**SSE: SEAGREEN OFFSHORE WINDFARM - WEST
VERIFICATION TRAWL SWEEPS ON DESIGNATED LOCATIONS ALONG THE INTER ARRAY CABLES**

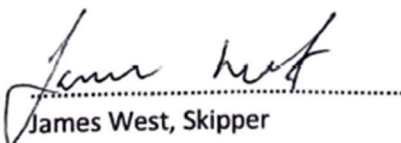

This is to certify that the MV "Westro" PD20 has carried out overtrawlability trials within the Seagreen Offshore Windfarm site, over rock protection berms at agreed sections of inter-array cables in between the following turbines:

N03 – N06*
M01 – L02
L02 – K04
K04 – L06
L06 – J07
J07 – K08
H05 – G06
J08 – J09
J09 – J11

Verification sweeps were completed with **squid fishing gear**. The trials were no closer than 250 metres from any of the wind turbines. To the best of our knowledge the swept areas listed above are considered safe to allow normal fishing operations to proceed. Any other areas within the site should be approached with caution.

*After one pass between Turbines N06-N03 there was a snagging approx. 200 metres NE of the cable in position **56° 40.105'N, 001° 53.002'W**. No gear damage was experienced but it is recommended that fishermen avoid trawling over this location where possible.
