Interactive Brokers (U.K.) Limited

Directors' report

The directors present their annual report, together with the financial statements and auditor's report for the year ended 31 December 2010

PRINCIPAL ACTIVITIES AND REVIEW OF DEVELOPMENTS

Interactive Brokers (U K) Limited (the "Company") offers execution and clearing broking services in equity and derivative products to European private and institutional clients Interactive Brokers (U K) Limited has been authorised to carry out investment business by the Financial Services Authority since 6 February 2002 The firm is a member of the London Stock Exchange, Irish Stock Exchange, Borsa Italiana, Borsa Valori di Milano, MEFF, MexDer, Chi-X, BATS and Crest It is also a general clearing member of LCH for LSE, NYSE-LIFFE, EDX and the Virt-x SIX exchange

In September 2010, the Company began testing systems and processes for over-the-counter products, specifically unallocated spot gold and contracts for differences, which will be offered to retail and institutional customers in January 2011

RESULTS AND DIVIDENDS

The directors report a profit after taxation of £1,060,689 for the year ended 31 December 2010 (2009 £1,763,451) No dividends are proposed

FUTURE PROSPECTS

Starting in January 2011, Interactive Brokers (U K) Limited intends to carry clients, hold client money and offer unallocated spot gold and contracts for differences The directors hope to expand this offering to include unallocated spot silver and spot FX trades in the foreseeable future

BUSINESS REVIEW

Overall, pre-tax profit decreased by 51% or £1 26 million to £1 21 million for the year ended 31 December 2010 from £2 47 million for the year ended 2009

Decrease in other operating income is driven by the absence of dividends received from LCH Clearnet and decreased translation gains from 2009 In addition 12,698 new customer accounts were added during 2010 For the year ended December 31, 2010, futures volume decreased by 60% or 0 32 million contracts to 0 22 million contracts, and options volume decreased by 4% or 0 46 million contracts to 10 25 million contracts

FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

Operational Risk

Management takes appropriate steps to minimise the impact of operational risks faced by the Company

Market Risk

Market risk is inherent to the investment in government bonds and, accordingly, the scope of the Company's market risk management procedures includes all market risk-sensitive financial instruments The Company's exposure to market risk is directly related to its role as a financial intermediary in customer trading transactions

Credit Risk

The Company's credit risk is primarily attributable to its trade receivables Credit risk is mitigated through the rigorous assessment of all new clients and through an annual review of the creditworthiness of existing clients

Interactive Brokers (U.K.) Limited

Directors' report (Continued)

Liquidity and Cash Flow Risk

The Company has established liquidity procedures for measuring funding requirements and identifying potential liquidity mismatches. The Company maintains a highly liquid balance sheet. The majority of our assets consist of cash and collateralised receivables, primarily consisting of receivables from clearing houses for settlement of securities transactions via inter company balances.

Going Concern

The Company is part of IBG LLC, formerly known as Interactive Brokers Group LLC. After making inquiries about the continued availability of the Group funding, the directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. As a consequence, the directors believe that the Company is well placed to manage its business risks successfully despite the current uncertain economic outlook. Note 21 to the financial statements includes the company's objectives, policies and processes for its financial risk management objectives. Accordingly, the Directors continue to adopt the going concern basis in preparing the annual report and financial statements.

DIRECTORS

Thomas Peterffy, Gerald Perez, Yograj Aggarwal and Jonathan Chait have been directors of the Company throughout the year.

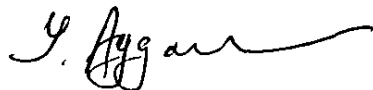

AUDITOR

Each of the persons who is a director at the date of approval of this report confirms that

- (1) so far as the director is aware there is no relevant audit information (as defined in the Companies Act 2006) of which the Company's auditor is unaware, and
- (2) the director has taken all the steps that he/she ought to have taken as a director in order to make himself / herself, aware of any relevant audit information (as defined) and to establish that the Company's auditor is aware of the information.

This confirmation is given and should be interpreted in accordance with the provisions of section 418 (2) of the Companies Act 2006. Deloitte LLP have expressed their willingness to continue in office as auditors and a resolution to reappoint them will be proposed at the forthcoming Annual General Meeting.

Approved by the Board of Directors
and signed on behalf of the Board

Yograj Aggarwal

Interactive Brokers (U.K.) Limited

Directors' responsibilities statement

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable laws and regulations

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare company financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period.

