

# GASKET REMOVAL TOOL

## AX/VX AND CUSTOM DESIGN

Seanic Ocean Systems has designed and manufactured a variety of ring gasket removal and installation tooling that boasts a rugged yet lightweight design to perform under the formidable conditions of the deep sea environment. In addition to the standard configurations currently in stock, we have engineered and manufactured custom Max-8 and Max-14 gasket removal and replacement tool designs that require side entry to the wellhead (2" and 4" AX).

## TECHNICAL SPECIFICATIONS

### RUGGED, LIGHTWEIGHT DESIGN

This tool can be manufactured to accommodate a variety of industry standards or custom gasket sizes.

### RELIABLE REMOVAL AND INSTALLATION

Our gasket removal and installation tool, designed to be positioned by the ROV manipulator, efficiently and reliably replaces standard 18 3/4-inch AX and VX style gaskets.

### CORROSION-RESISTANT ALLOY CONSTRUCTION

The tool is manufactured using 100% corrosion-resistant alloys, ensuring resistance to corrosion damage and years of dependable subsea operation.

## WHAT'S IN THE BOX

- + AX/VX Tool
- + #4 Size Hose (2)
- + Spare Grip Tape
- + Operating & Maintenance Manual

	WEIGHT (AIR)	WEIGHT (WATER)
