2.1 Health and Lifestyle

| Section 1: Nutrients | | |
|----------------------------|--|--|
| Nutrient | Function | |
| 1 Carbohydrates | Provides energy . Found in sugary foods and bread and pasta, | |
| 2 Lipids | Provides you with a store of energy and keeps you warm. | |
| 3 Proteins | Are used for growth and repair . Found in meat and dairy . | |
| 4 Vitamins and Minerals | Keeps you healthy (needed for normal function). Found in fruit and veg . | |
| 5 Water | Needed in all cells and body fluids. | |
| 6 Fibre | Not a nutrient but important for a healthy diet. Keeps food moving through gut. Found in carbohydrates . | |
| | | |

| Section 2: Food Tests | | | | | |
|-----------------------|---|---------------------------------|--|--|--|
| Nutrient | Chemical Used | Colour Change if Present | | | |
| 7 Starch | Iodine | Turns blue-black | | | |
| 8 Lipids | Ethanol | Solution turns cloudy | | | |
| 9 Sugar | Benedict's Solution | Turns brick-red | | | |
| 10 Protein | Copper Sulphate and Sodium Hydroxide | Turns purple | | | |

11 Digestion | Large molecules being broken down into smaller molecules.

Water absorbed leaving undigested food called faeces.

Special proteins that break large molecules into smaller molecules

for absorption. Found in the mouth, stomach and small intestine

Food is chewed and mixed with saliva

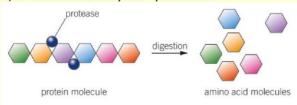

Faeces stored here.

Where faeces leave the body.

1/19 Carbohydrates Enzyme - carbohydrase enzymes cut molecule here chop large molecules into smalle molecules. 2/19 Lipids Enzyme - lipase Lipids are

3/19 Proteins. Enzyme - protease

lipid molecules

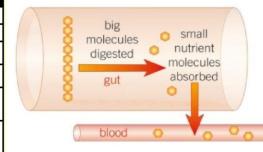

glycerol molecules

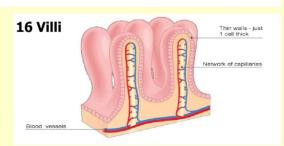

into fatty acids

and glycerol.

Protein is broken down into amino acids.

11 Digestion

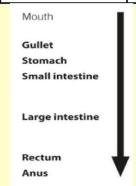

| Section 5 un | nhealthy diets |
|-------------------|---|
| 21. Starvation | Energy eaten in food is less than the energy used |
| 22. Obese | Extremely overweight - Energy eaten in food is more than the energy used; stored as fat under skin and around organs; |
| 23. Deficiency | When a person does not have enough of a vitamin, mineral of food group. |

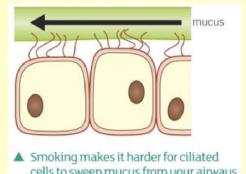

| Section 6: Drugs a | ion 6: Drugs and alcohol | | |
|--------------------------|--|--|--|
| 24. Medicinal drugs | Used in medicine to benefit health , treat symptoms of a condition e.g. paracetamol used to relieve pain | | |
| 25. Recreational drugs | Drug taken for enjoyment only – no benefit to health | | |
| 26. Addiction | When you need to take a drug to feel normal | | |
| 27. Stimulant | e.g. nicotine in cigarettes – speeds up bodies reactions | | |
| 28. Depressant | e.g alcohol – slows down bodies reactions | | |
| 29. Ethanol (Alcohol) | Absorbed into your blood stream; affects nervous system reducing reaction time and thinking ability; damages liver causing scaring (cirrhosis). | | |
| 30. Liver | Organ responsible for removing toxic chemicals e.g alcohol | | |
| 31. Smoking | linked to heart disease, Emphysema (lung disease), lung cancer, respiratory infections | | |

cells to sweep mucus from your airways.

| 13 Gullet | Food passes down this tube. |
|-----------------------|--|
| 14 Stomach | Food is mixed with digestive juices in and acids. |
| 15 Small Intestine | Small food molecules absorbed into the bloodstream. |
| | Small structures the line the intestine, increasing surface area and maximising absorption . |

12 Mouth

Section 4: Digestion

17. Large

Intestine 18. Rectum

19. Anus

20. Enzymes
