1 Accounting policies

Accounting convention

The accounts have been prepared under the historical cost convention.

Turnover

Turnover represents the invoiced value of goods and services supplied by the company, net of value added tax and trade discounts.

Depreciation

Depreciation has been provided at the following rates in order to write off the assets over their estimated useful lives.

Plant and machinery	20% straight line
Motor vehicles	25% straight line

Stocks

Stock is valued at the lower of cost and net realisable value.

Deferred taxation

Provision is made for deferred taxation using the liability method to take account of timing differences between the incidence of income and expenditure for taxation and accounting purposes, except to the extent that a liability to taxation is unlikely to crystallise.

Foreign currencies

Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date. All differences are taken to the profit and loss account.

Leasing and hire purchase commitments

Assets held under finance leases and hire purchase contracts, which are those where substantially all the risks and rewards of ownership of the asset have passed to the company, are capitalised in the balance sheet and depreciated over their useful lives.

The interest element of the rental obligations is charged to the profit and loss account over the period of the lease and represents a constant proportion of the balance of capital repayments outstanding.

Rentals paid under operating leases are charged to income on a straight line basis over the lease term.

Pensions

The company operates a defined contribution pension scheme. Contributions are charged to the profit and loss account as they become payable in accordance with the rules of the scheme.
