Notes to the Abbreviated Accounts

for the year ended 31 July 2013

1 Accounting policies

Basis of preparation

The accounts have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover represents the value, net of value added tax and discounts, of goods provided to customers and work carried out in respect of services provided to customers.

Depreciation

Depreciation has been provided at the following rates in order to write off the assets over their estimated useful lives.

Computer equipment	33.33% straight line
--------------------	----------------------

Work in progress

Work in progress is valued on the basis of long term contracts. The company classifies as long term those contracts where the activity extends over more than one accounting period. The amount recognised as turnover represents the amount of work carried out in the period. Where the outcome of a contract can be assessed with reasonable certainty, attributable profit is recognised in proportion to the amount of turnover recognised in the accounts. Full provision is made for any foreseeable losses. Long term contract balances are included in the balance sheet at net cost, less foreseeable losses, and included in debtors under amounts recoverable on contracts.

Foreign currencies

Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date. All differences are taken to the profit and loss account.
