**ITHACA: JACKY 500 METRE SAFETY ZONE
POST DECOMMISSIONING CLEARANCE / VERIFICATION TRAWL SWEEPS**

This is to certify that the MV "Fruitful Harvest" PD50 has carried out a post decommissioning sea bed / trawl verification sweep of the **Jacky 500 metre safety zone**, using best endeavours and practice available to replicate normal fishing activity for that location. To the best of our knowledge, the zone has been successfully cleared of all equipment / infrastructure, including at the at the wellhead centre location (**58° 11.027'N, 002° 58.795'W**) where a snagging occurred during overtrawl trials in 2024.

At the time of these trials the swept areas were found to be safe for normal fishing operations. This supersedes the previous clearance certificate related to Jacky, issued 11/07/2024.

Signed for on behalf of the Owners of MV "Fruitful Harvest" PD50
