NOTES TO THE ABBREVIATED ACCOUNTS

FOR THE YEAR ENDED 30TH SEPTEMBER 2000

1 Accounting Policies

Basis of Accounting

The Accounts have been prepared under the historical cost convention modified to include the revaluation of freehold investment properties.

Compliance with SSAP 19 "Accounting for investment properties" requires a departure from the requirement to depreciation and amortization and an explanation of this departure is given in Investment properties policy below.

The company has taken advantage of the exemptions in Financial Reporting Standard No. 1 from the requirement to produce a cash flow statement on the grounds that it is a small company.

Turnover

Turnover represents the rents of properties which are included on an accruals basis.

Depreciation

Depreciation is calculated to write down the cost of the following tangible fixed asset over the anticipated economic life as follows:-

Furniture and equipment	25% per annum on written down value
-------------------------	-------------------------------------

Investment Properties

In accordance with SSAP 19 no depreciation or amortisation is provided in respect of freehold investment properties. This departure from the requirements of the Companies Act 1985 for all properties to be depreciated is, in the opinion of the Directors, necessary for the accounts to give a true and fair view, in accordance with applicable accounting standards as properties are revalued annually and included in the accounts at their open market value.

The effect of depreciation and amortisation on value is already reflected annually in the valuation of properties and the amount attributed to this factor by the Directors cannot reasonably be separately identified or quantified. Had the provisions of the Act been followed, net assets would not have been affected but revenue profits would have been reduced for this and earlier years.

Investments

Fixed asset and current asset investments are stated at cost unless, in the opinion of the directors, there has been a permanent diminution in value, in which case an appropriate adjustment is made.

Deferred Taxation

Provision is made, using the liability method, for deferred taxation where it is considered that the liability will become payable in the foreseeable future. As in previous years, no provision has been made for taxation which might arise on the disposal of the Company's freehold investment properties at the market values at the balance sheet date.
