NOTES TO THE ABBREVIATED ACCOUNTS
YEAR ENDED 31 MARCH 2014

1. Accounting policies

Basis of accounting

The financial statements have been prepared under the historical cost convention, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Going Concern

The financial statements have been prepared on a going concern basis. The directors have assessed the Company's ability to continue as a going concern and have reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing these financial statements.

Turnover

The turnover shown in the profit and loss account represents amounts earned during the year, exclusive of Value Added Tax.

In respect of long-term contracts and contracts for on-going services, turnover represents the value of work done in the year, including estimates of amounts not invoiced. Turnover in respect of long-term contracts and contracts for on-going services is recognised by reference to the stage of completion.

Fixed assets

All fixed assets are initially recorded at cost.

Depreciation

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows:

Computer Equipment - over 3 years

Operating lease agreements

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged against profits on a straight line basis over the period of the lease.

Deferred taxation

The accounting policy in respect of deferred tax reflects the requirements of FRSSE 2008.

Deferred tax is provided on the liability method to take account of timing differences between the treatment of certain items for accounts purposes and the treatment for tax purposes. Tax deferred is accounted for in respect of all material timing differences. Deferred tax assets are only recognised to the extent that they are regarded as recoverable.

Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of the transaction. Exchange differences are taken into account in arriving at the operating profit.
