

MED Round 3 - Bonifacio

Measurement Notices

Event Technical Committee

The Technical Committee in racing rule 92 is:

Adam Parry (GBR).

Executive Committee Delegation

In accordance with class rule B.2.1(e), the Cape 31 Class Authority has delegated the Technical Committee the following responsibilities that would otherwise be discharged by the Class Authority.

Rule	Description
C.2.1(c)	Changing of crew during an event
C.2.3(f)	Ability to waive the category 1 requirement for a part owner or alternate helm.
C.2.3(g)	Approving a temporary alternate helm.
C.5.7(a)	Haul out restrictions

As per Class Rule C.2.2(c), the scales to be used for crew weighing will be available on Wednesday 3rd and Thursday 4th near the race office. Exact location will be communicated via the event WhatsApp Group.

The Technical committee would also like to draw attention to the new Q&As that have been responded to through the CMS. Following the answer given in question 43 around forestay lengths it is our intension to measure each boats forestay to help us gather information on this topic. This will be carried out over the weekend and is intended to work in with teams daily routines so as to not impact a boats race day.
