Kevin Grema in May 2012. Kevin has bonded well with the team, and his IT and computer repair skills are proving very useful.

Sadly, one of our Zambezi Delta extensionists, Santos Vasco Charles, perished with his entire family while crossing the Zambezi River in a canoe in early November 2012. While we will feel his loss in the project, the human tragedy is much greater, with his wife and three children drowning with him. We have offered our condolences to the entire Gorra community.

Students and University linkages

The Project hosted a student tour from the University of Pennsylvania accompanied by staff from the University of Stellenbosch. Dr Jen Dyer, from Leeds University, spent several days on the project to assess the community Benefits derived from carbon projects. The Project continues to enjoy a close working relationship with Eduardo Mondlane University in Maputo.

Cooperation with NGOs

The Project continues to work closely with the Mozambican NGO ITC (Iniciativa para Terras Comunitárias) to secure land tenure rights for communities in and around the projects areas. This year, ITC signed an agreement with the Project under which we will manage a land tenure drive in the Marromeu District, where our Zambezi Delta sub-project is located. This effort will benefit both participants and non-participants in the Project.

During the course of the year, the Project also participated in various events and programmes sponsored by other NGOs, such as WWF and IIED.

Community Microenterprises

The principal community microenterprises associated with the project continue to be a) tree seedling nurseries, b) sawmill, c) carpentry shop, and d) beekeeping and honey production.

The greatest single difficulty encountered by both the sawmill and the carpentry shop over the past few years has been the irregular and unreliable nature of their source of electric power. This has been due to the difficulty of maintaining the ageing electrical generators at the Nhambita camp. To address this problem, the project is arranging grant funding to provide a power line from the national grid to the camp. With this installation, both the sawmill and the carpentry shop will have their own metered electricity supplies on demand. The project will also be able to add its own metered supply for its offices and accommodations at its own cost. The generator installation will be maintained as an emergency backup. This change, thanks to the generosity of donors, will improve the efficiency of the sawmill and the carpentry shop dramatically.

Envirotrade Operational Database

Aristides Muhate, Envirotrade's Mozambique carbon inventory manager, and Paul Watts, a volunteer in the UK, completed work on the initial form of the new Agroforestry contract database during the year. This project developed into a complete audit of the more than 7,300 Agroforestry contracts in the two sub-project areas in order to ensure that the data being transferred from the old database was accurate and reliable. The extent of this work resulted in the project taking much longer to complete than originally planned. In the event, validated paysheets for the 2012 Agroforestry Payments for Ecosystem Services (PES) were only available in November, some six months later than intended. The paysheet is the document produced by the project after monitoring has been done on which is calculated the payment due to the farmer according to the degree of success of his activities. It is signed by both the farmer and the monitor. It is needed before payment is made.

The database team, which also includes Kevin Grema at the Gorongosa sub-project and Tichaona Gwenzi at the Zambezi Delta sub-project, will continue to work on adding additional

functionality to the database in 2013. But the new database has now greatly improved the quality of the data available to Project managers and the ease of producing management reports on a timely basis. The database will produce Agroforestry PES paysheets for 2013 payments scheduled for May.

Some of the delays encountered in the database project were the result of computer problems and resulting data loss. A second significant problem,

however, was high absenteeism from the database administrator at the Gorongosa sub-project site (who eventually resigned and was replaced by Kevin) and poor health suffered by Tichaona in the Zambezi Delta sub-project. We are happy that Tichaona has now made a full recovery.

Farmer news

The main issue in regard to participating farmers during the year was the late payment of PES. António Serra, Envirotrade's Mozambique country manager, and Alastair MacCrimmon, the Sofala project manager, along with the Project's technicians and extensionists, consulted regularly with all participating communities during the year to explain the reasons for the delay in payments and the fact that they would be made later in the year. We recognise that any delay in payments causes hardship in the communities, and it is Envirotrade's firm intention to avoid any delays if at all possible. We appreciate very much the fact that the participating communities and farmers remained positive and committed to the Project during this period.

