

RQ-185 – Single Grab Pipe Recovery Tool

Description

The Centurion Subsea Services' Single Grab Pipe Recovery Tool is designed to recover cut lengths of pipeline from the seabed floor and return to deck during decom operations. The tool is designed to be crane deployed and can recover lengths from approx. 1m long up.

The tool consists of a large pipe grab positioned at the center of the tool with a total SWL of up to 10Te. A hotstab receptacle with pressure gauge and counterbalance valve to open and close the grab and ensure pressure can be 'locked in' allowing the grab to remain open or closed when the hotstab is removed from the receptacle.

The tool also has a circular ROV grab bar around the tool, so that the tool can be positioned subsea by the ROV. The grab bar can also be used to stabilize the vehicle when inserting the hotstab or viewing the pressure gauge.

Key Features

- Crane deployed
- Can recover pipes up to 40in Dia.
- SWL of up to 10Te
- ROV grab bar for maneuverability subsea.

What Is Included

- Pipe Recovery Tool
- Operational Hoses
- Operations Manual
- Certification Pack

Options

- Spares Kit

SUBSEA SOLUTIONS THAT CHALLENGE CONVENTIONAL THINKING.

Specifications

Overall Specifications	
Weight in Air	1,088 Kg (Not including pipe)
Weight in Water	882 Kg (Not including pipe)
Dimensions	L1,258 x W920 x H1,149 mm
Suitable Media	Hydraulic Oil
SWL	10 Te
Input / Outputs	
Max Delivery Fluid Pressure	300 Bar (4,350 PSI)