In preparing the financial statements, the directors are required to

- select suitable accounting policies and then apply them consistently,
- make judgements and accounting estimates that are reasonable and prudent,
- state whether applicable U.K. Accounting Standards have been followed, and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF INTERACTIVE BROKERS (U.K.) LIMITED

We have audited the financial statements of Interactive Brokers (U K) Limited for the year ended 31 December 2010 which comprise the Profit and Loss Account, the Balance Sheet and the related notes 1 to 22. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice)

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Respective responsibilities of directors and auditor

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of whether the accounting policies are appropriate to the company's circumstances and have been consistently applied and adequately disclosed, the reasonableness of significant accounting estimates made by the directors, and the overall presentation of the financial statements.

Opinion on other matter prescribed by the Companies Act 2006

In our opinion the information given in the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Opinion on financial statements

In our opinion the financial statements

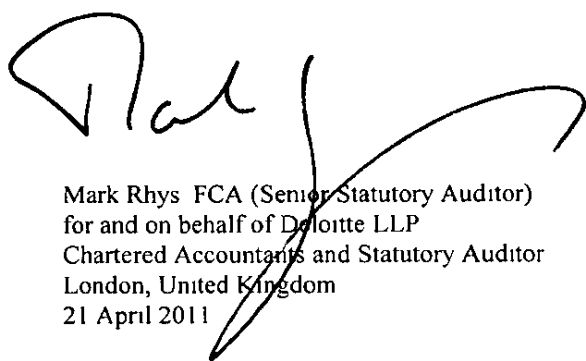

- give a true and fair view of the state of the company's affairs as at 31 December 2010 and of its profit for the year then ended,
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, and
- have been prepared in accordance with the requirements of the Companies Act 2006.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF INTERACTIVE BROKERS (U.K.) LIMITED (CONTINUED)

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us, or
- the financial statements are not in agreement with the accounting records and returns, or
- certain disclosures of directors' remuneration specified by law are not made, or
- we have not received all the information and explanations we require for our audit

Interactive Brokers (U.K.) Limited

Notes to the accounts As at 31 December 2010

1. Accounting policies

The financial statements are prepared under the historical cost convention as modified by the valuation of current asset investments at market value and in accordance with United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice)

The financial statements have been prepared on a going concern basis as set out on the Director's Report on page 3

The principal accounting policies are summarised below. They have all been applied consistently throughout the year and the preceding year

Tangible fixed assets

Tangible assets are stated at cost net of depreciation and any provision for impairment. Depreciation is provided on all tangible fixed assets at rates calculated to write off the cost of each asset on a straight-line basis over its expected useful life as follows

Leasehold improvements	over the lease period
Fixtures and fittings	7 years
Computer equipment	3 years

For year ended December 31, 2010, there were additions of £48,570 for computer equipment

Financial assets

Financial assets are classified into financial assets at fair value through profit or loss, available for sale investments or loans and receivables

Financial assets at fair value through profit or loss – financial assets that the Company designates on initial recognition as being at fair value through profit or loss are recognised at fair value, with transaction costs being recognised in the profit and loss account and are subsequently measured at fair value. Gains and losses on financial assets that are designated as at fair value through profit or loss are recognised in the profit and loss account as they arise. The net gain or loss recognised in profit or loss incorporates the interest earned on the financial asset. Fair value is determined in the manner described in Note 21

Available for sale investments – The investment in London Clearing House is classified as available for sale and is stated at fair value. Fair value is determined in the manner described in Note 21. Gains and losses arising from changes in fair value are recognised directly in the investment revaluation reserve with the exception of impairment losses, interest calculated using the effective interest method and foreign exchange gains and losses on monetary assets which are recognised directly in profit or loss. Where an investment is disposed of or is determined to be impaired, the cumulative gain or loss previously recognised in the investments revaluation reserve is reclassified to profit and loss accounts for the period

Loans and receivables – non-derivative financial assets with fixed or determinable repayments that are not quoted in an active market are classified as loans and receivables. Loans and receivables are initially recognised at fair value plus directly related transaction costs. They are subsequently measured at amortised cost using the effective interest method less any impairment losses. Interest is recognised by applying the effective interest rate, except for short-term receivables when recognition of interest would be immaterial

Investments consist of foreign government bonds, carried at market value

Impairment of financial assets

The Company assesses at each balance sheet date whether there is any objective evidence that a financial asset or group of financial assets, other than those at fair value through profit or loss, is impaired. A

Interactive Brokers (U.K.) Limited

Notes to the accounts As at 31 December 2010

1. Accounting policies (continued)

Impairment of financial assets (continued)

financial asset or portfolio of financial assets is impaired and an impairment loss incurred if there is objective evidence that an event or events since initial recognition of the asset have adversely affected the amount or timing of future cash flows from the asset. For loans and receivables, the amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss on the asset or for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

With the exception of available-for-sale equity instruments, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment reversed does not exceed what the amortised cost would have been, had the impairment not been recognised.