In addition to the database issues described above, a second reason for the delay in PES was financial constraints on the Project as described in the section below.

Recently, we have brought a second trailer and two additional vehicles into the Project from another project formerly under development. This additional equipment will significantly improve the Project's capacity to deliver seedlings to participating farmers.

Challenges

As in previous years, the principal challenges to the Project were twofold: financial and climatic.

When the Sofala Community Carbon Project was established in 2002/2003, the expectation/hope was that the long term future price of carbon would be upwards of US\$15 per tonne. As there was little open-market trading of carbon at this early stage of development of carbon markets, it was difficult to base a contract price for the farmers on an existing market price. The Sofala project followed Plan Vivo's model that the net realised selling price should be utilised roughly according to the following principle:

- 1/3 of sales price to the participating farmers
- 1/3 of sales price to the local project operations

1/3 of sales price to the operating company management team, overhead expenses, return to investors, etc

This would indicate that at least 66% of achieved carbon offset sales revenue should be returned to the project operations and participants.

At the time of starting the initial operations, and assumed realisable price of \$15 per tonne translated into an amount of local currency which now equates to approximately \$4.70 per tonne at current exchange rates (at the time of writing the report).

It is important to note that at no stage of operations, has the Sofala Project been able to achieve a net selling price of \$15 per tonne [2012 average = \$8.32]. Yet at all times it has maintained its contracted price of \$4.70 per tonne to participating farmers. In terms of the total value of carbon offsets sold to date – the Mozambique operations and participants have received funding to the tune of approximately 200% of sales revenue. This is far in excess of the 66% anticipated by the initial model.

This market environment places severe financial constraints on the Project. Over the past 4 years, since the successful conclusion of the European Commission grant, Envirotrade has subsidised the Project's operational funding requirements with the injection of over US\$1.4 million. (Further financial information is contained in Section 9 of this report.)

These financial constraints have resulted in significant cutbacks in operational expenditures in the Project, as well as contributing to the delay in PES payments in 2012. This poses the greatest challenge to the Project, and is likely to continue to do so unless there is a significant turnaround in the fortunes of the global carbon markets.

The second principal challenge to the Project is climatic.

The reporting year began, in late 2011, with extremely high and unseasonal temperatures and very poor rainfall in the region. This resulted in delays to tree planting as well as to high seedling mortality after planting. This is a pattern which has become more pronounced in recent years, and represents a change in conditions compared to those in place during the initial years of the Project.

The Project's criminal and civil legal processes against Envirotrade's former Mozambique country manager continue, and pose an unwelcome additional strain on the Project's financial and managerial resources. There have been some positive recent developments in these processes, however, and we hope this unfortunate episode will be concluded in the Project's favour relatively soon.

3. Activities, total project size and participation

Some figures have been amended from those reported in the 2011 report after a comprehensive audit of the project database this year.

Total number of producers in each site:

Type	Gorongosa sub-project	Zambezi Delta sub-project	Grand Total
Group	16	12	28
Men	797	898	1,695
Women	602	502	1,104
Grand Total	1,415	1,412	2,827

Total area size of each system:

System	Area (ha) ²
Boundary	2,594 ³
Cashew	210
Gliricidia	54
Homestead	138
Faidherbia	1,107
Mango	56
No Burn	2,805
Woodlot	276
REDD+	9,105

² This is not the absolute area but rather the area that the system covers which may overlap with other systems

³ Estimate based on perimeter

Total number of contracts:

	Subproject - numbers of agro-forestry contracts		
System or technical specification	Gorongosa	Zambezi Delta	Grand Total
Boundary	1,274	1,038	2,312
Cashew	97	117	214
Gliricidia	64		64
Homestead	215	428	643
Faidherbia	824	157	981
Mango	59		59
No Burn	1,534	1,308	2,842
Woodlot	83	121	204
Grand Total	4,150	3,169	7,319

There are no new farmers or contracts this year as the project is in its monitoring phase.

