NOTES TO THE FINANCIAL STATEMENTS (continued)

1. ACCOUNTING POLICIES (Continued)

Investment in subsidiaries

Investments in subsidiaries are stated at historical cost less impairment provisions for any permanent decrease in value. The carrying amounts of the company's investments are reviewed at each reporting date to determine whether there is an indication of impairment. If such an indication exists, then the asset's recoverable amount is estimated. Losses are recognised in the income statement and reflected in an allowance against the carrying value. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through the income statement.

Judgements in applying accounting policies and key sources of estimation uncertainty

The directors make estimates and assumptions concerning the future of the company. The resulting accounting estimates will, by definition, seldom equate to actual results. The company's directors are of the opinion that there are no estimates and assumptions that have a significant risk of casting material adjustment to the carrying value of the assets and liabilities for the company within the next financial year due to the nature of the business.

The critical accounting policies, which the directors consider are of greater complexity and/or particularly subject to the exercise of judgements, are set out in detail in the relevant accounting policies:

- Investment in subsidiaries: A critical accounting judgement, specific to the company, is the assessment that recoverable amount of the company's investment in subsidiaries is greater than the carrying amount.

The company is incorporated in the Netherlands, but resident for tax purposes as a private company limited by shares in England, United Kingdom.
