**DEEPOCEAN/SHELL: CURLEW B
POST DECOMMISSIONING CLEARANCE / VERIFICATION TRAWL SWEEPS**

This is to certify that the MV "Westro" PD20 has carried out a post decommissioning seabed / trawl verification sweep within the Curlew B 500 metre safety zone, **not including** the section marked on the attached schematic drawing (Appendix 1):

- Curlew B wellhead removed location and surrounding drill mud
- N0779 Curlew B production flowline cut 1m below seabed

This area should continue to be marked as a potential hazard.

Using best endeavours and practice available, no oilfield related obstructions were encountered that will affect current and future fishing activity in the over-trawled area. To the best of our knowledge the swept areas have been successfully cleared of all equipment / infrastructure are considered safe to allow normal fishing operations to proceed.

Signed for on behalf of the Owners of MV "Westro" PD20

James West, Skipper