4. Submission for Plan Vivo Certificate Issuance

No new contracts have been signed since early 2010 due to the planned lifecycle of the project, which was launched in 2003 with a 15-year planned formal engagement. Agroforestry contracts with participants are 7 years in duration.

Status of carbon (After deduction of risk buffers)	tCO₂	Agroforestry Gorongosa sub-project	Agroforestry Zambezi Delta sub-project	REDD+ Gorongosa sub-project	Sofala Project Totals
Total Carbon from all contracts		304,996	154,045	787,760	1,246,801
Less Carbon from cancelled contracts		31,082	9,200	-	40,282
Less Carbon from currently suspended contracts		53,904	17,372	-	71,276
Equals Active Carbon		220,010	127,473	787,760	1,135,243
Less Carbon allocated to customer sales		168,368	52,800	134,438	355,606
Equals Carbon remaining available for allocation to future sales		51,642	74,673	653,322	779,637

The project, through Associação Envirotrade Carbon Livelihoods, pays Agroforestry participants a contracted price of 111.50 Mozambican Meticals (approximately US\$4.00 at current exchange rates) per tonne of sequestered carbon (tCO₂), regardless of the technical specification covered by the contract. These payments are made on gross carbon sequestered under the technical specification, before deduction of the required 15% or 10% risk buffers. This means that the direct cost to the project of saleable carbon (after deduction of the required risk buffers) is approximately US\$4.70 per tCO₂. REDD+ activities (eg patrolling, firebreaks, firefighting, cold burning) are contracted with participants on the basis of forest area under protection.

5. Sales of Plan Vivo Certificates

Date	Client	Sum of tCO2e	new to 2012 report	USD Price per tCO2	Total USD	2012 Certificate Issuance Fee (\$0.40 per Certificate)
27/01/2004	Future Forests (Carbon Neutral Co)	9,175

Total carbon sold and allocated		355,606				
Total unsold carbon issued to Envirotrade		12,622				
Total carbon revenue USD					\$2,959,321	
Average price for sold carbon				\$8.32		
New issuance requested in this annual report		4,500				\$1,800

Those sales in **red** are those which are attributed to the October 2011 to September 2012 cash income and can be compared alongside section 9 "breakdown of operational costs" which has the same reporting period. Pricing information has been removed to ensure client confidentiality.

* Indicates a sale of carbon to a buyer from the "unsold" carbon stocks issued to Envirotrade with the 2010 and 2011 annual reports.

Indicates an allocation of unsold carbon on the Markit Environmental Registry available for transfer to buyers immediately upon sale.

6. Monitoring Results

Agro-forestry monitoring results

A total of 7,319 contracts were monitored. A total of 4,750 contracts were paid due to low mortality rate and no burn residues found in the field. They represent 64.9% of total contracts.

A total of 843 contracts, 11.5% of total contracts, have their payments temporarily suspended due to high mortality rate of trees planted.

A total of 1,726 contracts, 23.6% of total contracts, have been cancelled. The reasons are no protection against wild fires and/or non-compliance with contractual conservation practices. These contracts are smaller in carbon terms, on average, than the currently active and suspended contracts.

Total contracts by monitoring condition:

Monitoring condition	Gorongosa	Zambezi Delta	Grand Total
Full payment	1,272	1,337	2,609
Discounted payment	1,130	1,011	2,141
Suspended payment	462	381	843
Cancelled contracts	1,286	440	1,726
Grand Total	4,150	3,169	7,319

Total carbon by monitoring condition (tCO₂):

Monitoring condition	Gorongosa	Zambezi Delta	Grand Total
Full payment	97,246	61,609	158,855
Discounted payment	122,765	65,865	188,629
Suspended payment	53,904	17,372	71,276
Cancelled contracts	31,082	9,200	40,282
Grand Total	304,996	154,045	459,041

Small differences due to rounding

Reasons for less than full payments:

Contracts are cancelled for fire, failure to engage in contracted conservation agriculture methods, or abandonment of the field.

