

To strengthen the protection of London and Londoners against terrorist attacks.

ACT Awareness Remote Delivery

'ACT Awareness Remote Delivery' is a CT awareness package newly formed by the PSO CTPO network that has amended the existing NaCTSO 'ACT Awareness (Core Content)' product to be more suited for delivery specifically via an online platform to external businesses and organisations. It's styling and construction reflects that of current industry standard within private sector online delivery models to better facilitate an improved engagement experience by online audiences, whilst also helping presenters to better engage with the online audience on an individual or group basis through the use of various types of in-session communication.

Perhaps most vitally, ACT Awareness Remote Delivery contains all mandatory slides needed to fulfill the ACT Awareness (Core Content) requirement, and covers all requisite learning objectives listed for each of the core modules. Therefore, after consultation with NaCTSO, it has been agreed that delivery of this new package will formally constitute a delivery of their 'ACT Awareness' product. If you wish to know more, please get in touch.
