Notes to the abbreviated accounts for the Year Ended 31 March 2007

1 Accounting policies

Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2005).

Cash flow statement

The accounts do not include a cash flow statement because the company, as a small reporting entity, is exempt from the requirements to prepare such a statement.

Going concern

These financial statements have been prepared on a going concern basis.

Depreciation

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows:

Plant and machinery	25% straight line basis
Fixtures and fittings	25% straight line basis

Stock

Stock is valued at the lower of cost and net realisable value.

Hire purchase and finance lease contracts

Assets held under finance leases, which are leases where substantially all the risks and rewards of ownership of the asset have passed to the company, are capitalised in the balance sheet and are depreciated over their useful lives. The capital elements of future obligations under the leases are included as liabilities in the balance sheet. The interest element of the rental obligation is charged to the profit and loss account over the period of the lease and represents a constant proportion of the balance of capital repayments outstanding.

Assets acquired under instalment finance agreements are treated as tangible fixed assets and depreciation is provided accordingly. The capital element of future finance payments is included within creditors. Finance charges are allocated to accounting periods over the length of the contract.

Operating leases

Rentals paid under operating leases are charged to the profit and loss account as incurred.
