**ITHACA: ATHENA FIELD
POST DECOMMISSIONING CLEARANCE / VERIFICATION TRAWL SWEEPS**

This is to certify that the MV "Westro" PD20 has carried out a post decommissioning sea bed / trawl verification sweep of the Athena Field. Using best endeavours and practice available, the Athena Manifold and FPSO 500 metre safety zones, as well as the FPSO anchor locations, have been trawled to ascertain if any oil field related obstructions remain that could affect current and future fishing activity in the defined area.

To the best of our knowledge, the swept locations have been successfully cleared of all equipment / infrastructure and are considered safe to allow normal fishing operations to proceed.

Signed for on behalf of the Owners of MV "Westro" PD20
