

## Quantitative Analyst - Full Time (Remote)

### Summary

We are looking for a motivated and high-achieving Quantitative Analyst based anywhere in Europe to join the team working on an exciting new Big Data/Machine Learning platform. This is a full time placement with significant opportunities for growth and advancement as one of the first employees of the company.

### The Company

causaLens is high-tech startup based in London. We are bringing machine learning and big data technologies to the World's leading asset managers. We are an extraordinary team and the founders have worked for some of the most prominent global hedge funds and scientific institutions.

### Core requirements:

- Experience building financial models
- In-depth understanding of the operation of financial markets
- Highly capable, self-motivated, collaborative and personable
- Strong academic record
- Interest in advanced technologies such as machine learning
- Ability to demonstrate integrity and drive
- Naturally curious and effective problem solver
- An excellent written and verbal communicator with a high level of business acumen
- Ability to effectively work independently and remotely (from home or coworking space)

### Roles and Responsibilities:

This is an exciting role for a smart, creative person to build sophisticated models using the causaLens platform.

### Benefits:

Successful candidate will have the opportunity to join a fast-growing, agile, and international team passionate about innovation and making a difference. We will offer guidance, mentorship, and opportunities for professional development.

To apply, please email your introduction letter and CV to [join@causalens.com](mailto:join@causalens.com)
