A & D 4X4 LIMITED

Notes to the Financial Statements

for the Period Ended 30 September 2017

1. Accounting policies

These financial statements have been prepared in accordance with the provisions of Section 1A (Small Entities) of Financial Reporting Standard 102

Turnover policy

Turnover is measured at the fair value of the consideration received or receivable net of VAT and trade discounts. The policies adopted for the recognition of turnover are as follows: Sale of goods Turnover from the sale of goods is recognised when significant risks and rewards of ownership of the goods have transferred to the buyer, the amount of turnover can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the company and the costs incurred or to be incurred in respect of the transaction can be measured reliably. This is usually on dispatch of the goods. Rendering of services When the outcome of a transaction can be estimated reliably, turnover from servicing and repairs is recognised by reference to the stage of completion at the balance sheet date.

Tangible fixed assets and depreciation policy

Tangible assets Tangible fixed assets are stated at cost (or deemed cost) or valuation less accumulated depreciation and accumulated impairment losses. Cost includes costs directly attributable to making the asset capable of operating as intended. Depreciation Depreciation is calculated so as to write off the cost or valuation of an asset, less its residual value, over the useful economic life of that asset as follows: Land - Land is not depreciated Short leasehold property - 10% straight line Plant and machinery - 10% straight line Motor vehicles - 20% straight line If there is an indication that there has been a significant change in depreciation rate, useful life or residual value of tangible assets, the depreciation is revised prospectively to reflect the new estimates.

Other accounting policies

General information and basis of preparation A & D 4X4 Limited is a company limited by shares incorporated in England within the United Kingdom. The address of the registered office is given in the directors and other information on page 2 of these financial statements. The nature of the company's operations and principal activities is that of wholesale and retail sales and servicing of 4 x 4 vehicles. The financial statements are presented in sterling which is the functional currency of the company and rounded to the nearest £. These financial statements have been prepared in compliance with the provisions of FRS 102, Section 1A small entities. The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented unless otherwise stated. Impairment Assets not measured at fair value are reviewed for any indication that the asset may be impaired at each balance sheet date. If such indication exists, the recoverable amount of the asset, or the asset's cash generating unit, is estimated and compared to the carrying amount. Where the carrying amount exceeds its recoverable amount, an impairment loss is recognised in profit or loss unless the asset is carried at a revalued amount where the impairment loss is a revaluation decrease. Stocks Stocks are stated at the lower of cost and estimated selling price less costs to complete and sell. Cost includes all costs of purchase, costs of conversion and other costs incurred in bringing stock to its present location and condition. Cost is calculated using the first-in, first-out formula. Provision is made for damaged, obsolete and slow-moving stock where appropriate. Provisions Provisions are recognised when the company has an obligation at the balance sheet date as a result of a past event, it is probable that an outflow of economic benefits will be required in settlement and the amount can be reliably estimated. Loans and borrowings Loans and borrowings are initially recognised at the transaction price including transaction costs. Subsequently, they are measured at amortised cost using the effective interest rate method, less impairment. If an arrangement constitutes a finance transaction it is measured at present value. Defined contribution plans The company operates a defined contribution plan for the benefit of its employees. Contributions are expensed as they become payable.
