## Industrial dry coolers V-type

### General information & application

The Alfa-V VDD series is a wide range of heavy duty V-type dry coolers for HVAC, refrigeration and various industrial applications such as water/glycol cooling.

For industrial applications, dry coolers are suitable for closed circuit cooling of various process liquids in f.i. food, power, process and general industries. Alfa-V VDD dry coolers provide high capacities at reduced power consumption and a compact footprint.

Capacity range\* 100 up to 1800 kW

\*water, EN1048.

### Coil

The coil design provides excellent heat transfer. In standard execution dry coolers are fitted with smooth copper tubing  $\varnothing$  12 and 16 mm (VDD) or stainless steel tubing 16 mm (VDDY).

Fins in aluminium or sea water resistant AlMg, plain fin design for easy cleaning and long-lasting performance.

Separate connections provide the opportunity for independent operation of both cooling coils.

### Casing

Frame construction provides high rigidity for protection against vibration and thermal expansion. Casing, supports and frame made of corrosion resistant galvanized steel (class C4-H).

Separated fan sections and removable fan rings.

### Fan motors

ErP compliant fan AC & EC motors, available in three fan diameters (800, 910 & 1000 mm) and different noise levels. Motors with external rotor, protection class IP54 according to DIN 40050.

AC power supplies 400/50/3, 400/60/3 and 460/60/3 with integrated thermo contacts to provide reliable protection against thermal overload. EC power supply 380-480/50-60/3.

### Design pressure

Design pressure 10 bar. Each heat exchanger is leak tested with dry air.

### Benefits

- Heavy duty design with high corrosion resistance.
- Favorable capacity/footprint ratio.
- Available with easily cleanable industrial fins.
- Excellent sound characteristics.
- Reliable performance, Eurovent certified.
- Easy installation & maintenance.
- Energy efficient - low total cost of ownership.
- Two-year product guarantee.
- Easy access to additional on-line product information (QR code).

## Options

- Fin spacing up to 3.0 mm
- Coil corrosion protection
  - Epoxy coated aluminium fin (EP)
  - F-coat (FC)
  - Seawater resistant aluminium AlMg (SWR)
  - Industrial R-fin (RIF)
  - Epoxy coated aluminium R-fin (REP)
  - Seawater resistant aluminium AlMg R-fin (RSWR)
- Coil protection grid (GR)
- Spray Water kit (KW)
- Water Spray system including pumping station (SWS)
- Casing coated RAL 9002 (other colors on special request)
- Container skid (SK)
- Ladder and railings
- Vibration dampers (VD)
- Expansion tank (ET)
- Special fan motors
  - Protection class IP55
  - High-temperature motors
  - IEC standard motors
- Electrical accessories
  - Isolating switch (SW)
  - EC Motors wired to a common terminal box (CBP=connection box, CBMT=connection box and master controller+temperature signal)
  - Switchboard IP54 (BS)
  - AC fan speed control cabinet (BST)
  - EC fan speed control cabinet (ICM)
  - Basic EC switchboard panel (ECCB)

## Selection

Selection and pricing is to be performed with our Alfa LU-VE air heat exchanger selection software. Selection output includes all relevant technical data and dimensional drawings.

## Certifications

All VDD dry cooler models are "Eurovent Certify All" certified. The Alfa LU-VE quality system is in accordance with ISO 9001 and ISO 14001. All products are manufactured according to PED regulations.
