**DOF SUBSEA/CNOOC: ETTRICK BLACKBIRD
POST DECOMMISSIONING CLEARANCE VERIFICATION TRAWL SWEEPS**

This is to certify that the MV "Leanne" PD345 has carried out a targeted approach post decommissioning sea bed trawl verification sweep of 4x Ettrick and Blackbird 500 metre safety zones and a section of 10" water injection flexible flowline (PL2446-JI2). Please note these trials did not cover the full 500 metre areas. Trawl sweep operations were ONLY carried along the routes marked by the dotted lines as shown on the attached charts in Appendix 1. Central positions for each location are also provided in Appendix 1. Areas out with these tracks have not been subject to verification trials and should continue to be approached with caution.

Unknown obstructions believed to be natural seabed anomalies were encountered resulting in reduction of vessel speed and fishing gear spread at positions:

57° 53.997'N, 000° 36.275'W

57° 50.867'N, 000° 36.739'W

These areas should continue to be avoided

In this area the seabed is a fairly static and mostly sandy muddy type, in a water depth of c. 115 metres. Using best endeavours and practice available it was found that there are no Ettrick Blackbird oil field related obstructions remaining. An average approach speed to replicate normal fishing activity was undertaken and at the time of these trials the swept areas were found to be safe for normal fishing operations.

Signed for on behalf of the Owners of MV

Andrew Innes, Marine Technical Specialist

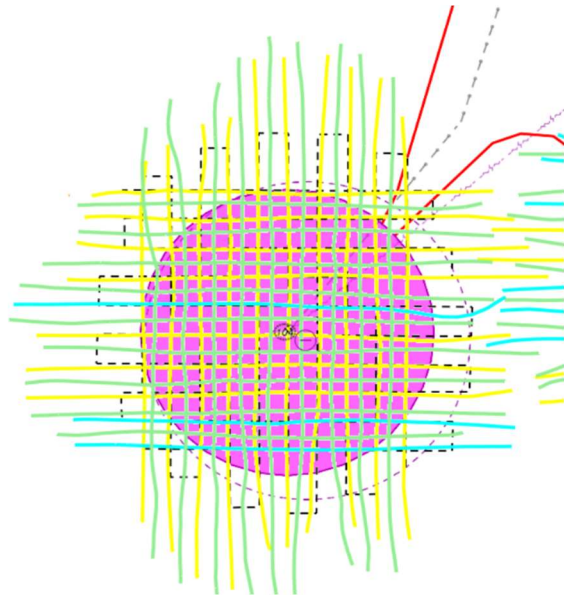

Appendix 1

Trawl sweep operations were ONLY carried along the routes marked by the dotted lines in these charts. Areas out with these tracks have not been subject to verification trials and should continue to be approached with caution.

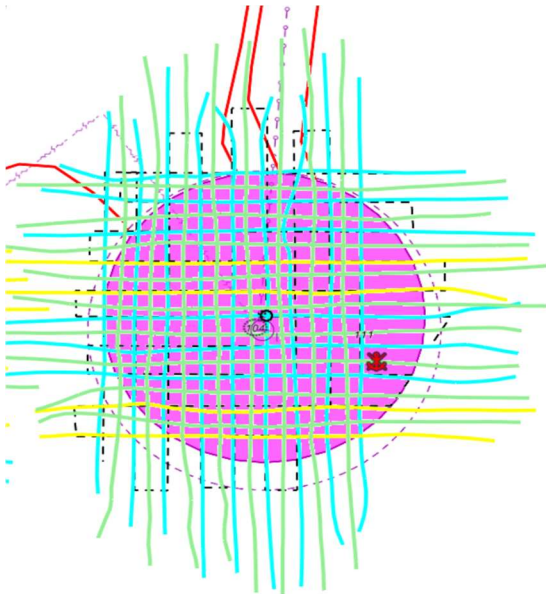

Ettrick Drill Centre Manifold
(57° 53.998'N, 000° 36.598'W)

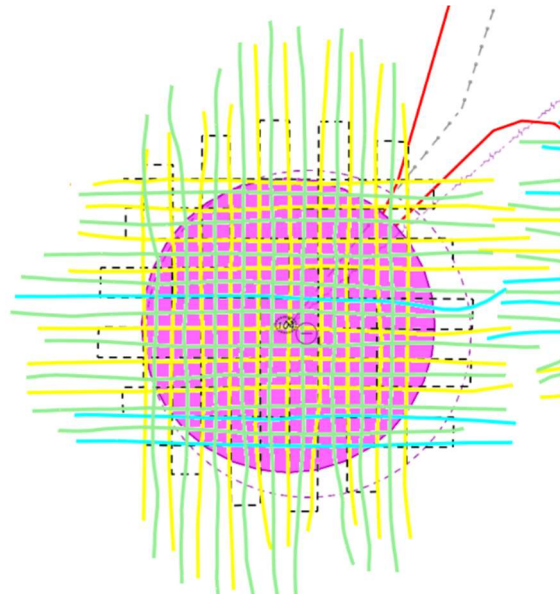

Ettrick Water Injection Well
(57° 53.509'N, 000° 40.487'W)

