1 **ACCOUNTING POLICIES**

**Accounting convention**

The financial statements have been prepared under the historical cost convention modified to include the revaluation of freehold land and buildings

Investment properties are accounted for in accordance with SSAP 19 'Accounting for Investment Properties', which provides that these should not be subject to periodic depreciation charges (unless held on lease), but should be shown at open market value. This is contrary to the Companies Act 1985 which states that, subject to any provision for depreciation or diminution in value, fixed assets are normally to be stated at purchase price or production cost. Current cost accounting or the revaluation of specific assets to market value, as determined at the date of their last valuation, is also permitted.

The treatment of investment properties under the Companies Act does not give a true and fair view as these assets are not held for consumption in the business as investments, the disposal of which would not materially affect any manufacturing operations of the enterprise. In such a case it is the current value of these investments, and changes in that value, which are of prime importance. Consequently, for the proper appreciation of the financial position, the accounting treatment required by SSAP 19 is considered appropriate for investment properties.

**Turnover**

Turnover represents net invoiced sales of services, excluding value added tax.

**Tangible fixed assets**

Fixed assets include completed investment properties held for investment stated at open market value in accordance with Statement of Standard Accounting Practice No 19. No depreciation is provided as required by the Companies Act 1985 as the directors consider that the valuation results in the accounts giving a true and fair view. Other fixed assets, other than investment properties, are stated at historical cost.

No depreciation is provided in respect of freehold land and buildings as the directors consider that the current market value is not materially different from initial costs. In the opinion of the directors, any amount which might be required under Statement of Standard Accounting Practice No 12 to depreciate buildings would not have a material effect on the results of the company.

**1 ACCOUNTING POLICIES - continued**

**Deferred tax**

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.