Contracts are suspended for a rate of tree mortality higher than 85%, while the project works to rectify the participant's performance. When the contract is brought back into compliance, all missed payments are made.

Contracts are paid with a discount due to tree mortality between 15% and 85%. When the contract is brought back into compliance, all missed payments are made.

REDD+ monitoring results.

A new REDD+ monitoring system was developed in 2011 which fulfils both Plan Vivo and VCS requirements. A system of 144 monitoring plots within the protected areas are used to objectively measure changes in biomass and causes of change. Payments are based on the results of monitoring from these plots, in coordination with the reports from the monitoring teams.

Table 1 Table from REDD+ technical specification.

Deforestation indicator	Likely contributing factors		Payment response/ adjustment
Deforestation <25% of baseline rate	Governance working effectively	Protection activities implemented effectively	Payment continues as per schedule
Deforestation 25-75% of baseline rate	Significant breakdown in governance	Protection activities not properly implemented	Payment reduces by 50% until next annual monitoring and enforcement of corrective actions
Deforestation >75% of baseline rate	Governance not functioning	No effective protection activities	Payment suspended until next annual monitoring and enforcement of corrective actions

Monitoring during the reporting year was accomplished in accordance with established procedures. The only problem detected in the monitoring process was in Block 3 (Mucinha/Munhanganha/Nhambita) where about 15 new machambas were opened. This is a small block of 324 hectares, and so is not material to the overall REDD+ project activities. The Project has made efforts with local leaders and government, but this problem has been difficult to resolve successfully. This block has been suspended from the REDD+ programme, and final resolution of the issue will be determined in the next year.

