**NOTES TO THE ABBREVIATED ACCOUNTS
FOR THE YEAR ENDED 30 APRIL 2012**

1 ACCOUNTING POLICIES

Basis of preparing the financial statements

The company meets its day to day working capital requirements utilising the cash balance held at the bank. The results for the year ended 30 April 2012 are profitable and the management accounts since the year end show that the company has continued to generate profits.

The directors have a reasonable expectation, given the known anticipated payments to be made that the company has adequate resources to continue in operational existence for the foreseeable future. Thus the company continues to adopt the going concern basis of accounting in preparing the annual financial statements.

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Preparation of consolidated financial statements

The financial statements contain information about DTE Risk and Financial Management Limited as an individual company and do not contain consolidated financial information as the parent of a group. The company has taken the option under Section 398 of the Companies Act 2006 not to prepare consolidated financial statements.

Revenue

Turnover represents the total commission and fees receivable by the company in the ordinary course of business which is recognised as the related services are provided.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life or, if held under a finance lease, over the lease term, whichever is the shorter.

Office equipment and computers	- 33% on reducing balance and 15% on reducing balance
Motor vehicles	- 25% on reducing balance

Stocks

Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

Deferred tax

Deferred tax is recognised in respect of all material timing differences that have originated but not reversed at the balance sheet date.

Hire purchase and leasing commitments

Assets obtained under hire purchase contracts are capitalised in the balance sheet. Those held under hire purchase contracts are depreciated over their estimated useful lives.

The interest element of these obligations is charged to the profit and loss account over the relevant period. The capital element of the future payments is treated as a liability.

Rentals paid under operating leases are charged to the profit and loss account as incurred.

Pensions

The company operates a defined contribution pension scheme. Contributions payable for the year are charged in the profit and loss account.

Fixed asset investments

Fixed asset investments are stated at cost, less any permanent diminution in value.