In respect of available-for-sale equity securities, any subsequent increase in fair value after an impairment loss is recognised directly in equity.

Debt and equity

Debt and equity instruments are classified according to the substance of the contractual arrangements entered into.

Financial liabilities

Financial liabilities are classified as either financial liabilities at fair value through profit or loss or other financial liabilities.

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss are initially measured at fair value and subsequently stated at fair value, with any resultant gain or loss recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability. The Company does not have any financial liabilities at fair value through profit or loss.

Other financial liabilities

Other financial liabilities are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis. The effective interest method is a method calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or where appropriate, a shorter period, to its initial carrying value.

Interactive Brokers (U.K.) Limited

Notes to the accounts As at 31 December 2010

1. Accounting policies (continued)

Share-based payments

The Company operates equity-settled share-based payments schemes to certain employees whereby the employee are awarded stock units in the parent company. Under FRS 20 Share Based Payments, the equity-settled share based payments are measured at fair value (excluding the effect of non market-based vesting conditions) at the date of the grant. The fair value determined at the grant date of the equity-settled share-based payments is expensed over seven years, with 10% of the cost being expensed in the first year and 15% of the cost in each of the succeeding six years, based on the Company's estimate of the shares that will eventually vest, adjusted for the effect of non-market based vesting conditions. Fair value is measured based on the market value of parent company shares at grant date.

Turnover

Turnover is recognised on an accrual basis and represents commission earned from agency trades.

Interest receivable and payable

Interest receivable and payable are recognised on an accrual basis based on the contracted interest rate.

Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Sterling is the Company's functional and presentational currency. Transactions in foreign currencies are translated into sterling at the rates of exchange ruling at the dates of the transactions. Exchange differences are included in the profit and loss account.

Cash flow statement

The Company has taken advantage of the exemption from preparing a cash flow statement under paragraph 5 (a) of Financial Reporting Standard No. 1.

Taxation

Current taxation is provided at amounts expected to be paid or recovered using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is recognised in respect of all timing differences that have originated but not reversed, at the balance sheet date, where transactions or events that resulted in an obligation to pay more tax in the future or a right to pay less in the future tax have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profit and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax assets are recognized to the extent it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

Interactive Brokers (U.K.) Limited

Notes to the accounts As at 31 December 2010

1. Accounting policies (continued)

Client money

Client money is held by the Company's affiliate, Interactive Brokers LLC ("IB LLC"), a broker-dealer registered in the USA. Such money and the corresponding liabilities to clients are not reflected in the Company's balance sheet.

10. Fixed asset investments – available for sale

	2010 £	2009 £
Fixed asset investment - available for sale	<u>297,619</u>	<u>297,619</u>

The fixed asset investments relate to the Company's shareholding in the London Clearing House. The holding is classified as available for sale and is stated at fair value. The cost of the investment approximates the fair value as the shares are not quoted in an active market, are not transferable and are required for the Company to be able to conduct its business. The Company has no intention to dispose of the shares.

19. Dividend

No dividends were proposed for the year (2009 £0)

20. Immediate and ultimate controlling company and related party disclosures

The Company's immediate and ultimate controlling party is IBG LLC, a company incorporated in the USA. This is the largest group in which the results of the company are consolidated. Copies of the IBG LLC financial statements are available from 2 Pickwick Plaza, Greenwich, Connecticut, 06830, United States of America.

The Company has taken advantage of the exemption from reporting related party transactions with group undertakings under paragraph 3(d) of Financial Reporting Standard No. 8.

21. Financial instruments and risk management

Overall

The Company's principal business activities result in exposure to market and credit risks. In addition, the Company is subject to liquidity and cash flow risks. Effective identification, assessment and management of these risks is critical to the success and stability of the Company. As a result, comprehensive risk management procedures have been established to identify, monitor and control each of these major risks.

