

FLUSHING UNIT FL30-200

This 30ltr flushing unit has been constructed offering our customer's a simple free standing fixed displacement flushing unit providing 30 litres per minute of flow at a maximum pressure rating of 200 Bar.

The Main pump unit is controlled by an on /off switch, fluid is filtered on the pressure and return side. The circulation valve allows quick clean up of the tank fluid. The filter elements are easily replaced and the filter housing has a by-pass and bypass indicator should the element become clogged.

General Tool Specifications

Overall Tool Dimensions:	1,300mm by 700mm by 1200mm
Estimated Tool Weight:	250 kg
Electrical Motor:	3 Phase 15 KW
Pump:	SSE66 Interpump
Pump Performance:	30 ltr/per min at 200 Bar
Filtration:	3 Micron 99.9% Glass Fibre 8" Pressure & Return Filter
Reservoir:	115 litre
RV:	0 to 200 Bar
Connection:	Pressure 2 off 8 JIC male Return 2 off 8 JIC male

Additional Features

- Separate sample point needle valve
- Tank low level cut off switch
- Heavy duty crash frame complete with Forklift pockets and Drip Tray

WARNING: ONLY TRAINED PERSONNEL TO OPERATE THIS UNIT
