NOTES TO THE ABBREVIATED ACCOUNTS

YEAR ENDED 30TH SEPTEMBER 2014

1. ACCOUNTING POLICIES

Basis of accounting

The accounts have been prepared under the historical cost convention, modified to include the revaluation of certain fixed assets, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Compliance with SSAP 19 "Accounting for Investment Properties" requires a departure from the requirement of The Small Companies and Groups (Accounts and Directors' Report) Regulations 2008, relating to depreciation and amortisation and an explanation of this departure is given in Investment Properties policy below.

Turnover

Turnover represents the rents of properties which are included on an accruals basis.

Depreciation

Depreciation is calculated so as to write off the cost of an asset over the useful economic life of that asset as follows:

Furniture and Equipment - 25% per annum on written down value

Investment properties

Investment properties are shown at their open market value. The surplus or deficit arising from the annual revaluation is transferred to the investment revaluation reserve unless a deficit, or its reversal, on an individual investment property is expected to be permanent, in which case it is recognised in the profit and loss account for the year.

This is in accordance with the FRSSE which, unlike The Small Companies and Groups (Accounts and Directors' Report) Regulations 2008, does not require depreciation of investment properties. Investment properties are held for their investment potential and not for use by the company and so their current value is of prime importance. The departure from the provisions of the Act is required in order to give a true and fair view.

Deferred taxation

Deferred tax arises as a result of including items of income and expenditure in taxation computations in periods different to those in which they are included in the company's accounts.

Deferred tax is provided in full on timing differences which result in an obligation to pay more or (less) tax at a future date, using the tax rates that are expected to apply when the timing differences reverse, based on current tax rates and laws.

No provision has been made for taxation which might arise on the disposal of the company's freehold investment properties at the market value at the balance sheet date.

The deferred tax charge has not been discounted.

1. ACCOUNTING POLICIES *(continued)*

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.

Income from investments

Investment income comprises dividends declared during the accounting period on unlisted investments.

Investments

Fixed asset and current asset investments are stated at cost unless, in the opinion of the directors, there has been a permanent diminution in value, in which case an appropriate adjustment is made.
