

ATEX 440V – 110V 3.8kVA TRANSFORMER

Providing 110V power safely to your work area.

This Transformer is ATEX approved (Zones 1 and 2, 21 & 22) with a capacity of no less than 3.8kVA. Continuously rated it will deliver power safely wherever you need it.

Transportation is simple with a wrap-around protective marine grade stainless steel frame, fork lift points and lifting points. It is also designed to fit 2 units on a euro pallet making this highly compact.
