## TOTAL ENERGIES: JANICE AND JAMES FIELDS POST DECOMMISSIONING VERIFICATION TRAWL SWEEPS

This is to certify that the MV "Westro" PD20 has carried out a post decommissioning seabed trawl verification sweep of the Janice and James 500 metre safety zones and connective pipeline route, the gas export pipeline PL1632 route, and the oil export pipeline PL1631 route. Using best endeavours and practice available, no oil related obstructions were encountered that will affect current and future fishing activity in the defined area. To the best of our knowledge the swept areas have been successfully cleared of all equipment / infrastructure are considered safe to allow normal fishing operations to proceed.

NOTE: We would recommend fishermen avoid the following, out with the designated trawl sweep locations:

A large boulder was encountered during operations and was returned to the seabed in approx. position **56° 21.857'N, 002° 17.274'E**

A snagging occurred while turning outside the James 500 metre safety zone in approx. position **56° 21.234'N, 002° 17.983'E**

Signed for on behalf of the Owners of MV "Westro" PD20

James West, Skipper
