Compact Shear & Seal (CSS) Valve

Unity has developed the Compact Shear and Seal (CSS), a single ram BOP valve, which can be used to shear various conveyance systems offshore, during well intervention operations. This includes: Slickline Cables, SIS Hollow Rod and Coiled Tubing. The equipment consists of two hydraulically operated shear and seal rams, that can be pumped closed to form a seal against wellbore pressure. By incorporating static pistons inside ram cylinders, preventer rams can be operated in much smaller envelope that conventional BOP valves.

Benefits:

- Compact design to permit use in tight spaces
- Can be fitted through majority of rig hatches
- 50% lighter than conventional BOP design
- Technology platform for Triple/Quad BOP
- Capable of shearing high loads
- Suitable for shearing slickline, coil tubing and SIS hollow rods
- Easy in-field ram access without using a crane
- Replaceable rams for varying applications
- Replaceable cutting blades for low cost replacement parts