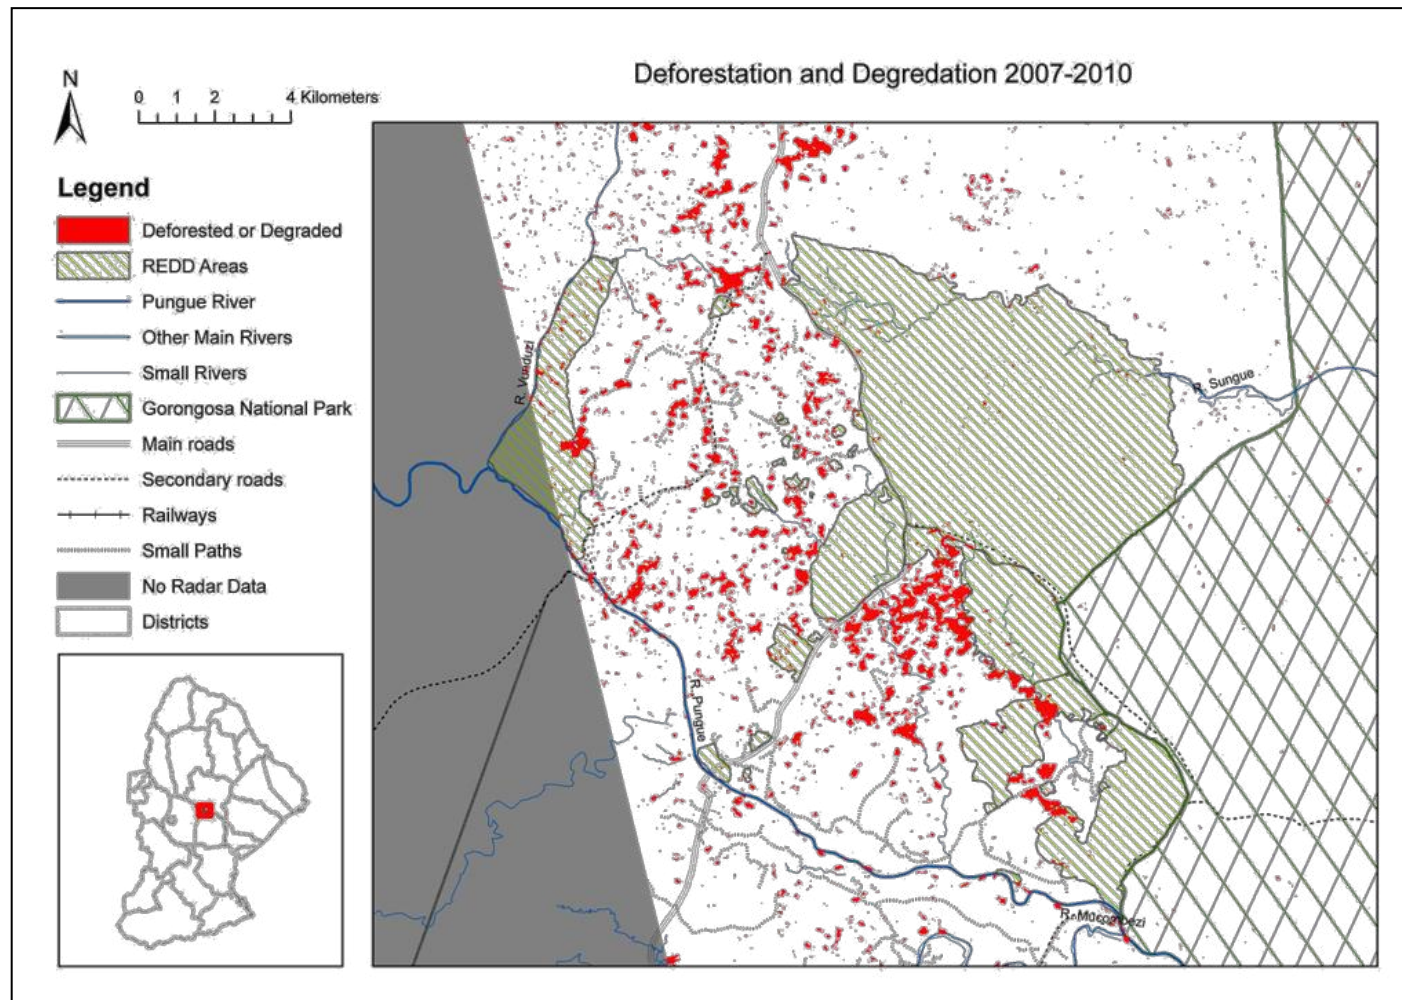

Figure 6-1 An estimate of deforestation events in the Chicare regulado derived from Ryan (2011).

7. PES update

Agro-forestry

The Project made its 2012 Agro-forestry Payments for Ecosystem Services six months later than normal, in November. The reason for this delay was twofold. First, delays in finalising the comprehensive audit of all contracts which accompanied the conversion of the Agro-forestry contract database from Microsoft Excel to Microsoft Access. And second, financial constraints on the Project. Sufficient funding was secured to make the PES payments in September. However, complete checks of the new database were not completed until November. Project managers consulted continuously with the participating communities regarding the payment delays.

Gorongosa Agro-forestry PES payments totalled MZN 2,408,361.

Zambezi Delta Agro-forestry PES payments totalled MZN 1,525,539.

A detailed breakdown of Agro-forestry payments to farmers is in appendix 2.