At the parent company level, various management committees have been established that have responsibilities for monitoring and oversight of its activities and risk exposures of the companies within the Group.

Market risk

Market risk generally represents the risk of loss that may result from the potential change in the value of a financial instrument as a result of fluctuations in bond prices. Market risk can be exacerbated in times of illiquidity where market participants refrain from transacting in normal quantities and/or at normal bid-offer spreads. Market risk is inherent to the investment in government bonds and, accordingly, the scope of the Company's market risk management procedures includes all market risk-sensitive financial instruments.

The Company's exposure to market risk is directly related to its role as a financial intermediary in customer trading transactions.

Credit risk

Brokerage activities expose the Company to credit risks. These risks are managed in accordance with established risk management policies and procedures. To accomplish this, management has established a risk management process that includes

- A regular review of the risk management process by the executive management as part of their oversight role,
- Defined risk management policies and procedures supported by a rigorous analytic framework, and
- Articulated risk tolerance levels as defined by executive management that are regularly reviewed to ensure that the Company's risk-taking is consistent with its business strategy, capital structure, and current and anticipated market conditions.

21. Financial instruments and risk management (continued)

Credit risk (continued)

The Company is exposed to risk of loss if a counterparty or issuer fails to perform its obligations under contractual terms ("default risk"). The Company has established policies and procedures for reviewing and establishing limits for credit exposure, maintaining collateral, and continually assessing the creditworthiness of counterparties.

In the normal course of business, the Company executes, settles and finances various customer securities transactions. Execution of these transactions includes the purchase and sale of securities by the Company that exposes the Company to default risk arising from the potential that customers or counterparties may fail to satisfy their obligations. In these situations, the Company may be required to purchase or sell financial instruments at unfavourable market prices to satisfy obligations to other customers or counterparties. The Company seeks to control the risks associated with its customer margin activities by requiring customers to maintain collateral in compliance with regulatory and internal guidelines.

As of 31 December 2010 and 2009, the Company did not have past due or impaired receivables and the receivables are expected to be recovered during the normal course of business. The carrying amount of financial assets recorded in the financial statements represents the Company's maximum exposure to credit risk without taking into account the value of any collateral obtained.

Concentrations of credit risk

The Company's exposure to credit risk associated with its brokerage and other activities is measured on an individual counterparty basis, as well as by groups of counterparties that share similar attributes.

Concentrations of credit risk can be affected by changes in political, industry, or economic factors. To reduce the potential for risk concentration, credit limits are established and monitored in light of changing counterparty and market conditions. As of 31 December 2010 and 2009, the Company did not have any material concentrations of credit risk.

Liquidity risk

Liquidity risk is the risk that an entity may encounter difficulty in realising assets or otherwise raising funds to meet commitments associated with financial instruments. The Company has established procedures for measuring funding requirements and identifying potential liquidity mismatches.

The Company maintains a highly liquid balance sheet. The majority of the assets consist of margin deposits with clearing houses and investments in government bonds.

The following table details the Company's expected maturity for its non-derivative financial assets and remaining contractual maturity for its non-derivative financial liabilities. The tables below have been drawn up based on the undiscounted contractual maturities of the financial assets and financial liabilities including interest that will be earned on or accrue to those assets and liabilities except where the Company anticipated that the cash flow will occur in a different period.

Fair value of financial instruments

At 31 December 2010 and 2009, the carrying amount of all the Company's financial assets and financial liabilities were carried at fair value or at amounts that approximate fair value. The fair value for foreign investment bonds is based on the quoted market price at the balance sheet date while the cost of investment in London Clearing House ("LCH") is deemed to approximate fair value as the shares of LCH are not quoted in an active market, the shares are non-transferable and can only be realised at cost upon cessation of the Company's operation. The carrying amount of other financial assets and financial liabilities approximate fair value due to their maturities of less than 1 year.

Fair value measurements recognised in the statement of financial position

In determining fair value, all investments with the exception of shares held at LCH, are classified within Level 1 of the fair value hierarchy, and are valued using quoted market prices as published by exchanges and clearing houses or otherwise broadly distributed in active markets.

*The notional price of the T Bills in 2010 was £17,143,837 (2009 £44,294,826)

22. Capital risk management

The Company manages its capital to ensure that it will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of the equity balance. During the year and prior year, the Company complied with the Financial Services Authority minimum capital requirements.

The capital structure of the Company consists of shareholders' equity comprising issued capital and retained earnings as disclosed in note 16 and 17.