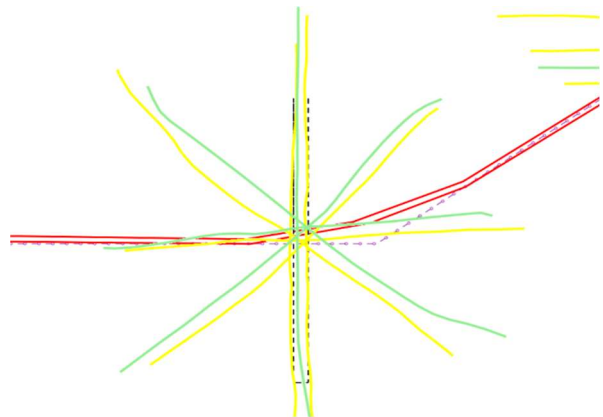

Blackbird Subsea Facilities
(57° 50.964'N, 000° 37.128'W)

Blackbird Water Injection Well
(57° 50.860'N, 000° 38.674'W)

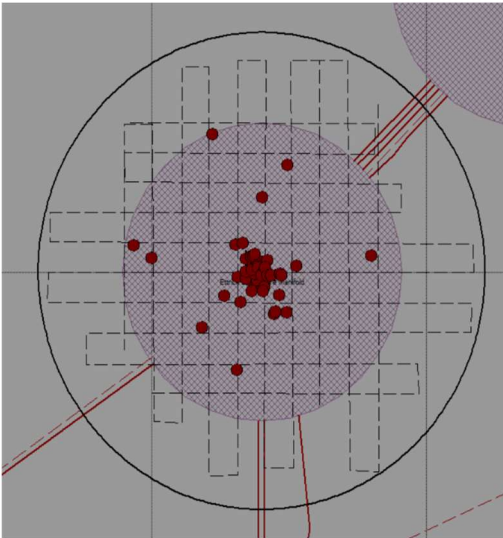

PL2446-JI2 Section (57° 53.515'N, 000° 38.072'W)

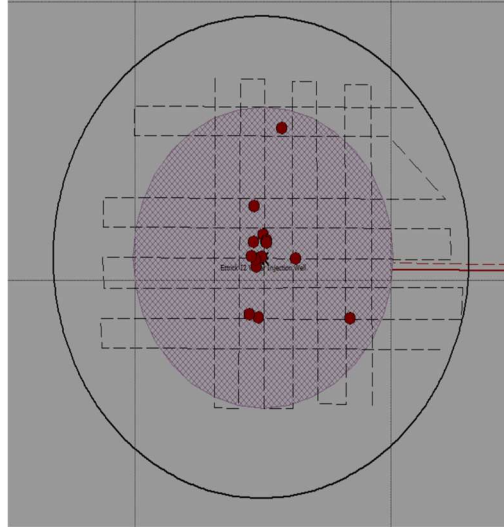

Appendix 1

Trawl sweep operations were ONLY carried along the routes marked by the dotted lines in these charts. Areas out with these tracks have not been subject to verification trials and should continue to be approached with caution. For reference the red circles denote previous debris locations which have since been removed.

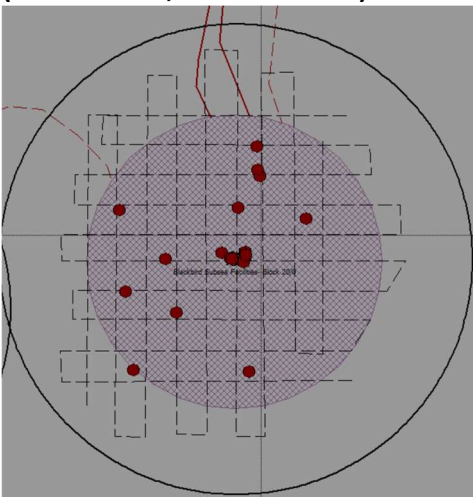

Ettrick Drill Centre Manifold
(57° 53.998'N, 000° 36.598'W)

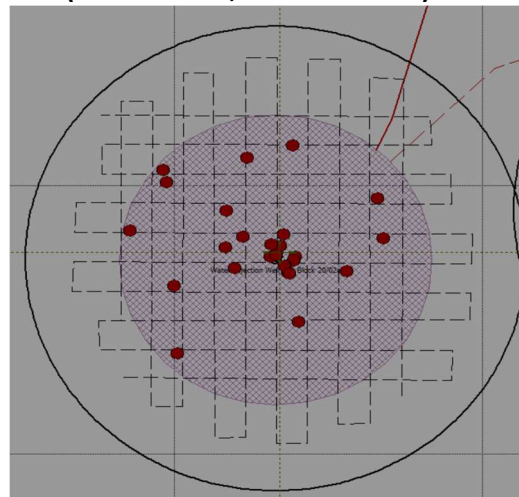

Ettrick Water Injection Well
(57° 53.509'N, 000° 40.487'W)

Blackbird Subsea Facilities
(57° 50.964'N, 000° 37.128'W)

Blackbird Water Injection Well
(57° 50.860'N, 000° 38.674'W)

PL2446-JI2 Section (57° 53.515'N, 000° 38.072'W)