REDD+

2012 payments

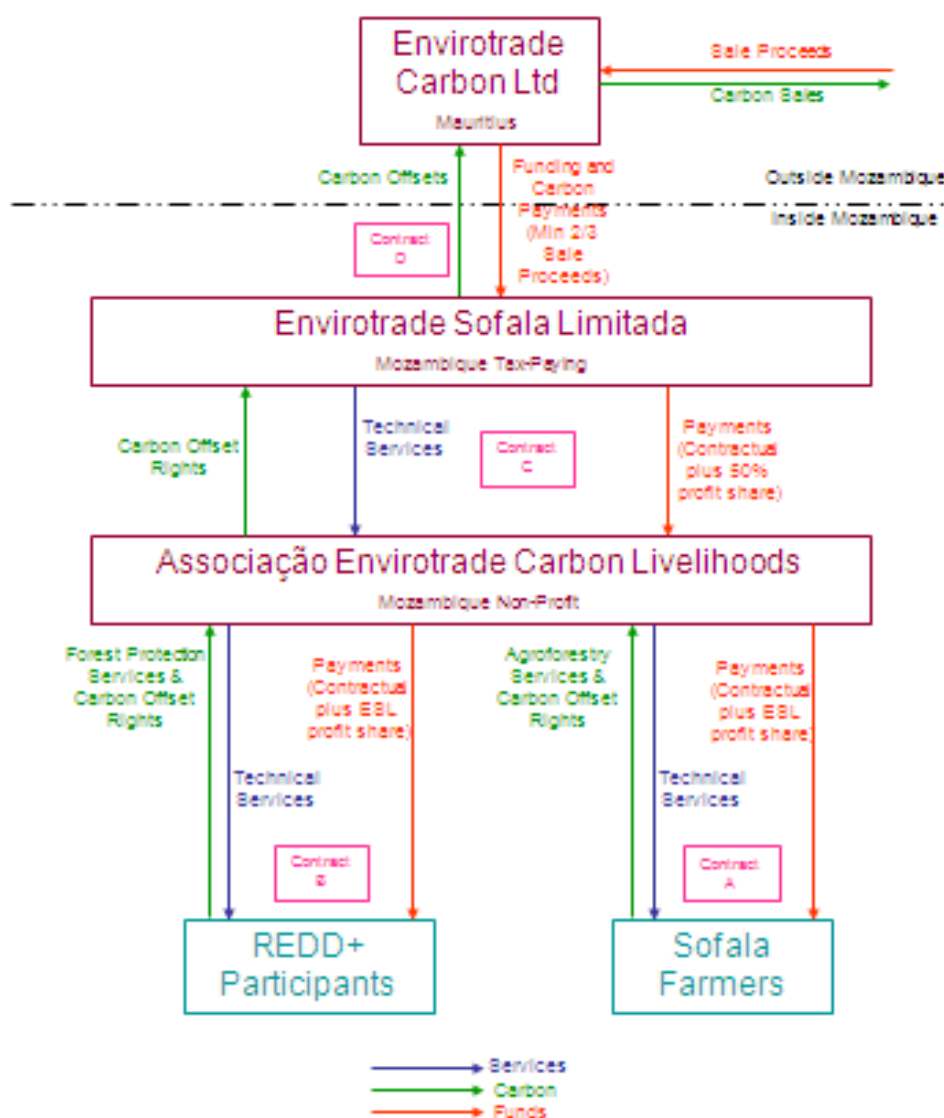

Date	Amount paid (Mt)	Amount paid (USD)	Referent to
29/02/2012	51,626.00	1,912.07	2011 early (cold) burning
07/06/2012	181,355.00	6,716.85	2011 patrolling
29/08/2012	68,921.00	2,552.63	2012 Fire breaks
19/12/2012	63,773.00	2,361.96	2012 early (cold) burning
Total	365,675.00	13,543.52	

8. Ongoing Community Participation

The Project continues to benefit from the creation in 2010 of Associação Envirotrade Carbon Livelihoods (AECL), a fully approved and registered community non-profit association. The association is the only legal form recognised in Mozambique for non-profit purposes. AECL has as its members both Envirotrade managers and representatives of the various community associations participating in the Project. As such, it acts as the “owner” of the Sofala Community Carbon Project and as the interface between the participating communities and the project developer.

Technical and administrative services are provided to the Project by Envirotrade Sofala Limitada, under contract from AECL. The diagram below illustrates the relationships between the various participants in the Sofala Community Carbon Project.

