EDF RENEWABLES: NEART NA GAOITHE OFFSHORE WINDFARM VERIFICATION TRAWL SWEEPS ON DESIGNATED INTER ARRAY CABLE LOCATIONS

This is to certify that the MV "Julia M" FR54 has carried out overtrawlability trials between wind turbines **WT A19 (56° 16.490'N, 002° 20.015'W)** and **WT A15 (56° 15.474'N, 002° 19.484'W)**. These locations were selected based on historical fishing data showing prior demersal bottom trawl activity in this section of the offshore windfarm site (sandy mud seabed). The remainder of the site is historically scallop fishing grounds (firmer stony seabed) and hence not subject to over trawl operations.

No issues were experienced during the operations and at the time of these trials the swept areas were found to be safe for normal fishing operations.

Signed for on behalf of the Owners of MV "Julia M" FR54

Gordon Pollock, Skipper
