HAMMERSON (CRICKLEWOOD) LIMITED

NOTES TO THE FINANCIAL STATEMENTS

Year ended 31 December 2013

1. ACCOUNTING POLICIES

The following principal accounting policies have been applied consistently throughout the current and preceding year.

a) Basis of accounting

The financial statements have been prepared under the historical cost convention as modified by the revaluation of investment properties in accordance with all applicable law and United Kingdom accounting standards, with the exception of the depreciation of investment properties as explained below.

b) Going concern

The current economic conditions have created a number of uncertainties which are likely to affect the Company's future performance. The key risks relate to tenant default and property valuations which are closely monitored by the Directors. The financial position of the Company is as set out in the Balance Sheet.

The Company has net current liabilities as at 31 December 2013 and is reliant on the support of its ultimate parent company, Hammerson plc, to be able to meet its liabilities as they fall due. The Directors consider that the Company is an integral part of Hammerson plc's structure and strategy and this is evidenced by a letter of support from Hammerson plc, which states its intent to provide the necessary financial support to ensure that the Company is a going concern for at least twelve months from the date of signing of these financial statements. After making enquiries and taking account of the factors noted above, the Directors have a reasonable expectation that the Company will have access to adequate resources to continue in existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the financial statements.

c) Cash flow statement

As the Company is a wholly owned subsidiary it has taken exemption under the terms of Financial Reporting Standard 1 (revised 1996) from preparing a cash flow statement, as its cash flows are included in the consolidated financial statements of Hammerson plc, which are publicly available.

d) Net rental income

Rental income from properties leased out under an operating lease is recognised in the profit and loss account on a straight-line basis over the lease term. Contingent rents, such as turnover rents, rent reviews and indexation are recorded as income in the periods in which they are earned. Rent reviews are recognised when such reviews have been agreed with tenants.

Lease incentives and costs associated with entering into tenant leases are added to the costs of property and are amortised over the period to the first break option or, if the probability that the break option will be exercised is considered low, over the lease term.

Property operating expenses are accounted for on an accruals basis and any property operating expenditure not recovered from tenants through service charges is charged to the profit and loss account.

HAMMERSON (CRICKLEWOOD) LIMITED

NOTES TO THE ACCOUNTS Year ended 31 December 2013

1. ACCOUNTING POLICIES (continued)

e) Taxation

Current tax is the expected tax payable on the taxable income for the year, using tax rates applicable at the balance sheet date, together with any adjustment in respect of previous years.

In accordance with Financial Reporting Standard 19 "Deferred Tax", deferred tax is provided in respect of all timing differences that may give rise to an obligation to pay more or less tax in the future.

f) Investment properties

The property portfolio, which is carried in the balance sheet at fair value, is valued six-monthly by professionally qualified external valuers and the Directors must ensure that they are satisfied that the valuation of the Company's properties is appropriate for the accounts. Investment properties, excluding properties held for development, are valued by adopting the 'investment method' of valuation. This approach involves applying market-derived capitalisation yields to current and market-derived future income streams with appropriate adjustments for income voids arising from vacancies or rent-free periods. These capitalisation yields and future income streams are derived from comparable property and leasing transactions and are considered to be the key inputs in the valuation. Other factors that are taken into account in the valuations include the tenure of the property, tenancy details and ground and structural conditions.

In the case of ongoing developments, the approach applied is the 'residual method' of valuation, which is the investment method of valuation as described above with a deduction for all costs necessary to complete the development, together with a further allowance for remaining risk. Properties held for future development are generally valued by adopting the higher of the residual method of valuation allowing for all associated risks, or the investment method of valuation for the existing asset.

All changes in fair value are taken to the revaluation reserve and all costs directly associated with the purchase and construction of a property are capitalised.

g) Depreciation

In accordance with Statement of Standard Accounting Practice No 19, no depreciation is provided in respect of freehold properties or leasehold properties with over twenty years to expiry. This is a departure from the requirements of the Companies Act 2006, which requires all properties to be depreciated. Such properties are not held for consumption, but for investment, and the Directors consider that to depreciate them would not give a true and fair view. Depreciation is only one amongst many factors reflected in the annual valuation of properties and accordingly the amount of depreciation, which might otherwise have been charged, cannot be separately identified or quantified. The Directors consider that this policy results in the accounts giving a true and fair view.

h) Fixed asset investments

Fixed asset investments are stated at cost less provision for impairment.

Group companies remain subject to UK corporation tax on items other than UK property rental profits and gains on UK investment properties but, as the Group has surplus tax losses, the Group's policy is for these taxable profits and losses to be fully offset by group relief surrendered without payment, so that individual subsidiaries do not bear tax.

The Company therefore had no tax charge for the year, and this is expected to continue for the foreseeable future. The profits covered by group relief for the year ended 31 December 2013 are £nil (2012: £nil).