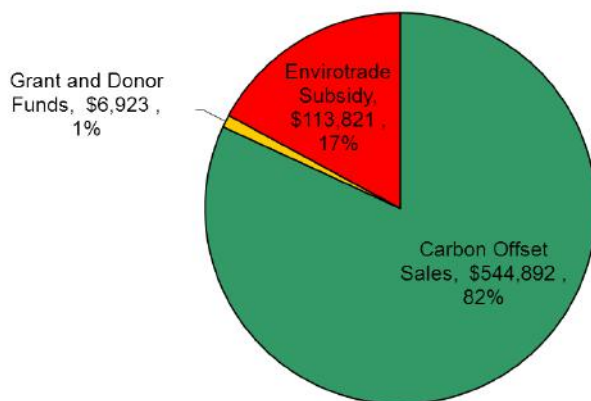

Envirotrade Sofala Legal Structure

9. Breakdown of Operational Costs

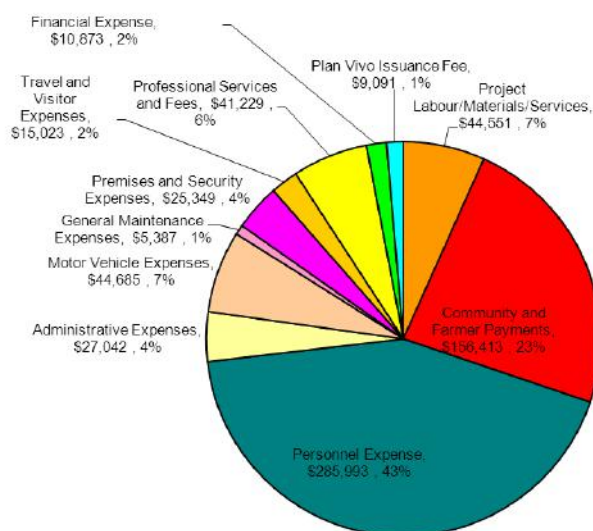

October 2011 through September 2012

Sofala Revenues

Disposable income paid into the local communities of USD \$486,957 (includes PES payments and personnel payments) was 89% of total carbon offset sales from the project during the 12-month period

Sofala Disbursements

Type of expenditure	US\$	Contribution from sales of Plan Vivo Certificates (US\$)	Contribution from other income (US\$) Envirotrade Subsidy and grants
Project Labour/Materials/Services	44,551	36,470	8,081
Community and Farmer Payments ⁴	156,413	128,040	28,373
Personnel Expense	285,993	234,115	51,878
Administrative Expenses	27,042	22,137	4,905
Motor Vehicle Expenses	44,685	36,579	8,106
General Maintenance Expenses	5,387	4,410	977
Premises and Security Expenses	25,349	20,751	4,598
Travel and Visitor Expenses	15,023	12,298	2,725
Professional Services and Fees ⁵	41,229	33,750	7,479
Financial Expense	10,873	8,901	1,972
Plan Vivo Issuance Fee	9,091	7,442	1,649
Total Project Expenditure	665,636	544,892	120,744

The project proponent, Envirotrade, has provided significant subsidies to the Project since its launch in August 2003. The majority of these subsidies, which cover the shortfall of Project carbon offset sales and grant/donor funding relative to Project operating expenses, has been provided since the successful conclusion of the European Commission grant in August, 2008. For the four Plan Vivo reporting years of 2008/2009 through 2011/2012, Envirotrade's subsidies to the Sofala Community Carbon Project have totalled at least US\$1,411,757. These subsidies do not include payments for any Envirotrade activities not directly related to the Sofala Community Carbon Project, such as overheads in Mauritius, the United Kingdom or the Republic of South Africa or development costs for other projects.

⁴ Majority paid in November, but all pertaining to this reporting period.

⁵ Professional Services and Fees paid to entities NOT related to Envirotrade.

Appendix 1: Monitoring results for new plan vivos

No new contracts this year. New sales allocated to previous years' Plan Vivos.

Appendix 2: Monitoring results for continuing plan vivos

Separate attachment for Gorongosa and Zambezi Delta sub-projects.

Appendix 3: Record of community meetings

Gorongosa Monitoring results
