Other accounting policies

Deferred tax balances are recognised in respect of all timing differences that have originated but not reversed by the balance sheet date except that:

- > Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled into replacement assets and charged to tax only where the replacement assets are sold;
- > Provision for deferred tax that would arise on remittance of the retained earnings of overseas subsidiaries, associates and joint ventures only to the extent that, at the balance sheet date, dividends have been accrued as receivable;
- > Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted on the balance sheet date.

2 Company limited by guarantee

The Company is controlled by the Directors by virtue of the fact that although the company has no share capital and is limited by guarantee, they have undertaken to contribute up to £1 towards any deficit on winding up the company.
