1 Accounting policies

Statement of preparation

The financial statements have been prepared in accordance with the Companies Act 2006 and Financial Reporting Standard 101 *Reduced Disclosure Framework* ("FRS 101"). The principal accounting policies adopted in the preparation of the financial statements are set out below. The policies have been consistently applied to all the years presented, unless otherwise stated.

The financial statements have been prepared on a historical cost basis. The presentation currency used is pound sterling and amounts have been presented in round thousands ("£000s").

These are the Company's first financial statements prepared in accordance with FRS 101. The date of transition is 1 May 2014. In previous years the financial statements were prepared in accordance with applicable UK accounting standards (UK GAAP). In the transition to FRS 101 from UK GAAP, the Company has made no measurement and recognition adjustments to previously reported equity, net assets or profit after taxation. Previously UK GAAP allowed the company to re-translate the investment at the balance sheet date as if it were a monetary item and exchange differences on the shares were taken to foreign exchange reserves. There is no equivalent treatment allowed under FRS 101. In applying FRS 101 for the first time the company's opening cost of investments in subsidiary companies has been taken as deemed cost. The investment has therefore been restated to the carrying value at date of transition to FRS 101. This investment was fully impaired and therefore impairment allowance was also restated and there was no change to net assets. The foreign currency reserve deemed to be zero as at 1 May 2014 and the resulting adjustment (£2,000) was recognised against the profit and loss account.

The Company's ultimate parent company, Rocco Forte Hotels Limited, includes the Company in its consolidated financial statements. The consolidated financial statements of Rocco Forte Hotels Limited, which is incorporated in the UK, are prepared in accordance with International Financial Reporting Standards as adopted by the EU and are publically available.

In preparing the financial statements the company has taken advantage of all disclosure exemptions conferred by FRS 101. Therefore the following disclosures have not been provided:

- A statement of cashflows
- Certain comparative information as otherwise required by EU endorsed IFRS
- Disclosure of related party transactions with other wholly owned members of the group headed by Rocco Forte Hotels Limited.
- Certain financial instrument disclosures as provided in the consolidated financial statements of Rocco Forte Hotels Limited

Exemption from preparation of group accounts

The financial statements contain information about Rocco Forte & Family (Geneva) Limited as an individual company and do not contain consolidated financial information as the parent of a group. The company has taken advantage of the exemption conferred by section 401 of the Companies Act 2006 not to produce consolidated financial statements as it is included in the consolidated accounts of a larger group.

Investments

Investments in subsidiaries are carried at cost less impairment. The carrying amount is reviewed at each reporting date to determine whether there is any indication of impairment. If such impairment exists, then the asset's recoverable amount is estimated. An impairment loss is recognised if the carrying amount of an asset exceeds its estimated recoverable amount. Impairment losses are recognised in the Profit and Loss Statement.

Rocco Forte & Family (Geneva) Limited

1 Accounting policies (*continued*)

Amounts due from and amounts due to Group subsidiaries

Amounts due from and amounts due to Group subsidiaries are initially recognised at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method, less any impairment losses. The carrying value is reviewed at each reporting date to determine whether there is any indication of impairment. Impairment losses are recognised in the profit and loss statement.

Foreign currency

Transactions in foreign currencies are translated to Company's functional currency at the exchange rates ruling on the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are retranslated to functional currency at the relevant rates of exchange ruling on the last day of the period. Foreign exchange differences arising on translation are recognised in the profit and statement. Non monetary assets and liabilities that are measured in terms of historical cost in foreign currency are translated using the exchange rates at the dates of transactions.

Income and Expenses

Interest receivable and payable is recognised in the profit and loss statement as it accrues, using the effective interest rate method.

Taxation

Current tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the tax authorities including interest. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the end of the reporting period.

Deferred tax

Deferred tax assets and liabilities are recognised in respect of temporary differences between the tax base and carrying value of assets and liabilities. Deferred tax assets are recognised to the extent that it is regarded as probable that the deductible temporary differences can be realised. The recoverability of all deferred tax assets is re-assessed at the end of each reporting period. Deferred tax is calculated at the tax rates that are expected to apply in the periods in which the asset or liability will be settled, based on rates enacted or substantively enacted at the end of the reporting period.

Critical accounting estimates and assumptions

The company makes certain estimates and assumptions regarding the future. Estimates and judgements are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Impairment testing

Investments and intercompany debtors are tested for impairment when events or circumstances indicate that their carrying value may not be recoverable.

The recoverable amount is determined based on value in use calculations. The use of this method requires the estimation of future cash flows and the choice of a discount rate in order to calculate the present value of the cash flows. Information on the discount rates and key judgements are included in note 3 to the consolidated financial statements of Rocco Forte Hotels Limited. No impairment was identified for the year ended 30 April 2016.
